Comprehension:

Read the following passage and answer the questions given below-
The Sundarbans, stretching across India and Bangladesh, form the world's largest mangrove forest. This UNESCO World Heritage site is where land, river, and sea blend into a rich ecosystem teeming with biodiversity. The Sundarbans are home to the elusive Royal Bengal tiger, saltwater crocodiles, and countless species of fish and birds. What makes this region unique is its ability to adapt—trees breathe through roots above water, and animals survive in brackish tides. Villagers live alongside nature, building houses on stilts and using boats for daily travel. The forest also acts as a natural barrier, protecting inland areas from cyclones and storm surges. However, climate change, rising sea levels, and human encroachment pose increasing threats. Conservation efforts aim to protect both the fragile habitat and the people who depend on it. The Sundarbans is not merely a forest—it is a living, breathing system of survival, balance, and resilience between humans and nature.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Meera had owned the yellow umbrella since she was ten. It wasn't particularly pretty, but it had been her companion through countless monsoons. When the city flooded, she had once helped an elderly woman cross the road using that very umbrella. Years later, while rushing to an interview in pouring rain, Meera offered shelter under the same umbrella to a stranger at a bus stop. The stranger turned out to be the interviewer. They both laughed at the coincidence when she entered the room. Meera got the job—not just because of qualifications, but perhaps also because of kindness. Even now, that yellow umbrella hangs near her door. Faded, patched, and no longer waterproof, it is no longer used, but never thrown away. It reminds her how little acts shape big moments, and how a simple thing can be tied to so many turning points. It is, in its own way, a symbol of unexpected blessings.

Comprehension:

Read the below passage carefully and answer the questions that follow.

The annual science fair once intimidated me, with its maze of charts, wires, and enthusiastic explanations. This year, however, our class decided to approach it differently. Instead of competing for the most complex machine, we focused on everyday problems around the school. One group designed a simple rainwater filter using sand and charcoal. Another created labelled bins to encourage waste segregation. My team built a low-cost solar lamp from recycled bottles and foil. Teachers appreciated the practicality, and visitors lingered longer at our stalls because they recognised the issues being addressed. The hall felt less like an exhibition of brilliance and more like a workshop of solutions. By the closing ceremony, prizes seemed secondary to the conversations sparked among students. I understood that innovation need not be dramatic; sometimes modest ideas improve life more reliably. The fair taught us that science becomes meaningful when it listens carefully to ordinary needs.

Comprehension:

Read the given passage carefully and answer the following questions.

Modern societies often observe changing attitudes among teenagers. Rapid modernization, global media exposure, and new lifestyles influence the outlook and behaviour of adolescents. Actions such as skipping classes, displaying wealth, and imitating foreign trends may seem appealing to students seeking identity or social approval. As a result, traditional ideals like modest living, thoughtful conduct, and respect for guidance may appear less important to some young individuals. Growing independence can also lead to disagreement with authority, gradually widening the gap between generations. Entertainment media, including television and films, occasionally present images of glamour or aggression that shape ideas about success. In addition, strong peer influence often encourages individuals to follow group behaviour rather than personal judgement. These developments raise concerns about youth values. Educational institutions can respond by promoting value-based learning and encouraging constructive activities that guide their energy toward creativity and responsible citizenship.

जानवरों में गधा सबसे ज्यादा बुद्धिहीन समझा जाता है। हम जब किसी आदमी को पहले दरजे का बेवकूफ़ कहना चाहते हैं, तो उसे गधा कहते हैं। गधा सचमुच बेवकूफ़ है, या उसके सीधेपन, उसकी निरापद सहिष्णुता ने उसे यह पदवी दे दी है, इसका निश्चय नहीं किया जा सकता। गायें सींग मारती हैं, व्याई हुई गाय तो अनायास ही सिंहनी का रूप धारण कर लेती है। कुत्ता भी बहुत गरीब जानवर है, लेकिन कभी-कभी उसे भी क्रोध आ ही जाता है; किंतु गधे को कभी क्रोध करते नहीं सुना, न देखा। जितना चाहो गरीब को मारो, चाहे जैसी खराब, सड़ी हुई घास सामने डाल दो, उसके चेहरे पर कभी असंतोष की छाया भी न दिखाई देगी। वैशाख में चाहे एकाध बार कुलेल कर लेता हो; पर हमने तो उसे कभी खुश होते नहीं देखा। उसके चेहरे पर एक विषाद स्थायी रूप से छाया रहता है। सुख-दुख, हानि-लाभ, किसी भी दशा में उसे बदलते नहीं देखा। ऋषियों-मुनियों के जितने गुण हैं वे सभी उसमें पराकाष्ठा को पहुँच गए हैं; पर आदमी उसे बेवकूफ़ कहता है। सद्गुणों का इतना अनादर कहीं नहीं देखा। कदाचित सीधापन संसार के लिए उपयुक्त नहीं है।1087

जानवरों में गधा सबसे ज्यादा बुद्धिहीन समझा जाता है। हम जब किसी आदमी को पहले दरजे का बेवकूफ़ कहना चाहते हैं, तो उसे गधा कहते हैं। गधा सचमुच बेवकूफ़ है, या उसके सीधेपन, उसकी निरापद सहिष्णुता ने उसे यह पदवी दे दी है, इसका निश्चय नहीं किया जा सकता। गायें सींग मारती हैं, व्याई हुई गाय तो अनायास ही सिंहनी का रूप धारण कर लेती है। कुत्ता भी बहुत गरीब जानवर है, लेकिन कभी-कभी उसे भी क्रोध आ ही जाता है; किंतु गधे को कभी क्रोध करते नहीं सुना, न देखा। जितना चाहो गरीब को मारो, चाहे जैसी खराब, सड़ी हुई घास सामने डाल दो, उसके चेहरे पर कभी असंतोष की छाया भी न दिखाई देगी। वैशाख में चाहे एकाध बार कुलेल कर लेता हो; पर हमने तो उसे कभी खुश होते नहीं देखा। उसके चेहरे पर एक विषाद स्थायी रूप से छाया रहता है। सुख-दुख, हानि-लाभ, किसी भी दशा में उसे बदलते नहीं देखा। ऋषियों-मुनियों के जितने गुण हैं वे सभी उसमें पराकाष्ठा को पहुँच गए हैं; पर आदमी उसे बेवकूफ़ कहता है। सद्गुणों का इतना अनादर कहीं नहीं देखा। कदाचित सीधापन संसार के लिए उपयुक्त नहीं है।1087

Comprehension:

Read the passage and answer the following questions:
Moral values play an important role in shaping a person's personality, helping individuals become responsible, caring, and selfless. When children and young people develop strong values early in life, they grow into thoughtful citizens who contribute positively to society and humanity. Yet several social issues such as corruption, poverty, child labour, injustice, and inequality continue to exist. Despite ongoing efforts toward progress, these concerns remain largely unresolved. One major reason is the declining emphasis on moral education, as modern learning often prioritizes academic achievement alone. In the absence of moral guidance, discipline weakens and ethical judgment declines. This affects personal conduct, strains relationships, and harms social harmony. Therefore, moral education is essential for developing balanced individuals and creating a peaceful and just society. It also encourages empathy, honesty, and respect — qualities that are vital for long-term social development.

Comprehension:

Read the passage and choose the correct answer to the questions based on it.

Basketball is often characterized by its high-flying athleticism, but at its core, it is a game of spatial geometry and rapid-fire decision-making. Played on a rectangular court, the objective is to propel a ball through a hoop ten feet high. This task requires a mastery of projectile motion; a shooter must calculate the optimal "arc" to maximize the entry angle into the rim. This physical precision is complemented by "court vision," the ability of a player to anticipate defensive rotations and exploit fleeting gaps in the opposition's coverage. The modern game has undergone a "statistical revolution," shifting focus from mid-range shots to the efficiency of the three-pointer. This transition highlights the dynamic nature of the sport, where data analytics now dictate player positioning and offensive sets. However, despite the influx of technology, basketball remains a test of "clutch" performance—the psychological resilience required to execute under immense pressure.

हालाँकि उसे खेती की हर बारीकी के बारे में मालूम था, लेकिन फिर भी डरा दिए जाने के कारण वह अकेला खेती करने का साहस न जुटा पाता था। इससे पहले वह शेर, चीते और मगरमच्छ के साथ साझे की खेती कर चुका था, अब उससे हाथी ने कहा कि अब वह उसके साथ साझे की खेती करे। किसान ने उसको बताया कि साझे में उसका कभी गुजारा नहीं होता और अकेले वह खेती कर नहीं सकता। इसलिए वह खेती करेगा ही नहीं। हाथी ने उसे बहुत देर तक पट्टी पढ़ाई और यह भी कहा कि उसके साथ साझे की खेती करने से यह लाभ होगा कि जंगल के छोटे-मोटे जानवर खेतों को नुकसान नहीं पहुँचा सकेंगे और खेती की अच्छी रखवाली हो जाएगी।
किसान किसी न किसी तरह तैयार हो गया। किसान फसल की सेवा करता रहा और समय पर जब गन्ने तैयार हो गए तो वह हाथी को खेत पर बुला लाया। किसान चाहता था कि फसल आधी-आधी बाँट ली जाए। हाथी ने कहा, "अपने और पराए की बात मत करो। यह छोटी बात है। हम दोनों ने मिलकर मेहनत की थी हम दोनों उसके स्वामी हैं। आओ, हम मिलकर गन्ने खाएँ।"

Comprehension:

Read the given passage carefully and answer the questions that follow.

Reading books regularly plays an important role in a student's intellectual development. Unlike short online posts, books encourage sustained attention and deeper understanding. When students read, they are exposed to new ideas, unfamiliar vocabulary, and different ways of thinking. This habit gradually improves language skills and strengthens concentration. Reading also helps students develop imagination and empathy, as they learn to see the world from perspectives different from their own. Moreover, books provide reliable and organized information, which is especially useful in an age where online content can be confusing or misleading. Students who read regularly often perform better in examinations because they are able to understand questions clearly and express their answers effectively. Therefore, cultivating the habit of reading is not only beneficial for academic success but also for personal growth.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Permafrost, permanently frozen ground covering vast areas of Earth's polar and high-altitude regions, is thawing at accelerating rates due to rising temperatures. This frozen soil, which has remained solid for thousands of years, contains immense quantities of organic matter preserved in ice. As permafrost thaws, microorganisms decompose this material, releasing methane and carbon dioxide into the atmosphere. These greenhouse gas emissions create a feedback loop, where warming causes thawing, which produces more emissions, further accelerating climate change. The physical consequences prove equally significant, as thawing destabilizes ground that supports infrastructure, buildings, and pipelines in Arctic communities. Roads buckle, foundations crack, and entire structures collapse as the frozen substrate beneath them turns to unstable mud. Indigenous communities inhabiting these regions for generations face displacement as their traditional lands become uninhabitable. Additionally, thawing permafrost may release ancient pathogens frozen for millennia, posing unknown health risks.

Comprehension:

Read the passage below and answer the questions that follow.

Reports indicate that India's electric two-wheeler (E2W) market is expected to rebound sharply next fiscal as easing rare-earth magnet supply and strong ownership cost advantages revive demand, even as intensifying competition accelerates consolidation among weaker players. According to Crisil Ratings, E2W volumes are likely to grow 16–18 per cent in FY27, up from an estimated 12–13 per cent in FY26, which was weighed down by temporary disruptions in the supply of rare-earth magnets. The recovery will be driven by improving availability of critical components, particularly rare-earth magnets sourced largely from China, alongside initial efforts by manufacturers to diversify supply chains and localise sourcing. Despite a tapering of government subsidies and slower declines in battery prices, electric two-wheelers continue to enjoy a significant total cost of ownership (TCO) advantage. Running costs for E2Ws remain at about Rs 0.3 per km, compared with Rs 2–2.5 per km for ICE vehicles.

Walking is one of the simplest ways to stay healthy. Just 30 minutes a day can help control weight, improve heart health, and boost mood. Unlike gym workouts, walking does not require any special equipment. Many doctors recommend walking for people of all ages. It is gentle on the joints and can be done almost anywhere — in parks, around the neighbourhood, or even inside large buildings. Walking with family or friends can also be fun and a chance to chat. Even a short daily walk can reduce stress and help us sleep better. By making walking a habit, we can enjoy both physical and mental benefits. In addition, walking outdoors connects us with nature and offers a refreshing break from screens. Setting small goals, like step counts, can motivate us to stay consistent. Over time, these daily walks can greatly improve overall well-being and quality of life.

Comprehension:

Read the given passage carefully and answer the questions that follow.
Water is essential for all living things, yet many people waste it every day. Simple habits like letting the tap run while brushing teeth or taking very long showers can waste litres of water. Experts warn that fresh water on Earth is limited, and careless use may lead to severe shortages in the future. In some parts of the world, people already walk miles just to get clean water. Small changes, like fixing leaks, using buckets instead of pipes for washing cars, and collecting rainwater, can help save thousands of litres every year. By using water wisely, we can ensure there is enough for everyone, now and in the future. Schools can also teach students the importance of water conservation through projects and campaigns. Even simple daily habits, when followed by many, can create a big positive impact. Protecting water today means protecting life for generations to come.

Comprehension:

Read the following passage carefully and select the most suitable option for each of the given questions.

Plastic waste has become a major global problem. Every year, millions of tons of plastic end up in oceans, harming marine life. Animals often mistake plastic for food, which leads to injury and death. Governments worldwide have started banning single-use plastics like straws and bags. Many people are switching to cloth bags and metal bottles. Yet, large industries still produce huge amounts of plastic packaging. Experts suggest that real change will come when people and companies both act responsibly. Reducing, reusing, and recycling remain the best solutions. If we don't act now, future generations may face even worse pollution. Raising public awareness through education and media campaigns is also essential. Investing in research to develop biodegradable materials can help reduce dependence on conventional plastics. Small daily choices, when multiplied by millions, can make a meaningful difference.

कालिदास को भारत का शेक्सपियर कहा जाता है। उनका नाम संस्कृत साहित्य के इतिहास में अमर हो गया है। वे विक्रमादित्य के दरबार को सुशोभित करने वाले नौ रत्नों में सबसे ऊपर थे। कालिदास की कविताओं और नाटकों ने न केवल भारतीय विद्वानों से, बल्कि मैक्समूलर जैसे यूरोपीय आलोचकों से भी खुलकर प्रशंसा प्राप्त की है। कालिदास किस युग में फले-फूले और उनका जन्म किस स्थान पर हुआ, यह विवाद का विषय है। जिस प्रकार प्रसिद्ध यूनानी कवि होमर का जन्मस्थान बनने के लिए सात-सात नगरियाँ परस्पर होड़ करती हैं, उसी प्रकार इस महाकवि की शैशव-भूमि के लिए भारतवर्ष के भिन्न-भिन्न प्रदेश अपने-अपने अधिकार उपस्थित करने है।
लेकिन सच्ची प्रतिभा समय और स्थान से स्वतंत्र होती है और यद्यपि कालिदास की शताब्दी बहुत दूर है, फिर भी उनकी प्रसिद्धि हमारे समय में भी अखंड भव्यता के साथ चमक रही है।

Comprehension:

Read the passage carefully and select the most suitable option for each of the given questions.

In recent years, the impact of social media on teenagers has become a subject of growing concern. Platforms like Instagram, Snapchat, and TikTok allow young people to share moments instantly and stay connected with friends. However, experts warn that constant exposure to idealised images and online validation can lead to feelings of inadequacy and anxiety.
According to a recent survey, nearly one in three teenagers reported feeling stressed or unhappy after browsing social media feeds. The fear of missing out (FOMO) often drives teens to check their phones frequently, disrupting sleep and study routines. In extreme cases, cyberbullying adds to emotional distress, causing long-lasting psychological harm. Despite these challenges, social media is not entirely negative. Many teens use these platforms to express creativity, raise awareness about social issues, and build supportive communities. The key lies in balancing online activity with offline hobbies, face-to-face conversations, and healthy self-reflection. By using social media mindfully, young people can enjoy its benefits while protecting their mental well-being.

Comprehension:

Read the given passage carefully and answer the questions that follow.

At the edge of our town stands an abandoned cinema, its faded posters peeling like old memories. For years, people walked past without noticing, assuming nothing useful remained inside. Recently, a group of volunteers proposed restoring it as a community arts centre. They scrubbed seats, repaired wiring, and repainted walls with cheerful colours. Former projectionists donated equipment, while local painters offered murals celebrating regional history. Gradually, the building shed its gloom. Children rehearsed plays on the stage, musicians practised chords in side rooms, and elderly residents organised film nights from classic reels. The project required countless evenings of labour, yet laughter echoed where silence once lingered. Opening day drew a crowd larger than any recent market. Watching neighbours greet one another proudly, I realised neglected spaces often conceal possibilities awaiting attention. Reviving them demands effort, but the reward is a renewed sense of belonging that strengthens the entire town.

नाभिकीय ऊर्जा वह असीम शक्ति है जो परमाणु के नाभिक में संचित होती है। इस ऊर्जा को अवमुक्त करने की दो प्रमुख वैज्ञानिक प्रविधियाँ हैं: नाभिकीय विखंडन और नाभिकीय संलयन। वर्तमान में विश्वभर के परमाणु रिएक्टरों में 'विखंडन' की प्रक्रिया का उपयोग किया जाता है, जिसमें यूरेनियम-235 जैसे भारी नाभिक पर मंद गति वाले न्यूट्रॉन की बौछार की जाती है। इस प्रक्रिया में भारी नाभिक दो हल्के नाभिकों में विभक्त हो जाता है, जिससे अत्यधिक ऊष्मीय ऊर्जा उत्पन्न होती है। दूसरी ओर, 'संलयन' वह प्रक्रिया है जिसमें दो हल्के नाभिक (जैसे हाइड्रोजन) मिलकर एक भारी नाभिक का निर्माण करते हैं। सूर्य और तारों में ऊर्जा का अटूट स्रोत यही संलयन प्रक्रिया है। नाभिकीय ऊर्जा का सबसे बड़ा गुण यह है कि यह 'कार्बन-मुक्त' होती है, जिससे ग्लोबल वार्मिंग जैसी समस्याओं से निपटने में सहायता मिलती है। हालाँकि, रेडियोधर्मी कचरे का सुरक्षित निस्तारण और परमाणु दुर्घटनाओं की आशंका इसके व्यापक उपयोग के मार्ग में गंभीर बाधाएं हैं।

Comprehension:

Read the passage below and answer the questions that follow.

Blockchain operates as a decentralized distributed database, with data stored across multiple computers, making it resistant to tampering. Transactions are validated through a consensus mechanism, ensuring agreement across the network. In blockchain technology, each transaction is grouped into blocks, which are then linked together, forming a secure and transparent chain. This structure guarantees data integrity and provides a tamper-proof record, making blockchain ideal for applications like cryptocurrencies and supply chain management. The key benefit of blockchain lies in its ability to provide security, transparency, and trust without relying on traditional intermediaries, such as banks or other third parties. Its design reduces the risk of fraud and errors, making it especially valuable in industries where secure transactions are critical, including finance and healthcare. In addition, blockchain helps businesses improve efficiency and reduce costs by streamlining processes and enhancing accountability. In practice, it is a single, shared, immutable source of truth.

Comprehension:

Read the passage below and answer the questions that follow.

Waste-to-energy (WtE) is a technology to convert non-recyclable waste materials into usable fuel, typically heat or electricity. A common method for this purpose is incineration in which trash is burned at a high temperature to boil the water off, creating steam that turns a turbine to generate power. Other tested methods include gasification, which uses a large quantity of heat with little oxygen to turn waste into gas, and anaerobic digestion, where bacteria break down organic waste to produce biogas. The impact of WtE on the environment involves both benefits and drawbacks and is a subject of ongoing debate. Waste reduction facilities can reduce the volume of waste by around 90%, significantly extending the life of existing landfills and reducing the need for new ones. At the same time, by diverting organic waste from landfills, WtE can also prevent the release of methane, a potent greenhouse gas, into the atmosphere.

शिष्टाचार मनुष्य के सामाजिक और नैतिक विकास का अनिवार्य तत्व है जो उसके व्यक्तित्व को परिष्कृत और प्रभावशाली बनाता है। शिष्टाचार मानवीय मूल्य और आदर्शों को जीवन में उतारने की कला है। शिष्टाचार के माध्यम से व्यक्ति न केवल स्वयं को अनुशासित करता है बल्कि समाज में संतुलन और सामंजस्य स्थापित करने में भी योगदान देता है। आधुनिक युग में जहाँ प्रतिस्पर्धा और व्यक्तिगत लाभ की प्रवृत्तियाँ अधिक बढ़ गई हैं वहाँ शिष्टाचार की भूमिका और अधिक महत्त्वपूर्ण हो गई है।
शिष्टाचार केवल औपचारिक आचरण नहीं है बल्कि यह व्यक्ति की आंतरिक नैतिकता और सामाजिक जिम्मेदारी का प्रतीक है। शिष्टाचार का पालन करने वाले व्यक्तियों की सामाजिक प्रतिष्ठा और नेतृत्व कौशल में वृध्दि होती है। शिष्टाचार व्यक्ति में सहयोग, सह-अस्तित्व और लोकतांत्रिक मूल्यों को सुदृढ़ करता है जिससे एक सुसंस्कृत, संतुलित और प्रगतिशील समाज का निर्माण संभव हो सके। अतः शिष्टाचार न केवल व्यक्तिगत विकास बल्कि सामाजिक और व्यावसायिक प्रगति का भी आधार है।

Comprehension:

Read the below passage carefully and answer the questions that follow.

Every evening the old railway platform glows with a peculiar charm that no timetable can measure. Commuters line the benches with tired shoulders, yet their faces soften as vendors light lanterns and brew tea in dented kettles. The air smells of cardamom and warm metal. A bookseller spreads second-hand paperbacks on a cloth, arranging them like fragile treasures. Children chase each other between pillars while grandparents guard luggage with watchful pride. Trains arrive with thunderous brakes, then depart, carrying fragments of conversation into darkness. Despite the noise, the platform fosters unexpected friendships; strangers exchange stories about missed connections and future plans. I often linger after my train has gone, simply to observe this temporary society forming and dissolving repeatedly. The place proves that travel is not merely movement between stations but a collection of brief human encounters that colour the journey more vividly than destinations themselves. It never feels ordinary.

Comprehension:

Read the passage carefully and answer the given questions.
Greed and poverty are often closely connected in society. While poverty reflects a lack of basic resources, greed represents an excessive desire for wealth and power. In many cases, the concentration of wealth in the hands of a few leads to unequal distribution, leaving a large section of society struggling to meet their basic needs. Greed can drive individuals and institutions to exploit resources without considering the consequences for others. This not only widens the gap between the rich and the poor but also creates social and economic imbalance. On the other hand, poverty limits opportunities, making it difficult for people to improve their living conditions. Efforts to reduce poverty require not only economic development but also ethical practices and fair distribution of resources. Encouraging social responsibility and reducing greed can contribute to a more just and balanced society. Thus, addressing greed is an important step towards reducing poverty and ensuring equality.

ज्ञान और विवेक को प्रायः एक ही मान लिया जाता है, किंतु इन दोनों में तात्विक अंतर है। ज्ञान सूचनाओं और तथ्यों का संग्रह मात्र है, जो हमें पुस्तकों, अनुभवों या शिक्षा से प्राप्त होता है। यह मस्तिष्क का विषय है और इसका विस्तार असीमित हो सकता है। इसके विपरीत, विवेक उस ज्ञान को सही समय, सही स्थान और सही उद्देश्य के लिए प्रयुक्त करने की कला है। यह ज्ञान का वह सार है जो अंतःकरण में बसता है। ज्ञान हमें शक्ति दे सकता है, किंतु विवेक उस शक्ति के सदुपयोग का मार्ग प्रशस्त करता है। विवेक के अभाव में ज्ञान एक दिशाहीन नौका के समान है, जो अपार क्षमता रखते हुए भी किसी चट्टान से टकराकर नष्ट हो सकती है। अतः, सच्ची शिक्षा का ध्येय केवल ज्ञान का संचय नहीं, अपितु विवेक का जागरण होना चाहिए। यह जागरण ही मनुष्य को वास्तविक अर्थों में शिक्षित बनाता है और उसे नैतिक संकटों से उबारता है।

Comprehension:

Read the given passage and answer the questions that follow.

Unemployment is one of the biggest problems faced by young people in India today. Every year, lakhs of students complete their education, but many of them do not find suitable jobs. The gap between education and job skills is a major reason. Many degrees do not prepare students for the real needs of the market. As a result, companies find it hard to hire trained workers, and graduates find it hard to get hired. The problem is worse in rural areas, where opportunities are limited. Even in cities, the number of jobs is less than the number of job seekers. This leads to frustration, low income, and even migration. Government programs like Skill India and Make in India try to create more jobs and train youth in useful skills. However, solving this problem fully will need better education, support for new businesses, and long-term planning across different sectors.

Comprehension:

Read the following passage carefully and select the most suitable option for each of the given questions.

In today's busy world, many people rely on fast food because it is quick and easily available. However, these foods often contain too much sugar, salt, and unhealthy fats. Over time, eating such food can lead to health problems like obesity, diabetes, and heart disease. Experts suggest that choosing fresh fruits, vegetables, whole grains, and home-cooked meals can make a big difference to our health. Drinking enough water and avoiding sugary drinks is also important. It is not necessary to stop eating favourite snacks completely, but balance and moderation are key. Families can plan meals together and learn to cook simple, healthy dishes. Developing good eating habits early helps young people stay energetic, focused in school, and healthy in the long run. Schools can also play a role by teaching students about nutrition and healthy choices. Even small changes, like replacing fried food with baked alternatives, can have positive effects. In the end, mindful eating supports a happier and healthier life.

Comprehension:

Read the given passage carefully and answer questions that follow.
Hollywood has long been considered the heart of the global film industry. Located in Los Angeles, California, it rose to prominence in the early 20th century and became a symbol of glamour, fame, and cinematic excellence. From silent films to blockbusters, Hollywood has shaped global storytelling and pop culture, setting trends that influence audiences worldwide. However, Hollywood is more than just a place where movies are made. It is a powerful cultural force, blending art and commerce. Its influence extends beyond entertainment into fashion, language, and even politics. With the rise of global streaming platforms, Hollywood now faces fierce competition from other film industries like Bollywood and South Korea's cinema, yet it remains a dominant player.
Today, Hollywood is adapting to calls for diversity, inclusion, and more responsible storytelling. Movements like #MeToo and demands for representation have encouraged studios to rethink casting and narratives. Though challenges remain, Hollywood continues to evolve, maintaining its place as both a mirror and a maker of societal values.

Read the given passage carefully and answer the questions that follow.
Sports are not just about winning medals; they help build discipline, teamwork, and confidence. Students who play sports regularly learn to manage stress and stay physically fit. Playing in a team teaches sharing, respect, and working together towards a common goal. Individual sports, like running or swimming, help develop self-motivation and mental strength. Schools should encourage students to participate in at least one sport. Parents can also support by cheering at matches and helping children practice. In the end, sports are a great way to stay healthy and build skills that help in studies and everyday life. Regular practice also teaches patience and perseverance, as improvement often takes time. Competing, whether winning or losing, helps students handle success and disappointment gracefully. Beyond physical benefits, sports also bring joy, friendship, and unforgettable memories.

Comprehension:

Read the passage carefully and select the most suitable option for each of the given questions.
Time is one of life's most precious resources. Unlike money, once time passes, it cannot be regained. Many students understand this only when exams approach, and regret not using time wisely. Wise people create daily routines and follow schedules to make the best use of their day. Setting priorities helps avoid last-minute panic and stress. Even small tasks, if done on time, can prevent bigger problems later. Successful people often share that managing time properly is the secret behind their achievements. Learning to respect time not only helps in studies but also builds discipline for life. In the end, it's not about how much time we have, but how well we use it. Developing time management skills early can make future challenges easier to handle. It also creates a sense of satisfaction and reduces anxiety. Ultimately, valuing time shapes not only our academic journey but our entire life's path.

Comprehension:

Read the given passage carefully and select the most suitable option for each of the given questions.

In our busy lives, we often forget the value of small acts of kindness. A smile, a helping hand, or a few kind words can make someone's day better. Research shows that people who practise kindness feel happier and less stressed. Even simple gestures, like holding the door or offering your seat, can spread positivity. Kindness not only helps others, but also improves our own mental health by reducing negative thoughts. Teachers and parents can encourage young people to be kind by sharing stories and leading by example. In the end, kindness costs nothing but makes the world a friendlier place for everyone. Communities can also organize events to promote kindness and bring people together. Schools can start "kindness clubs" where students share and celebrate good deeds. Ultimately, making kindness a habit can create a ripple effect, inspiring even more people to act thoughtfully each day.

Comprehension:

Read the passage carefully and select the most suitable option for each of the given questions.
Reading books offers more than just entertainment. They introduce us to new ideas, help us understand different cultures, and improve our language skills. Unlike watching videos, reading allows our imagination to fill in details and shapes our thinking. Recent surveys show that students who read regularly tend to score higher in language and writing tests. Reading also helps reduce stress by offering a calm escape from daily worries. While e-books are popular today, many people still prefer the feel of printed books. Developing a reading habit early in life builds focus and patience. Even reading for 20 minutes a day can make a big difference. Schools and parents play an important role by encouraging children to read beyond textbooks. In the end, books remain powerful tools to shape thoughtful and creative minds. Sharing books and discussing them with friends can further deepen understanding and enjoyment. Libraries, both physical and digital, offer countless choices for curious readers. Ultimately, reading enriches not just our knowledge, but our perspective on the world.

Comprehension:

Read the given passage and answer the questions that follow.

The nature of work has undergone significant change in recent decades, largely due to rapid technological advancement. Automation and digital tools have increased efficiency, but they have also altered the skills employers expect from workers. Routine tasks that once required human effort are now often performed by machines, shifting the demand for human resources toward analytical and creative abilities. As a result, lifelong learning has become essential rather than optional.
This transition has not affected all workers equally. While some benefit from flexible schedules and new opportunities, others face job insecurity and the pressure to retrain. Educational institutions therefore play a crucial role in preparing individuals for this evolving landscape by emphasising adaptability, problem-solving, and continuous skill development. In the long run, societies that invest in human capability rather than narrow job training are more likely to manage these changes successfully.

पर्यावरण हमारे जीवन का आधार है। यह हमें शुद्ध वायु, जल और भोजन प्रदान करता है। किंतु आज मानव की बढ़ती आवश्यकताओं और स्वार्थ के कारण पर्यावरण का संतुलन बिगड़ता जा रहा है। जंगलों की अंधाधुंध कटाई, प्रदूषण और प्राकृतिक संसाधनों का अत्यधिक उपयोग पर्यावरण को नुकसान पहुँचा रहे हैं। इसका परिणाम जलवायु परिवर्तन, ग्लोबल वार्मिंग और प्राकृतिक आपदाओं के रूप में सामने आ रहा है। यदि समय रहते हमने पर्यावरण संरक्षण के उपाय नहीं अपनाए, तो आने वाली पीढ़ियों को गंभीर समस्याओं का सामना करना पड़ेगा। हमें पेड़ लगाना, जल का संरक्षण करना और प्रदूषण को कम करने के लिए जागरूक होना चाहिए। पर्यावरण की रक्षा करना प्रत्येक नागरिक का कर्तव्य है, क्योंकि स्वस्थ पर्यावरण के बिना जीवन संभव नहीं है।

हिंदी कथा-साहित्य के इतिहास में मुंशी प्रेमचंद का आगमन युगांतकारी घटना थी। उन्होंने साहित्य को तिलिस्म और ऐयारी की काल्पनिक दुनिया से बाहर निकालकर जीवन की कठोर सच्चाइयों से जोड़ा। प्रेमचंद के लेखन का मूल आधार 'आदर्शोन्मुख यथार्थवाद' है, जहाँ वे समाज की कुरीतियों, निर्धनता और शोषण का नग्न चित्रण तो करते हैं, किंतु अंत में एक नैतिक विजय की ओर संकेत भी करते हैं। 'गोदान' जैसा कालजयी उपन्यास न केवल कृषक जीवन की त्रासदी है, बल्कि यह तत्कालीन सामंती व्यवस्था पर एक तीखा प्रहार भी है। प्रेमचंद ने अपनी कहानियों और उपन्यासों के माध्यम से दलितों, स्त्रियों और शोषित वर्ग की पीड़ा को स्वर दिया। उनकी भाषा अत्यंत सरल, मुहावरेदार और सजीव है, जो सीधे पाठक के हृदय को स्पर्श करती है। उन्होंने 'कलम के सिपाही' के रूप में आजीवन सामाजिक विषमता के विरुद्ध संघर्ष किया। उनके साहित्य का मुख्य उद्देश्य मनोरंजन मात्र नहीं, बल्कि समाज का बौद्धिक और नैतिक परिष्कार करना था।

Comprehension:

Read the given passage and answer the questions that follow.

The Bhakti Movement began in India between the 7th and 17th centuries and brought major social and religious changes. It focused on personal devotion to God rather than rituals or caste. Saints like Kabir, Mirabai, Guru Nanak, and Tulsidas spread messages of love, equality, and simple living. They used local languages like Hindi, Marathi, Tamil, and Telugu to reach common people, making religion more personal and less dependent on priests. The Bhakti saints opposed caste divisions and promoted unity among people of different backgrounds. Their songs and poems encouraged moral values and emotional connection with God. The movement helped reduce the control of rigid religious practices and promoted harmony in a divided society. It also created a strong foundation for future reform movements. By making spirituality accessible and meaningful to ordinary people, the Bhakti Movement had a deep and lasting impact on Indian society.

Read the given passage and answer the questions that follow.

Artificial Intelligence (AI) is changing the world in many ways. It is used in healthcare, education, transport, and customer service. AI helps doctors detect diseases, allows students to learn online, and assists drivers with maps and safety tools. It saves time and improves accuracy. However, AI also has risks. If misused, it can invade privacy, spread false information, or take away jobs. Automated systems can make errors that affect real people. Sometimes, machines may be biased because of the data they are trained on. There is also a fear that powerful AI could be controlled by a few, harming others. To use AI wisely, people need strict rules, better awareness, and human oversight. Like any tool, AI is useful when handled with care and harmful when misused. Society must balance its benefits and dangers to ensure AI helps more than it harms.

प्रयोगवाद शब्द 'प्रयोग' और 'वाद' दो मूल शब्दों के योग से बना है। इस परिप्रेक्ष्य में प्रयोगवाद का अर्थ हुआ ऐसी विचारधारा, जो प्रयोग पर बल देती है। अब यदि प्रयोगवाद को परिभाषित किया जाए, तो ऐसा काव्यांदोलन जो प्रयोग की विचारधारा पर आधारित हो या जिसमें प्रयोग पर जोर दिया गया हो, उसे प्रयोगवाद कहेंगे। यहाँ पर यह प्रश्न सहज ही उठता है कि अज्ञेय आदि तारसप्तक कवियों को प्रयोग की जरूरत क्यों पड़ी? तारसप्तक कवियों के लिए प्रयोग दोहरा साधन है। एक ओर यह सत्य के संधान का साधन है, तो दूसरी ओर उस सत्य को संप्रेषित करने के लिए आवश्यक उपकरणों की तलाश का साधन। स्वयं अज्ञेय ने 'तारसप्तक' की भूमिका में प्रयोग शब्द की व्याख्या करते हुए बतलाया- " जो व्यक्ति का अनुभूत सत्य है, उसे समष्टि तक कैसे उसकी संपूर्णता में पहुँचाया जाए; यह पहली समस्या है जो प्रयोगशीलता को ललकारती है।" इस प्रकार यहाँ पर अज्ञेय प्रयोगशीलता के कारणों की ओर संकेत करते हैं। साथ ही, संपादक होने के नाते 'तारसप्तक' से जुड़े कवियों की समान रचना दृष्टि की और संकेत करते हुए कहते हैं- "इसमें संग्रहित सारे कवि ऐसे हैं जो कविता को प्रयोग का विषय मानते हैं और दावा नहीं करते कि उन्होंने काव्य का सत्य पा लिया है। वास्तव में वे राहों के अन्वेषी हैं।"

Comprehension:

Read the given passage and answer the questions that follow.

India has made progress in promoting gender equality, but many challenges still remain. In cities, more women now go to school, work in offices, and take part in public life. However, in many rural areas, old customs and beliefs still limit what girls and women can do. Women are often paid less than men for doing the same work. They are also less likely to hold leadership positions in offices, schools, or government. At home, even working women are expected to do most of the cooking, cleaning, and childcare. Laws exist to protect women from child marriage and domestic violence, but these are not always enforced properly. Society still expects women to behave in certain ways, while giving men more freedom. Many women are now speaking up and challenging unfair rules. But real gender equality will only happen when people change how they think, not just what the law says.

Comprehension:

Read the passage carefully and answer the questions that follow.
One of the most critically renowned paintings of the 19th-century modernist movement is the French painter Edouard Manet's masterwork, A Bar at the Folies. Originally belonging to the composer Emmanuel Chabrier, it is now in the possession of The Courtauld Gallery in London, where it has also become a favourite with the crowds. The painting is set late at night in a nineteenth-century Parisian nightclub. A barmaid stands alone behind her bar, fitted out in a black bodice that has a frilly white neckline, and with a spray of flowers sitting across her décolletage. She rests her hands on the bar and gazes out forlornly at a point just below the viewer, not quite making eye contact. Also on the bar are some bottles of liquor and a bowl of oranges, but much of the activity in the room takes place in the reflection of a mirror behind the barmaid.

Comprehension:

Read the given passage and answer the questions that follow.

Women played a vital role in India's fight for independence. From leading protests to supporting underground movements, their contribution was both brave and inspiring. Leaders like Sarojini Naidu, Kasturba Gandhi, and Aruna Asaf Ali took part in mass movements such as the Non-Cooperation Movement and the Quit India Movement. Many women also faced imprisonment for speaking out against British rule. They spread patriotic ideas through speeches, writings, and public gatherings. Some, like Rani Lakshmibai and Captain Lakshmi Sehgal, even took up arms in earlier and later phases of the struggle. Despite social restrictions, women from all regions and communities came forward to join the national cause. Their efforts not only helped achieve freedom but also challenged traditional gender roles. The freedom struggle thus became a turning point, showing that women could lead and sacrifice equally with men in shaping India's future.

Comprehension:

Read the passage carefully and answer the questions that follow.
When we talk about how films convey meaning we tend to refer to acting, music, dialogue, props and narrative developments, but often forgotten is the visual essence of a film itself, which is the cutting together of moving images – "motion pictures" – each one carefully tailored to meet a particular need or purpose. Most films and many important scenes within them open with an establishing shot. Typically this shot precedes our introduction to the main characters by presenting us with the locale in which the scene's action or dialogue is about to occur. Occasionally, however, a director will use an establishing shot with another goal in mind. An opening view of a thousand soldiers parading in synchronized fashion might have little to reveal about the film's geography, for example, but it does inform the audience that ideas about discipline and conformity are likely to arise in the material that follows.

Comprehension:

Read the given passage and answer questions that follow.
Bees are often seen as tiny, buzzing insects that flit from flower to flower, but their lives are far more complex than they appear. One of the most remarkable aspects of bee behavior is their ability to communicate through the "waggle dance." When a worker bee finds a rich source of nectar or pollen, it returns to the hive and performs a unique dance. This dance, shaped like a figure-eight, tells the other bees exactly where to go. The angle of the waggle in relation to the sun shows the direction, while the length of the waggle indicates the distance. This discovery amazed scientists, as it suggests a form of symbolic communication in insects. Bees are also vital for pollination, which supports global food production. However, bee populations are declining due to pesticides, disease, and habitat destruction. Protecting bees is essential for preserving biodiversity and maintaining the balance of our ecosystems.

Comprehension:

Read the passage carefully and select the most suitable option for each of the given questions.
Village life offers a rhythm and simplicity that modern urban living often lacks. Surrounded by nature and free from the noise of crowded cities, villages provide a peaceful environment that nurtures both physical and mental well-being. Most villagers lead lives closely connected to the land, engaging in agriculture, dairy farming, or craft-based occupations. Daily routines are shaped by natural cycles rather than mechanical schedules. One of the key strengths of village life lies in its sense of community. People tend to know each other personally, offering support during times of need. Traditional values such as cooperation, hospitality, and respect for elders are still deeply rooted in rural areas.
However, village life also has its limitations. Access to healthcare, education, and employment opportunities is often restricted. Yet, with the growth of rural development programs and better connectivity, many villages are slowly transforming while striving to preserve their cultural heritage. In essence, village life represents a blend of simplicity and resilience—a lifestyle that values relationships, nature, and traditions over speed and materialism.

गर्मियों में आम, जामुन, लीची, कटहल, बेल न जाने कितने फल आते हैं। उन मीठे फलों में महुआ की क्या बिसात। महुआ का नाम लेते ही जंगल याद आ जाते हैं। महुआ जंगलों में ही नहीं, हमारे घर के आसपास और बगीचे में भी लगाए जाते हैं, परंतु शहरों में ढूँढ़े से ही शायद कहीं मिलता हो। पिछले सप्ताह रात्रि की ट्रेन से नई दिल्ली से इलाहाबाद जा रही थी। सुबह-सुबह आँख खुली। सूर्योदय होने ही वाला था। गाड़ी अपनी रफ्तार में थी; पर रेलवे लाइन से थोड़ी दूर पर वृक्षों के नीचे खड़ी लड़कियों और इक्की-दुक्की महिलाओं पर नजर ठहर गई। वे पड़े के नीचे झुककर कुछ चुन रही थीं। मेरे मुँह से निकला- "ये लड़कियाँ क्या कर रही हैं?" मेरे पति ने कहा, "महुआ बिन रही हैं।" पेड़ों के नीचे टपके महुआ के असंख्य कोमल-कोमल रसभरे हलके रंग (ऑफ व्हाइट) के फूल न दिखते हुए भी दिख गए। मेरी स्मृति में बसा दृश्य सामने आ गया। रात भर महुआ के फूल पेड़ के नीचे टपकते हैं। यदि कोई उस पेड़ के पास सोया हो, उसके टपकने की भीनी-भीनी मधुर आवाज भी सुनाई पड़ती है।

योग आध्यात्मिक, शारीरिक और मानसिक प्रक्रियाओं का एक समूह है जिसकी उत्पत्ति प्राचीन भारत में हुई थी। योग का शाब्दिक अर्थ है- जोड़ना। योग शारीरिक व्यायाम, शारीरिक मुद्रा (आसन), ध्यान, सांस लेने की तकनीकों और व्यायाम को जोड़ता है।
यह सार्वभौमिक चेतना के साथ व्यक्तिगत चेतना के मिलन का भी प्रतीक है, जो मन और शरीर, मानव और प्रकृति के बीच एक पूर्ण सामंजस्य का संकेत देता है। योग के अभ्यास का उल्लेख ऋग्वेद और उपनिषदों में भी मिलता है। पतंजलि का योगसूत्र, शास्त्रीय योग दर्शन का एक मूलभूत ग्रंथ माना जाता है।
आधुनिक समय के दौरान और विशेष रूप से पश्चिम में, योग को बड़े पैमाने पर शारीरिक व्यायाम के साथ-साथ ध्यान और मुद्राओं के रुप में अपनाया जा रहा है। हालांकि, योग का उद्देश्य स्वस्थ मन और शरीर से परे है।
योग, हिंदू दर्शन के षड्दर्शन (छः दर्शन) में से एक है। ये 6 दर्शन – सांख्य, योग, न्याय, वैशेषिक, मीमांसा और वेदान्त के नाम से जाने जाते हैं। इन दर्शनों के प्रणेता पतंजलि, गौतम, कणाद, कपिल, जैमिनी और बादरायण माने जाते हैं।

AI tools support students with personalized lessons and assist teachers in planning and assessment. UNESCO believes AI should promote inclusion and equity so every learner benefits. However, rapid technological growth also brings risks. If not guided properly, AI may increase inequality between countries and communities instead of reducing it.

UNESCO supports a human-centred approach to AI in education. This means technology should serve people, not replace them. The goal of "AI for all" is to ensure everyone can access knowledge and innovation. Policymakers must understand both the opportunities and challenges AI creates in schools and universities.

UNESCO has developed guidelines and competency frameworks for students and teachers. These resources help education systems prepare responsibly for the AI era. Protecting human values and equal opportunities is vital to ensure technology benefits society.

भारत जैसे विकासशील देश में जन कल्याणकारी केंद्रों की भूमिका अत्यंत महत्वपूर्ण है। ये केंद्र समाज के कमजोर, पिछड़े, निर्धन और जरूरतमंद वर्गों के लिए विभिन्न योजनाओं के माध्यम से सहायता प्रदान करते हैं। इनमें स्वास्थ्य सेवाएँ, शिक्षा, रोजगार, वृद्धावस्था पेंशन, महिलाओं और बच्चों के लिए विशेष सुविधाएँ शामिल होती हैं। सरकार द्वारा चलाए जा रहे ये केंद्र समाज के संतुलित और समग्र विकास में योगदान देते हैं।
दूसरी ओर, बाल अपराध की समस्या आज गंभीर रूप ले चुकी है। जब किसी बच्चे द्वारा कोई कानून-विरोधी या समाज विरोधी कार्य किया जाता है तो उसे किशोर अपराध या बाल अपराध कहते हैं।आधुनिक जीवनशैली, सामाजिक असमानता, गरीबी, अशिक्षा, पारिवारिक तनाव तथा इंटरनेट और मीडिया का दुष्प्रभाव इसके मुख्य कारण हैं। किशोर अवस्था में भावनात्मक असंतुलन के कारण कई बार बच्चे गलत संगत में पड़ जाते हैं और अपराध की ओर अग्रसर हो जाते हैं। इस समस्या का समाधान केवल कठोर दंड से नहीं, बल्कि बच्चों को सही दिशा, शिक्षा, मार्गदर्शन और सहयोग देने से हो सकता है। जन कल्याणकारी केंद्र इस दिशा में भी महत्त्वपूर्ण भूमिका निभा सकते हैं, यदि वे बच्चों के मानसिक, सामाजिक और नैतिक विकास पर विशेष ध्यान दें।

Comprehension:

Read the given passage carefully and answer the questions that follow.

Democracy presupposes inclusion of all and absence of discrimination. Therefore, one pointer to such criteria could be the common good. It is at least theoretically possible to refer all decisions to the greater common good, if we are in possession of such a commodity. However, it is no mean task to manufacture a notion of common good in a multicultural society where the moral and social values of different groups and communities may be at variance with each other, where economic interests of different groups and communities may be in conflict with each other. That is where rational public discourse comes into picture. Understanding each other's positions, articulating what one's cherished way of life is, accommodating the view of others and arguing for space for one's own lifestyle; demands a conversation tempered with concern for the other and guided by reason. The common good need not be seen as a timeless, fixed golden principle.

Before arriving at university, students will have been powerfully influenced by their school's approach to learning particular subjects. Yet this is only rarely taken into account by teachers in higher education, according to new research carried out at Nottingham University, which could explain why so many students experience problems making the transition. Historian Alan Booth says there is a growing feeling on both sides of the Atlantic that the shift from school to university-style learning could be vastly improved. But little consensus exists about who or what is at fault when the students cannot cope. "School teachers commonly blame the poor quality of university teaching, citing factors such as large first-year lectures, the widespread use of inexperienced postgraduate tutors and the general lack of concern for students in an environment where research is dominant in career progression," Dr Booth said. Many tutors say A-level history promotes passivity and leaves students unprepared for university.

प्रसाद जी अपने युग की राष्ट्रीय भावनाओं को प्रतिबिम्बित करते थे, पर उनका इतिहास-बोध सिर्फ भावनात्मक नहीं था। भारतीय इतिहास का उनका ज्ञान बहुत गहरा था और उसके बारे में अपनी निर्मोह सत्यबोधक दृष्टि के चलते उनकी विचारणा बहुत मौलिक और स्वतन्त्र थी। इस मामले में वे 'प्रियं ब्रूयात्' के कतई कायल नहीं थे। वास्तविकता यह है कि लोकप्रिय भावनाओं का इस्तेमाल उन्होंने अपनी उस बेहद आत्मालोचनापूर्ण दृष्टि को प्रस्तुत करने के लिए ही किया। वे भारतीय जीवन ही नहीं, भारतीय आचरण के भी प्रखर द्रष्टा आलोचक थे। उनके नाटकों में हमें इतिहास का गौरव ही नहीं, उसकी कुण्ठा, त्रास और ऊब का भी उतना ही हिलाने वाला साक्षात्कार मिलता है। उनके नाटकों की दुनिया में जो उथल-पुथल और हाहाकार है, वह सिर्फ घटना-चक्र में ही नहीं उनके पात्रों के अन्तर्जीवन में भी है। उनके नाटकों में चरित्र अक्सर चरित्र से ज्यादा मनोवैज्ञानिक वृत्तियों और शक्तियों का प्रतिनिधित्व करने लगते हैं। यही वह सदाबहार, सदा प्रासंगिक जीवन है जो उनके नाट्य-लेखन की असली प्रेरणा है न कि एक तथाकथित अतीत के तथाकथित प्रसिद्ध नायक-नायिकाएं।

Comprehension:

Read the given passage carefully and answer the questions that follow:
In a small village between two mountains lived Elara, a wise woman known for her knowledge of herbs and healing. People from nearby towns traveled to seek her advice. Behind her cottage, Elara tended a garden filled with medicinal plants, speaking to them as if they were her children. One day, a girl named Lila came to Elara with a heavy heart—her mother was ill, and doctors couldn't help. Elara led Lila to her garden, picking leaves from a plant with delicate flowers. She instructed Lila to boil the leaves and give the remedy to her mother. Miraculously, Lila's mother recovered. The village rejoiced, and Elara's reputation as a healer grew even more. Elara believed nature held cures for all ailments and often said, "If we listen carefully, nature will always tell us what we need to know."

Comprehension:

Read the given passage and answer the questions that follow:

Trilobites are among the most important early animals. These fascinating creatures lived in the ocean and belonged to a massive group of animals called arthropods. Their exoskeleton was divided from front to back into cephalon, thorax and pygidium. It was also divided from side-to-side into a central axis, with two side regions (lobes) called pleurae. The word 'trilobite' refers to this side-to-side partition, rather than the cephalon, thorax, and pygidium. The head, called the cephalon, had a central area (glabella) flanked by separate cheek sections. Some trilobites even sported spiky corners on their heads. The middle section, called the thorax, was made up of segments, allowing them to curl up for protection just like a pill bug. The number of segments in the thorax varied depending on the trilobite species. Finally, the tail (pygidium) also had segments, but these were fused together for a more solid structure.200

Read the given passage and answer the questions that follow:

Trilobites are among the most important early animals. These fascinating creatures lived in the ocean and belonged to a massive group of animals called arthropods. Their exoskeleton was divided from front to back into cephalon, thorax and pygidium. It was also divided from side-to-side into a central axis, with two side regions (lobes) called pleurae. The word 'trilobite' refers to this side-to-side partition, rather than the cephalon, thorax, and pygidium. The head, called the cephalon, had a central area (glabella) flanked by separate cheek sections. Some trilobites even sported spiky corners on their heads. The middle section, called the thorax, was made up of segments, allowing them to curl up for protection just like a pill bug. The number of segments in the thorax varied depending on the trilobite species. Finally, the tail (pygidium) also had segments, but these were fused together for a more solid structure.200

Although money is crucial for fulfilling fundamental requirements such as food, shelter, and apparel, it is not the sole factor determining one's quality of life. It helps ensuring security and comfort, enabling individuals to obtain quality education, healthcare, and other essentials. However, possessing money does not guarantee contentment - frequently originating from non-material factors like personal fulfilment, experiences, and relationships. For example, the pleasure and gratification can be derived from spending time with family and friends, pursuing interests, and attaining personal objectives. Too much emphasis on financial matters can result in undesirable competition and tension. To attain prosperity, individuals often disregard their health or relationships. Therefore, money is not the sole determinant of a comfortable existence. Balance between material and non-material aspects of existence is crucial. Love, friendship, and a sense of purpose are priceless and cannot be purchased with money; they are essential components of true wealth.

Comprehension:

Read the passage given below and answer the questions that follow.
A humorous new "sports competition" has been imagined for bus passengers. One may ask where commuters find time for sports, but the answer is simple: boarding a crowded bus itself feels like a game. An endurance prize could be awarded to the passenger who waits the longest at a stop without complaining. In contrast, the rush competition would reward the person who reaches the bus first when it halts a little away from the regular stop. When two buses of the same route arrive and try to bypass each other, passengers running back and forth create a scene resembling musical chairs. The struggle between those trying to get off and others pushing to get in is like a tug of war. Finally, a benevolence prize would honour the passenger who helps a mother with a baby or assists an elderly traveller by holding their luggage, showing kindness amid the chaos

Comprehension:

Read the following passage and answer the questions given below.
At sunrise, the ruins of Hampi glowed in soft amber light as Arjun walked along the silent stone corridors. Scattered across a rugged landscape of boulders and scrub, the site once formed the thriving capital of the Vijayanagara Empire, which flourished between the fourteenth and sixteenth centuries. Grand temples, market streets, and water tanks reveal a sophisticated urban system that supported trade, religion, and daily life. Today, the region attracts historians, pilgrims, and travelers, while nearby villages depend on tourism and small-scale farming. However, unregulated construction, visitor pressure, and weathering threaten fragile monuments. Arjun, documenting heritage management practices, noted how controlled pathways and community stewardship could reduce damage. As the sun climbed higher over the rocky hills, he realized that conserving historical landscapes preserves cultural memory and sustains local economies in an increasingly fast-changing world, ensuring heritage endures responsibly for generations to come.

Comprehension:

Read the following passage and answer the questions given below.
Trusting yourself is a vital component to living and achieving success.... from the inside out. You have within you an inner compass -- your internal guidance system -- also known as your instincts, intuition, or gut feelings. It's the greatest tool you have, and it doesn't cost you anything. It's free and is always accessible because you carry it within you at all times. You have all the answers inside you. However, you may often ignore the guidance you're given and go against what you instinctively know is right for you. Perhaps you're nodding your head right now, and that's okay. Because the best way to learn how to consistently trust yourself is through what you learn when you don't trust yourself and through your successes when you do.
Your inner compass -- your internal guidance system -- is always giving you directions on how to proceed. The more you trust yourself, the easier your life will flow. You'll stay on course for what's right for you, and you'll experience more joy, satisfaction, and fulfillment.

Comprehension:

Read the passage carefully and answer the following questions.
People who live in cities and towns often believe that they have little or no connection with forests because forests are usually located far away from urban areas. However, this belief is mistaken, as both urban and rural populations are deeply dependent on forests in their daily lives. Forests provide timber, which is essentially wood used for constructing houses, railway sleepers, train compartments, bullock carts, boats, ships, ploughs, and for making paper and many other essential items. In villages, wood continues to be an important source of fuel for cooking meals. In earlier times, people did not worry about shortages of wood because forests were abundant. Unfortunately, indiscriminate and thoughtless cutting of trees has led to serious problems such as scarcity of firewood, soil erosion, and the loss of soil fertility, making productive land barren. These challenges can be addressed through intensive tree plantation programmes and by developing a strong sense of 'tree consciousness' among rural communities, ensuring sustainable use of forest resources for future generations.

People who live in cities and towns often believe that they have little or no connection with forests because forests are usually located far away from urban areas. However, this belief is mistaken, as both urban and rural populations are deeply dependent on forests in their daily lives. Forests provide timber, which is essentially wood used for constructing houses, railway sleepers, train compartments, bullock carts, boats, ships, ploughs, and for making paper and many other essential items. In villages, wood continues to be an important source of fuel for cooking meals. In earlier times, people did not worry about shortages of wood because forests were abundant. Unfortunately, indiscriminate and thoughtless cutting of trees has led to serious problems such as scarcity of firewood, soil erosion, and the loss of soil fertility, making productive land barren. These challenges can be addressed through intensive tree plantation programmes and by developing a strong sense of 'tree consciousness' among rural communities, ensuring sustainable use of forest resources for future generations.

Comprehension:

Read the passage carefully and answer the questions that follow.
How many really suffer as a result of labor market problems? This is one of the most critical yet contentious social policy questions. In many ways, our social statistics exaggerate the degree of hardship. Unemployment does not have the same dire consequences today as it did in the 1930's when most of the unemployed were primary breadwinners, when income and earnings were usually much closer to the margin of subsistence, and when there were no countervailing social programs for those failing in the labor market. Increasing affluence, the rise of families with more than one wage earner, the growing predominance of secondary earners among the unemployed, and improved social welfare protection have unquestionably mitigated the consequences of joblessness. Earnings and income data also overstate the dimensions of hardship. Among the millions with hourly earnings at or below the minimum wage level, the overwhelming majority are from multiple-earner, relatively affluent families.

कर्म की शक्ति अपार होती है। व्यक्ति का भविष्य उसके कर्मों पर निर्भर करता है। अच्छे कर्म व्यक्ति को सफलता, सम्मान और आत्मसंतोष प्रदान करते हैं, जबकि बुरे कर्म उसे दुख, पश्चाताप और असफलता की ओर ले जाते हैं। हमारे धर्मग्रंथों में भी कहा गया है –"कर्मण्येवाधिकारस्ते मा फलेषु कदाचन" –अर्थात् मनुष्य का अधिकार केवल कर्म करने में है, फल पर नहीं। जो व्यक्ति ईमानदारी से अपने कर्तव्यों का पालन करता है, वह जीवन में अवश्य सफल होता है। कर्म ही व्यक्ति की पहचान बनाते हैं। एक किसान, एक शिक्षक, एक सैनिक – सभी अपने-अपने कर्मों द्वारा समाज में योगदान देते हैं। कर्मशील व्यक्ति कभी भाग्य के भरोसे नहीं बैठता, बल्कि अपने पुरुषार्थ से भाग्य को बदल देता है।
कभी-कभी परिश्रम का फल तुरंत नहीं मिलता, परंतु सही समय पर उसका परिणाम अवश्य मिलता है। इसलिए निरंतर प्रयास करते रहना ही सच्चा धर्म है। कर्म की शक्ति से व्यक्ति न केवल स्वयं का जीवन बेहतर बना सकता है, बल्कि समाज और देश की उन्नति में भी योगदान दे सकता है। यही कर्म की सच्ची महिमा है।

Comprehension:

Read the passage carefully and answer the questions that follow.
Deglaciation, the retreat and disappearance of glaciers worldwide, serves as a visible indicator of climate change with consequences extending far beyond mountain regions. Alpine glaciers, which have persisted for millennia, are shrinking rapidly, with some projections suggesting complete disappearance within decades. These ice masses regulate river flows in downstream regions, releasing meltwater gradually through summer months when precipitation is scarce. Communities and agriculture dependent on this reliable water supply face uncertain futures as glaciers diminish. The loss of reflective ice surfaces reduces Earth's albedo, meaning more solar radiation is absorbed rather than reflected back into space, creating another positive feedback loop accelerating warming. Glacial lakes forming behind unstable moraine dams pose flood risks to downstream populations. Tourism economies built around glacial landscapes confront the loss of their primary attractions. Furthermore, deglaciation reveals landscapes unseen for thousands of years, exposing archaeological artifacts and, to the concern of scientists, potentially viable ancient microorganisms.

This lively event showcases a rich tapestry of artistic expression, ranging from traditional paintings and folk crafts to contemporary installations and digital media displays. Streets transform into open-air galleries where murals, sculptures, and creative exhibits capture the imagination of passersby. Street performers captivate audiences with music, dance, and theatrical acts, while interactive workshops and seminars offer valuable learning opportunities for aspiring artists and students. Visitors can observe live demonstrations, engage with creators, and explore diverse artistic techniques. The festival not only celebrates the diversity of global art but also promotes cultural exchange and mutual understanding among communities. Families stroll through colourful stalls, tasting international cuisine and experiencing cultures through art, music, and storytelling. The Elmsford Art and Culture Festival stands as a testament to the unifying power of creativity and the shared human experience.

राष्ट्रीय प्रतीक अशोक स्तंभ में देखा जा सकता है कि चार एशियाई शेर अपना पिछला हिस्सा जोड़कर चार दिशाओं में एक साथ खड़े हैं। यह न सिर्फ देश की सभी राष्ट्रीय ताकतों के एकजुट होकर भारतीय महाशक्ति बनने का स्वप्न है, बल्कि ये चार शेर, चार चीजों-ताकत, साहस, स्वाभिमान और आत्मविश्वास की ओर भी संकेत करते हैं। समग्रतः संदेश यह है कि अपनी विशिष्ट भावनाओं के बावजूद चारों दिशाओं में एक समान सौहार्द का विस्तार करो। रेशमी कपड़े पर तिरंगे के रंग चटक होते गए हैं, पर सोचा जा सकता है कि उन रंगों का अर्थ धुंधला हुआ है या निखरा है। दुनिया के 93 प्रतिशत देश स्वाधीनता दिवस मनाते हैं, क्योंकि वे गुलाम थे। सात प्रतिशत देश नहीं मनाते, क्योंकि वे गुलाम नहीं थे। इन सात प्रतिशत देशों का राष्ट्रीय दिवस वस्तुतः उन देशों में नागरिकता अर्जन का दिवस है।776

Comprehension:

Read the passage and answer the questions that follow.
The butterfly effect is a concept from chaos theory showing how small changes in initial conditions can lead to very different outcomes. The term was popularized by meteorologist and mathematician Edward Lorenz. He used the example of a butterfly flapping its wings in Brazil that might influence weather events such as a tornado in Texas. The butterfly symbolizes how minor actions can create large and unpredictable consequences over time.
In the early 1960s, Lorenz was developing a computer model to simulate weather patterns. During his research, he discovered that even tiny differences in input data could produce dramatically different results. This finding challenged the traditional belief that future events could be predicted perfectly if the initial conditions were known.
The butterfly effect is relevant in many fields beyond meteorology, including economics and social sciences. It highlights the complexity of systems and reminds us that small actions can grow over time and influence future outcomes.

हमारे लिए विचारणीय यह है कि हम अपने व्यक्तित्व के विकास में विदेशी भाषा को कितना महत्त्व दें और मातृभाषा को कितना। मनुष्य के मानसिक विकास का और भाषा का अटूट रिश्ता है। बच्चे का मस्तिष्क ज्यों-ज्यों विकसित होता जाता है उसके समानांतर ही भाषा भी विकसित होती जाती है। वह भाषा उस बच्चे के रोने-हँसने, सपना देखने, कल्पना करने, तर्क-वितर्क करने का ऐसा माध्यम बन जाती है कि वह उस भाषा से परे होकर एक भावनाशील एवं चिंतनशील व्यक्ति के रूप में जी ही नहीं सकता। अतः न केवल मानव विकास में बल्कि मानवीय व्यक्तित्व की संपूर्ण अभिव्यक्ति में भाषा की अविभाज्य भूमिका है। इसलिए दुनियाभर के शिक्षाशास्त्रियों, भाषाशास्त्रियों और मनोवैज्ञानिकों ने व्यक्ति की अपनी भाषा को अन्य सब भाषाओं में सबसे ऊपर माना है। वह भाषा कोई भी हो सकती है, लेकिन यदि वह बचपन में, जबकि मानव मस्तिष्क का अधिकांश आधारभूत विकास हो रहा होता है, संगिनी रही है तो जीवन भर उसके मन-मस्तिष्क को सहज रूप से कार्य करने देने में भी वही सहयोगी होगी।758

Comprehension:

Read the following passage carefully and answer the questions that follows

It was a bitterly cold night, and even at the far end of the bus the east wind that raved along the street cut like a knife. The bus stopped and two women and a man got in together and filled the vacant places. The young woman was dressed in sealskin, and carried one of those little Pekinese dogs that women in sealskin like to carry in their laps. The conductor came in and took the fares. Then his eyes rested with old malice on the beady eyed toy dog. I saw trouble brewing. This was the opportunity for which he had been waiting and he intended to make the most of it. I had marked him as the type of what Mr. Wells has called the Resentful Employee, the man with a great vague grievance against everything and a particular grievance against passengers who came and sat in his seat while he shivered at the door.

Comprehension:

Read the given passage carefully and answer the questions that follow:

Colin Firth's iconic shirt, which captivated millions during the television adaptation of *Pride and Prejudice*, went up for auction on March 5 in London, drawing significant interest. The shirt, now dry yet rich with nostalgic appeal, fetched an impressive £25,000. In the unforgettable scene that helped cement its status, Firth, portraying the brooding Mr. Darcy, emerges from a lake in a damp, clinging white shirt, igniting a collective swoon among audiences. Though this moment wasn't originally written by Jane Austen, it became one of television's most memorable scenes and a cultural phenomenon. The scene's impact extended beyond the show, influencing subsequent adaptations and discussions about Austen's characters. The shirt itself became a symbol of Darcy's allure and the magnetic chemistry between Firth and the role, capturing the public's imagination and solidifying its place in television history as a moment of unexpected romance and charm.
