Comprehension:

Read the following passage carefully and answer the questions that follow.

In an age dominated by instant messaging and rapid-fire emails, the art of handwritten letter writing is slowly fading into obscurity. Once a cherished form of personal and thoughtful communication, letters carried the weight of emotion, deliberate word choice, and the quiet rhythm of reflection. A handwritten note could evoke intimacy and nostalgia, standing as a testament to the time and effort invested by the sender. Unlike fleeting digital messages, letters had a sense of permanence—they could be re-read, preserved, and even treasured across generations. This tangible form of expression also cultivated patience, both in writing and receiving. Today, while efficiency has overtaken elegance, the decline of letter writing represents more than just technological advancement—it signals a subtle shift in how we value depth, time, and emotional investment. In losing the habit of writing letters, are we also losing something of ourselves?

Comprehension:

Read the given passage and answer questions that follow.

Have you ever played with your shadow on a sunny day? It's one of the most interesting things around us! A shadow is made when something blocks the light. When you stand in sunlight, your body blocks the light and makes a dark shape on the ground. That's your shadow! What makes it so fun is how it moves with you. Try jumping—your shadow jumps too! Wave your hand, and your shadow waves back. But shadows can be sneaky too. In the morning, they are long. At noon, they become short. In the evening, they stretch again. Some children make shadow puppets using a torch and their hands. You can make birds, dogs, and even dragons! Shadows are like silent friends who copy everything you do. Isn't that fun and amazing? Next time you go outside, don't forget to say hello to your shadow!

Launched in 1977, Voyager 1 is the most distant human-made object in space, now soaring beyond the boundaries of our solar system in interstellar space. Originally designed to study the outer planets, the spacecraft provided groundbreaking images and data on Jupiter and Saturn before continuing on its indefinite journey through the cosmos. Its most famous legacy, however, may be the Golden Record—a 12-inch gold-plated disc containing sounds and images from Earth: greetings in 55 languages, music from different cultures, and photographs of life on our planet. The brainchild of Carl Sagan and his team, this interstellar mixtape was created as a time capsule—a message to any potential extraterrestrial life that might one day find it. Despite its staggering distance from Earth, Voyager 1 still communicates faint signals back to NASA's Deep Space Network, a testament to human ingenuity and curiosity. It carries no passengers, no fuel for return, only our hope and wonder, etched in gold, hurtling through eternity.

Read the following passage and answer the questions given below.

Noise pollution has significant effects on both animals and the environment. For animals, it disrupts essential behaviours such as feeding, communication, mating, and migration. Many animals rely on sound to attract mates, defend territory, and locate prey. When noise interferes with these abilities, it can reduce reproductive success and lead to population declines. Birds may struggle to hear mating calls, while marine animals like whales and dolphins are particularly vulnerable to noise from ships, sonar, or seismic surveys. These disruptions can cause stress, hearing loss, behavioural changes, and in extreme cases, even death. Feeding is also affected, as animals that use sound to hunt may find it harder to detect prey, leading to increased competition for limited food resources. Noise can also alter migration routes, changing population distribution.
The environment is similarly impacted. High noise levels can reduce plant growth and diversity by interfering with photosynthesis and nutrient uptake, leading to changes in plant community structures. Soil quality suffers when loud noise causes compaction, reducing air and water flow and decreasing fertility. Aquatic environments are also affected, as noise disrupts the natural behaviours of aquatic organisms, affecting their ability to feed and reproduce. Overall, noise pollution harms biodiversity and disturbs ecosystem balance.

Comprehension:

Read the given passage and answer the questions that follow.

Organic farming is a method of agriculture that avoids chemical fertilizers and pesticides. Instead, it uses natural methods like composting, crop rotation, and biological pest control. This approach improves soil health, conserves water and protects biodiversity. Organic foods are often fresher and contain fewer harmful residues. Many farmers are turning to organic practices to reduce their environmental impact and meet growing demand for healthy food. In India, organic farming is gaining popularity, especially in states like Sikkim and Uttarakhand. Though the initial cost can be higher, the long-term benefits include better yields, improved health, and sustainable land use. Consumers are also more aware of what they eat and are willing to pay more for organic produce. Government schemes and training programmes now support farmers who want to shift to this method. As awareness increases, organic farming offers a healthier path for both people and the planet.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Climate change is mainly caused by the burning of fossil fuels like coal, oil, and gas. These activities release greenhouse gases into the atmosphere, which trap heat and lead to rising global temperatures. As the earth warms, many weather patterns are becoming more extreme and unpredictable.

One major consequence of climate change is the increase in natural disasters. Higher temperatures cause more heatwaves and droughts, leading to wildfires and water shortages. Warmer oceans add energy to storms, making hurricanes and floods stronger and more damaging. These changes harm people, destroy homes, and damage crops.

Another serious impact is rising sea levels, caused by melting glaciers and expanding warm water. Low-lying cities and islands are already facing floods, damaging buildings and roads. Poorer communities suffer the most because they lack resources to recover or adapt. As temperatures continue to rise, these results are expected to worsen, making it urgent to take global action now.

मानव जीवन में लक्ष्य निर्धारण उतना ही आवश्यक है जितना यात्री के लिए नक्शा। लक्ष्य के बिना प्रयास बहुत बार व्यर्थ सिद्ध होता है। महात्मा गांधी ने स्वतंत्र भारत का लक्ष्य रखा और अहिंसा से उसे साकार किया। उनके जीवन से सीख मिलती है कि दृढ़ लक्ष्य असंभव को संभव बनाता है। लक्ष्य चुनते समय अपनी रुचि, क्षमता और संसाधनों पर विचार करना चाहिए। लघु-अवधि और दीर्घ-अवधि दोनों प्रकार से लक्ष्य बनाए जा सकते हैं। जैसे विघ्न आने पर सकारात्मक दृष्टिकोण अपनाना समस्या को जल्दी हल करता है वैसे ही निरंतर प्रयास और आत्म-अनुशासन से लक्ष्य निश्चित रूप से प्राप्त होता है। लक्ष्य निर्धारण से आत्मविश्वास बढ़ता है और जीवन अर्थपूर्ण बनता है। बिना लक्ष्य के जीवन नीरस प्रतीत होता है। लक्ष्य प्राप्ति के लिए प्रगति का दैनिक लेखा-जोखा रखा जाना चाहिए। ऐसे में सफल व्यक्तियों की कहानियां पढ़कर भी प्रेरणा ली जा सकती है। लक्ष्य युवाओं के भविष्य का शिल्पकार है, उन्हें दृढ़ता से अपने हृदय में रखें और अग्रसर हों।

Comprehension:

Read the given passage carefully and answer the questions that follows.

Among the greatest unresolved mysteries of early human civilization is the undeciphered script of the Indus Valley, a Bronze Age society that flourished around 2600 BCE in what is now Pakistan and northwestern India. Despite the discovery of over 4,000 inscribed objects—from seals to pottery fragments—the symbols remain resistant to interpretation. Unlike Mesopotamian cuneiform or Egyptian hieroglyphs, which benefited from bilingual inscriptions like the Rosetta Stone, the Indus script has no known linguistic parallel or translation key. The brevity of the inscriptions, often consisting of fewer than five characters, further complicates efforts. Some scholars even question whether the symbols constitute a fully developed writing system or are instead proto-literate markers denoting clan, trade, or ritual information. The civilization's sudden decline, coupled with its script's silence, leaves historians with tantalizing fragments of a lost world—organized, technologically advanced, yet enigmatic in voice. Until a breakthrough occurs, the Indus script stands as both a symbol of human ingenuity and the limits of our understanding.

Comprehension:

Read the following passage carefully and answer the questions given below.

Occasional shopping can be healthy, but overspending on items outside your budget, especially on credit, may have long-term consequences despite the immediate mood boost. Compulsive shopping can affect even those with disposable income, creating conflicts with personal values, relationships, and leading to lingering sadness. Retail therapy, or compulsive shopping (oniomania), is not actual mental health treatment but can become a psychological dependence. People may shop to relieve feelings of anxiety, depression, or shame, and the act of making purchases can give a false sense of control. Although shopping may offer temporary pleasure, it can fuel an unhealthy cycle. To reduce compulsive spending, it's important to recognize your triggers and moods that prompt shopping urges. For example, if boredom leads to online shopping, try low-cost hobbies like journaling or reading, which have proven mental health benefits. If you shop to improve your mood after a bad day, consider alternatives like going for a walk, dancing, or exercising to boost dopamine levels in a healthier way. Identifying and replacing unhealthy spending habits with positive activities can help you manage emotions without financial consequences.

निम्नलिखित गद्यांश को ध्यानपूर्वक पढ़कर पूछे गये प्रश्नों के सही उत्तर दीजिए।

राष्ट्र धर्म और नागरिक कर्तव्य एक सिक्के के दो पहलू हैं। राष्ट्र की उन्नति उस देश के नागरिकों के कर्तव्यबोध पर अवलंबित है।
राष्ट्र केवल भौगोलिक सीमाओं तक सीमित नहीं, अपितु 'सम-धर्म-भाव' की व्यापक संकल्पना है, जो समानता की भावना पर आधारित है।यह भावना विश्व को एक सूत्र में बांधती है और राष्ट्रों की सीमाओं को मिटा देती है।

वास्तविक राष्ट्रवाद विश्व के सभी राष्ट्रों द्वारा एक-दूसरे के नागरिकों एवं संस्कृति का समान आदर करना है।
कर्तव्य चेतना के अभाव में राष्ट्र महत्वाकांक्षाओं के टकराव में उलझ जाते हैं। अधिकारों की अंधी दौड़ युद्धों का कारण बनती है, जैसा कि इतिहास गवाह है।द्वितीय विश्व युद्ध जैसी विभीषिकाएँ इसी कर्तव्य विमुखता का परिणाम हैं।

आज आवश्यकता है समग्र मानवता के प्रति कर्तव्यनिष्ठा की।
जब प्रत्येक नागरिक अपने राष्ट्र के साथ विश्व मानवता के प्रति उत्तरदायी बनेगा, तभी सच्ची शांति स्थापित होगी।राष्ट्र धर्म का पालन व्यक्तिगत कर्तव्य से प्रारंभ होता है, जो वैश्विक एकता की ओर ले जाता है। इस भावना से ही विश्व एक परिवार बन सकता है।

Comprehension:

Read the passage given below and answer the questions that follow.

History helps us grasp how the world changes. By studying historical transitions, we learn what shaped our current society and what could influence future developments. The American civil rights movement, for instance, shows how people can unite to challenge oppression, while the fall of Rome reminds us that even powerful societies can collapse under certain pressures. History also teaches us to learn from past mistakes. Examining wars reveals how conflicts escalate and what decisions by leaders lead to positive or negative outcomes. Patterns in history, like signs of genocide or failures to address crises, can help us recognize and prevent similar disasters today, making us more informed and responsible citizens. Additionally, history gives us context for our own experiences. When COVID-19 struck, few remembered the 1918 flu pandemic, yet historians quickly drew parallels to warn about the dangers of a second wave and the importance of precautions. By understanding the struggles and triumphs of those before us, we see repeating patterns and find comfort in knowing that humanity has faced—and overcome—similar challenges before. In essence, history equips us with the insight to understand change, learn from errors, and navigate our present with a deeper awareness of the human experience.

Comprehension:

Read the passage given below and answer the questions that follow.

History helps us grasp how the world changes. By studying historical transitions, we learn what shaped our current society and what could influence future developments. The American civil rights movement, for instance, shows how people can unite to challenge oppression, while the fall of Rome reminds us that even powerful societies can collapse under certain pressures. History also teaches us to learn from past mistakes. Examining wars reveals how conflicts escalate and what decisions by leaders lead to positive or negative outcomes. Patterns in history, like signs of genocide or failures to address crises, can help us recognize and prevent similar disasters today, making us more informed and responsible citizens. Additionally, history gives us context for our own experiences. Comprehension:

Read the given passage and answer questions that follow.

For a long time, people have wondered if we truly have free will—the power to make our own choices. It feels natural to believe we choose freely, but new research in brain science questions this idea. Some experiments show that our brain may start preparing for a decision even before we are aware of making it. This makes us ask: Are our actions already decided by our brain before we know it? Not everyone agrees with this view. Some say it makes the idea of free will too simple. They believe that even if the brain starts the process, we can still think, reflect, and change our minds. Also, our society, laws, and ideas of right and wrong are based on the belief that people choose their actions and are responsible for them. So, the question is still open. Free will might be real or just an illusion, but it remains a big part of who we are.

मानव जीवन में संतुलन एक अनिवार्य आवश्यकता है। आधुनिक युग की तीव्र गति में व्यक्ति भौतिक सुख, पारिवारिक जीवन, स्वास्थ्य संवर्धन एवं आत्मिक उन्नति के मध्य संतुलन खोजता रहता है। किसी एक पक्ष का प्राधान्य अन्य को दबा देता है, जिससे मानसिक अशांति, शारीरिक दुर्बलता एवं भावनात्मक शोषण उत्पन्न होता है। संतुलित जीवन ही सच्ची प्रगति का मार्ग प्रशस्त करता है। संतुलन का तात्पर्य है शारीरिक, मानसिक, सामाजिक एवं आध्यात्मिक घटकों का समावेशी समन्वय। प्राचीन ग्रंथों में इसे 'समत्व योग' कहा गया है, जहाँ सुख-दुख, लाभ-हानि में समान भाव रहता है। विवेक हृदय को नियंत्रित करता है, कर्म बुद्धि को संचालित करता है तथा त्याग इच्छाओं को वश में करता है। इनका विपरीत असंतुलन विनाश का कारण बनता है। प्रतिदिन ध्यान-अभ्यास, कार्य-विश्राम का विधान, सात्विक भोजन एवं नैतिक मूल्यों का पालन संतुलन लाता है। धैर्य, संयम एवं करुणा से युक्त जीवन ही पूर्णता प्राप्त करता है। अन्ततः संतुलन जीवन का मूलमंत्र है।

Comprehension:

Read the passage given below and answer the questions that follow.

These days, it's common to see preteens and teens constantly on their phones, texting or browsing social media. While social media has benefits like connecting people across distances, it also poses risks for today's youth. Many can't imagine life without the internet, and by age ten, most kids already have cell phones; nearly 40% have social media accounts by eleven. Teens often crave likes and comments on their posts, comparing themselves to unrealistic standards online. This can lead to body image issues, risky behaviours, and a need for validation. Research shows excessive social media use can cause depression, anxiety, and low self-esteem, while also hindering social and communication skills. Kids spend more time online than interacting in person, missing opportunities to read body language and social cues. It can also affect sleep and academics if technology use goes unchecked. Parents can help by researching popular apps, setting technology-free zones and times, and collecting devices before bed. It's important to remember that social media is often a highlight reel. Parents should check in with their children regularly and create a supportive environment where kids feel safe sharing their true feelings.

Comprehension:

Read the following passage and answer the questions given below.

Homework plays a vital role in a child's overall development, helping to build essential life skills that support academic and future career success. Regular homework improves discipline, time management, communication, and independent learning — all of which contribute to better grades and long-term achievements.
Repetition through homework deepens understanding and prepares students for practical, vocational tasks. It also builds time management, as students learn to meet deadlines, prioritize tasks, and solve problems on their own. Moreover, homework creates a bridge between teachers, students, and parents, offering insights into a child's learning style and progress.
Completing assignments at home allows children to work in a familiar, stress-free environment, enhancing focus and retention. Homework also encourages the use of learning resources such as libraries and the internet, helping students build research and analytical skills.
Establishing a regular homework routine builds a revision habit, making exam preparation more effective and less stressful. For children who learn at a slower pace, homework offers extra time to grasp difficult concepts. This additional support at home can greatly boost understanding and performance in tests.
Ultimately, homework is not just a task — it's an investment in a child's academic journey and future success.

आधुनिक दृष्टि अनिवार्यतः बौद्धिक है । स्वविवेक की कसौटी पर कसे बिना वह मान्यताओं को स्वीकार नहीं करती है । आधुनिकता एक प्रश्नाकूल मानसिकता है जो हर बंधी-बधाई व्यवस्था, मर्यादा या धारण को तोड़ती है । युगबोध एवं सामसायिकता को आधुनिकता से अनिवार्यतः सम्बद्ध किया जाता है क्योंकि आधुनिकता वस्तुतः समसामयिक मूल्यों का प्रतिफलन है । युगबोध भी आधुनिकता का प्रमुख लक्षण है, क्योंकि युग से असहमत होकर कोई भी व्यक्ति आधुनिक होने का दावा नहीं कर सकता । अपने अस्तित्व के प्रति सजग चेतना भी आधुनिकता का एक लक्षण है । मूल्यों, मान्यताओं, आशाओं एवं आकांक्षाओं के प्रति मोहभंग व्यक्ति को संत्रास एवं अलगाव से भर देता है । स्वतंत्रता के उपरांत मूल्यों का विघटन तेजी से हुआ है ।आधुनिक भावबोध हमें पुराने मूल्यों का त्याग करने एवं नवीन मूल्यों को ग्रहण करने को विवश करता है । वस्तुतः सभी प्रकार के अतिवाद से बचते हुए जिज्ञासा को जीवित रखना ही आधुनिकता को पहचानने का सही मार्ग है ।

Comprehension:

Read the given passage carefully and answer questions that follow.

Perched dramatically atop a rugged hill in Bavaria, Germany, Neuschwanstein Castle looks as though it were lifted from the pages of a fairy tale. Commissioned in 1869 by King Ludwig II of Bavaria, the castle was intended as a personal retreat and homage to the operatic works of Richard Wagner. Ludwig, often called the 'Fairy Tale King', envisioned Neuschwanstein not as a fortress for defense, but as an idealized medieval world — romantic, ornate, and full of theatrical grandeur. While the castle's turrets and towers seem medieval, its interior boasted state-of-the-art technology for its time, including running water, a telephone line, and a self-operating kitchen. Sadly, Ludwig lived in the castle for only a short while before his mysterious death in 1886. Though unfinished, the castle was opened to the public soon after and has since inspired millions — even serving as a model for Disney's Sleeping Beauty Castle. Neuschwanstein stands today as a poignant symbol of royal eccentricity, artistic imagination, and the blurred line between fantasy and reality.

School camps offer children much more than a fun escape from the classroom—they play a key role in developing vital life skills. In the safe, structured setting of a camp, students gain independence by managing daily tasks like packing, following schedules, and caring for their belongings without parental help. These experiences teach responsibility and build self-reliance. Camps also foster teamwork, as students take part in group challenges that require communication, cooperation, and mutual support. These real-life collaboration experiences mirror situations they'll face later in life, helping them work well with others, despite differing views or abilities. Problem-solving is another core skill developed at camp. Activities, such as obstacle courses or outdoor tasks, require students to think critically, adapt quickly, and find solutions—skills that build resilience and encourage a positive approach to challenges. Finally, camps help boost confidence and self-esteem. As children push past comfort zones, take risks, and achieve goals—whether climbing a wall or speaking up in a group—they grow more self-assured. Even setbacks become learning opportunities, promoting courage and perseverance. School camps in Queensland are not just memorable—they are essential for nurturing well-rounded, capable, and confident individuals ready for future challenges.

Comprehension:

Read the passage give below and answer the questions given below.

Poaching today occurs mainly for sport or commercial gain, in both legal and illegal markets. It poses a severe threat to many wild species, especially those in wildlife reserves and national parks, often pushing them toward extinction. In Africa, weak enforcement of hunting laws has led to drastic declines in rhinoceros, targeted for their horns used in traditional Chinese medicine, and elephants, killed for ivory. Bengal tigers in India and gorillas in central Africa face similar threats from illegal hunters. Pangolins across Asia and Africa are heavily poached for meat, scales, and organs valued in traditional medicine, causing all eight species to become endangered or critically endangered. Illegal pet trades endanger many parrot species and tropical fish, while river poaching depletes fish stocks in some regions. Plants also suffer from poaching; valuable trees like rosewood and mahogany are illegally logged, destroying habitats for dependent wildlife. Furthermore, collectors threaten species like carnivorous plants, cycads, cacti, and orchids by taking them alive for ornamental purposes. Even when forests remain standing, selective removal of these plants and trees can disrupt entire ecosystems and contribute to the decline of already vulnerable species.

Yoga is an ancient practice that combines movement, breathing, and meditation. It is becoming more popular today as people look for ways to relax and stay healthy. Yoga calms the mind and body, and it can be done anywhere — at home, in a studio, or even outdoors. It improves strength, flexibility, and mental focus.

One major benefit of yoga is that it teaches mindfulness. This means paying attention to what you're doing in the present moment. People who practise yoga often become more aware of their emotions, hunger cues, and eating habits. As a result, yoga can support better food choices and help maintain a healthy weight.

Yoga also boosts fitness and heart health. Studies show that regular practice lowers blood pressure, increases muscle strength, and improves breathing. Because of these benefits, yoga is now included in many health programmes, especially for people dealing with heart problems, anxiety, or stress.

अशोक वृक्ष की पूजा इन्हीं गंधर्वों और यक्षों की देन है। प्राचीन साहित्य में इस वृक्ष की पूजा के उत्सवों का बड़ा सरस वर्णन मिलता है। असल पूजा अशोक की नहीं, बल्कि उसके अधिष्ठाता कंदर्प देवता की होती थी। इसे 'मदनोत्सव' कहते थे। महाराजा भोज के 'सरस्वती-कंठाभरण' से जान पड़ता है कि यह उत्सव त्रयोदशी के दिन होता था। 'मालविकाग्निमित्र' और 'रत्नावली' में इस उत्सव का बड़ा सरस मनोहर वर्णन मिलता है। मैं जब अशोक के लाल स्तबकों को देखता हूँ तो मुझे वह पुराना वातावरण प्रत्यक्ष दिखाई दे जाता है। राजघरानों में साधारणतः रानी ही अपने सनूपुर चरणों के आघात से इस रहस्यमय वृक्ष को पुष्पित किया करती थीं। कभी-कभी रानी अपने स्थान पर किसी अन्य सुंदरी को भी नियुक्त कर दिया करती थीं। कोमल हाथों में अशोक-पल्लवों का कोमलतर गुच्छ आया, अलक्तक से रंजित नूपुरमय चरणों के मृदु आघात से अशोक का पाद देश आहत हुआ नीचे हल्की रुनझुन और ऊपर लाल फूलों का उल्लास। मैं सचमुच इस उत्सव को मादक मानता हूँ। अशोक के स्तबकों में वह मादकता आज भी है, पर पूछता कौन है?1225

When Rina was cleaning her grandfather's old cupboard, she found a small wooden box wrapped in cloth. Inside lay a dusty medal and a faded certificate. Curious, she asked her grandfather about it. With a quiet smile, he explained that it was an award he had received for saving a child during a flood decades ago. Rina was amazed. No one in the family had ever heard the story. "I didn't do it for the recognition," he said, "just did what I could." Touched by his words, Rina took a photo of the medal and posted it online, sharing his story. The post went viral. Soon, journalists visited, and the local school invited him to speak. What was once forgotten became a story of inspiration. Comprehension:

Critical thinking is an important skill that enables students to analyse information logically and make informed decisions. Instead of accepting ideas blindly, critical thinkers question evidence, compare viewpoints, and evaluate sources carefully. In the digital age, students are exposed to vast amounts of information through the internet and social media, where misinformation can spread easily. Developing critical thinking helps learners distinguish facts from opinions and recognise bias. Schools promote this skill through discussions, problem-solving tasks, and analytical reading activities. Teachers encourage students to ask questions and justify their reasoning. When students practise critical thinking regularly, they become independent learners, better problem solvers, and responsible citizens capable of making thoughtful choices in academic, personal, and social situations throughout their lives.

कर्म की स्वतंत्रता, वाणी की स्वतंत्रता और विचारों की स्वतंत्रता ही मनुष्य को सच्चे अर्थों में मानव बनाती है। यदि इस स्वतंत्रता को छीन लिया जाए, तो मनुष्य मात्र एक पशु के समान रह जाता है, जिसे रस्सी से बाँधकर कहीं भी ले जाया जा सकता है और कहीं भी बंद किया जा सकता है। दासता अपने आप में एक महान क्लेश है, जिसमें व्यक्ति को न तो आराम से बैठने का सुख मिलता है और न ही कहीं जाने की आज़ादी रहती है। दास व्यक्ति को मालिक जितना दे, उसी में संतोष करना पड़ता है और दिन-रात ड्यूटी करनी पड़ती है। यही स्थिति राष्ट्र पर भी लागू होती है। पराधीन देश न तो स्वतंत्र रूप से अन्य देशों से संबंध रख सकते हैं और न ही स्वतंत्र रूप से व्यापार कर सकते हैं। पराधीन भारत ने वर्षों तक परतंत्रता का कठोर दुःख सहा, जिसका प्रभाव समाज, संस्कृति और अर्थव्यवस्था पर भी पड़ा।

Comprehension:

Read the given passage carefully and answer the questions that follow.

Every morning, old Gopal would sit under the neem tree at the edge of his village. He spoke to it like a friend. "You've seen more seasons than I have," he'd say, chuckling softly. Children often giggled at him, thinking he was foolish. But during the great drought, when fields cracked and wells dried up, the neem tree stood green and tall. People began gathering under its shade. Gopal shared stories and wisdom, and villagers found comfort not only from the tree's cool shade but also from Gopal's calm presence. When he passed away, no one laughed at the tree anymore. Instead, they hung garlands and left cups of water at its base. "It listened," said a boy once, "and now it watches." Over time, the neem tree became a place of memory, where people still come—not to laugh or question, but to reflect, cool down, and perhaps, to listen back.

Comprehension:

Read the passage given below and answer the questions that follow.

Music has long offered comfort during challenging times, providing connection, support, and understanding. Historically, music in healthcare has proven effective in reducing stress, anxiety, depression, and chronic pain, helping people relax and stay present. Research shows that listening to music releases endorphins—hormones that promote pleasure and reduce pain—which can lower stress and aid healing. Music therapy uses these benefits to create an atmosphere conducive to emotional recovery. Music also allows self-expression when words fall short, while uplifting songs or singing can boost mood by increasing serotonin, the neurotransmitter regulating emotions and happiness. Studies, including one by McGill University, reveal that music increases dopamine release, enhancing pleasure and linking music to the brain's reward system. Furthermore, research suggests certain music can improve cognitive function by stimulating brain areas involved in memory and learning, enhancing connectivity between auditory and emotional regions, which supports memory formation. Ultimately, music is a powerful tool that can uplift, comfort, and bring joy, offering emotional and cognitive benefits to those navigating difficult experiences.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Water stress happens when the demand for clean, usable water is greater than the available supply. It may result from a lack of rainfall, overuse of water resources, or poor infrastructure. Many communities face water shortages that affect health, hygiene, and daily living. Agriculture uses most of the world's freshwater, followed by industry and homes.

Climate change is making water stress worse by causing unpredictable rainfall, floods, and droughts. As temperatures rise, water supplies shrink, while population growth increases demand. Some countries, like the UAE, use ocean desalination to meet their needs, but this process is expensive and uses a lot of energy. Poorer areas often lack the resources to build or maintain clean water systems.

Water stress can lead to serious problems like disease, hunger, and even conflict. In many places, people are forced to migrate due to unsafe water. Solving this issue requires strong international cooperation and smarter water management.

Comprehension:

Read the given passage carefully and answer the questions that follow.

India has made several laws to protect its forests and wildlife. These laws help control deforestation and protect animals and their homes. The Indian Forest Act, 1927, is one of the oldest laws. It explains how forests should be used and protected. It also created three types of forests: reserved, protected, and village forests.

The Forest Conservation Act, 1980, was made to stop forest land from being used for other purposes. It says that the Central Government must approve before any forest land is cleared. It also started the Compensatory Afforestation Management and Planning Authority (CAMPA), which helps grow trees where forests were cut.

The Wildlife Protection Act, 1972, protects animals and birds. It bans hunting and allows the government to create national parks and sanctuaries. These laws are important because they help save nature, support wildlife, and protect our forests for the future.

Comprehension:

Read the passage carefully. Answer the questions given below.

Soil degradation undermines agricultural productivity and threatens global food systems, yet receives far less attention than more visible environmental problems. Healthy soil contains complex communities of microorganisms, fungi, and invertebrates that facilitate nutrient cycling, water retention, and plant disease resistance. Intensive agricultural practices including monoculture cropping, excessive tillage, and chemical fertilizer dependence disrupt these biological systems, reducing soil fertility over time. Erosion removes topsoil far faster than natural processes can replace it, with some agricultural regions losing soil at rates that could render them unproductive within generations. Soil compaction from heavy machinery reduces pore space necessary for root growth and water infiltration. The environmental consequences extend beyond agriculture, as degraded soils store less carbon, contributing to atmospheric greenhouse gas concentrations. Regenerative agriculture practices such as crop rotation, cover cropping, reduced tillage, and organic amendments can restore soil health, though adoption requires overcoming economic pressures that prioritize short-term yields over long-term sustainability.

एक विचार के रूप में सामाजिक न्याय की बुनियाद सभी मनुष्यों को समान मानने के आग्रह पर आधारित है। इसके मुताबिक किसी के साथ सामाजिक, धार्मिक और सांस्कृतिक पूर्वाग्रह के आधार पर भेदभाव नहीं होना चाहिए। हर किसी के पास कितने न्यूनतम संसाधन होने चाहिए कि वह उत्तम जीवन की अपनी संकल्पना को धरती पर उतार पाएँ। विकसित हों या विकासशील, दोनों ही तरह के देशों में राजनीतिक सिद्धांत के दायरे में सामाजिक न्याय की इस अवधारणा और उससे जुड़ी अभिव्यक्तियों का प्रमुखता से प्रयोग किया जाता है। लेकिन इसका मतलब यह नहीं है कि उसका अर्थ हमेशा सुस्पष्ट ही होता है। सिद्धांतकारों ने इस प्रत्यय का अपने-अपने तरीके से इस्तेमाल किया है। व्यावहारिक राजनीति के क्षेत्र में भी, भारत जैसे देश में सामाजिक न्याय का नारा वंचित समूहों की राजनीतिक गोलबंदी का एक प्रमुख आधार रहा है। उदारतावादी मानकीय राजनीतिक सिद्धांत में उदारतावादी- समता वाद से आगे बढ़ते हुए सामाजिक न्याय के सिद्धांतीकरण में कई आयाम जुड़ने गए हैं।

Comprehension:

Read the passage carefully. Answer the questions given below.

Plastic pollution has emerged as a pervasive environmental crisis affecting terrestrial and marine ecosystems globally. Since mass production began in the mid-twentieth century, billions of tons of plastic have been manufactured, much of which persists in the environment for hundreds of years due to its resistance to degradation. Ocean currents concentrate plastic debris into vast gyres, creating zones where floating waste outnumbers marine life. Microplastics, tiny fragments resulting from the breakdown of larger items, have infiltrated food chains and been detected in organisms from plankton to apex predators, including humans. The economic convenience and versatility of plastics have made them ubiquitous in modern life, complicating efforts to reduce consumption. Recycling programs exist but process only a small fraction of plastic waste, with most ending up in landfills or natural environments. Addressing plastic pollution requires systemic changes including reducing single-use products, developing biodegradable alternatives, improving waste management infrastructure, and fostering consumer awareness about environmental impacts.

Comprehension:

Read the passage carefully and answer the questions that are given below.

India is home to a wide variety of animal and plant species, many of which are rare or endangered. Over the years, wildlife has faced serious threats due to hunting, deforestation, and loss of habitat. These challenges created an urgent need to protect natural ecosystems and preserve the balance of biodiversity. Without strong action, the country risked losing many valuable species forever.

To address this growing concern, the government introduced the Wildlife Protection Act in 1972. This law provides legal protection to wild animals, birds, and plants across most parts of India. It led to the creation of national parks, wildlife sanctuaries, and special conservation projects like Project Tiger. The Act also includes strict rules against hunting and harming protected species.

While the law plays an important role, the success of wildlife conservation also depends on public support. Citizens must act responsibly by respecting nature, avoiding harm to animals, and spreading awareness about conservation.

कहा जाता है कि मनुष्य युग के अनुसार बदलता है। किंतु कुछ ऐसे मनुष्य भी होते है, जो युग को बदल देते हैं। महात्मा गाँधी ऐसे ही महान पुरुष थे। उन्होंने विश्व के समक्ष यह सिद्ध कर दिखाया कि अस्त्र-शस्त्र की अपनी सीमाएँ हैं और सत्य-अहिंसा में उनसे कहीं अधिक शक्ति है। महात्मा गाँधी एक राजनीतिक नेता नहीं, धार्मिक नेता भी थे। पर, उनके धर्म का मार्ग थोड़ा भिन्न था। गाँधीजी के हृदय में सभी धर्मों के प्रति आदर-भाव था। हिंदू, मुसलमान, सिख, ईसाई सभी उनके लिए समान थे। वे आजीवन इसी मार्ग पर बलते रहे। उन्होंने हमेशा एक प्रयत्न किया कि हिंदू-मुस्लिम एकता कायम रहे। भारत गंगा-जमुनी संस्कृति के लिए जाना जाए। यह कैसी विडंबना है कि आजीवन हिंसा के विरुद्ध संघर्ष करनेवाले की जीवन-लीला हिंसा से समाप्त हुई। महात्मा-गाँधी की हत्या उनकी भारत की अवधारणा पर प्रहार है।

Read the passage carefully and answer the questions that follow.

No very satisfactory account of the mechanism that caused the formation of the ocean basins has yet been given. The traditional view supposes that the upper mantle of the earth behaves as a liquid when it is subjected to small forces for long periods and that differences in temperature under oceans and continents are sufficient to produce convection in the mantle of the earth with rising convection currents under the mid-ocean ridges and sinking currents under the continents. Theoretically, this convection would carry the continental plates along as though they were on a conveyor belt and would provide the forces needed to produce the split that occurs along the ridge. This view may be correct: it has the advantage that the currents are driven by temperature differences that themselves depend on the position of the continents. Such back-coupling, where a plate's position influences the forces driving it, may result in complex and variable motions.

राष्ट्रीय एकता में व्यक्ति की गरिमा और मानवीय मूल्यों की उपेक्षा नहीं हो सकती, क्योंकि इसके बिना राष्ट्रीयता एक संकीर्ण धारणा है। दरअसल राष्ट्रीयता, मानवीय मूल्य और विश्वबंधुत्व के बीच अंतर्विरोध नहीं है। इसलिए राष्ट्रीयता के दो रूप बताए गए हैं-बहिष्कारपरक राष्ट्रीयता और समावेशी राष्ट्रीयता। बहिष्कारपरक राष्ट्रीयता अंध-राष्ट्रवाद है जो अहंकार और संकीर्णता से पैदा होता है। समावेशी राष्ट्रीयता 'दूसरे' के प्रति उदार रुख, मानवता के मूल्यों में विश्वास और ऐसे वैश्विक खुलेपन को लेकर चलती है, जो विवेक-आधारित होता है। भारतीय संविधान का निर्माण भारतीय राष्ट्र- राज्य की एक ऐसी ही संकल्पना को लेकर हुआ है, जो न सिर्फ स्वाधीनता संग्राम के व्यापक अनुभवों पर आधारित है बल्कि उसमें वैयक्तिकता, राष्ट्रीयता, मानवता और विश्वबोध के बीच एक बुद्धिपरक सामंजस्य है। स्वतंत्रता और समानता के अलावा राष्ट्रीय एकता उसका एक प्रधान सारतत्व है। राष्ट्रीय एकता का निषेध कर संविधान के दूसरे लक्ष्यों की तरफ भी नहीं बढ़ा जा सकता। दूसरी तरफ राष्ट्रीय एकता का अर्थ बहुसंख्यकता द्वारा अल्पसंख्यकों पर अपनी विचारधारा थोपना नहीं होता। यह फासीवाद है जो भारतीय प्रकृति के विरुद्ध है।

राष्ट्रीय एकता में व्यक्ति की गरिमा और मानवीय मूल्यों की उपेक्षा नहीं हो सकती, क्योंकि इसके बिना राष्ट्रीयता एक संकीर्ण धारणा है। दरअसल राष्ट्रीयता, मानवीय मूल्य और विश्वबंधुत्व के बीच अंतर्विरोध नहीं है। इसलिए राष्ट्रीयता के दो रूप बताए गए हैं-बहिष्कारपरक राष्ट्रीयता और समावेशी राष्ट्रीयता। बहिष्कारपरक राष्ट्रीयता अंध-राष्ट्रवाद है जो अहंकार और संकीर्णता से पैदा होता है। समावेशी राष्ट्रीयता 'दूसरे' के प्रति उदार रुख, मानवता के मूल्यों में विश्वास और ऐसे वैश्विक खुलेपन को लेकर चलती है, जो विवेक-आधारित होता है। भारतीय संविधान का निर्माण भारतीय राष्ट्र- राज्य की एक ऐसी ही संकल्पना को लेकर हुआ है, जो न सिर्फ स्वाधीनता संग्राम के व्यापक अनुभवों पर आधारित है बल्कि उसमें वैयक्तिकता, राष्ट्रीयता, मानवता और विश्वबोध के बीच एक बुद्धिपरक सामंजस्य है। स्वतंत्रता और समानता के अलावा राष्ट्रीय एकता उसका एक प्रधान सारतत्व है। राष्ट्रीय एकता का निषेध कर संविधान के दूसरे लक्ष्यों की तरफ भी नहीं बढ़ा जा सकता। दूसरी तरफ राष्ट्रीय एकता का अर्थ बहुसंख्यकता द्वारा अल्पसंख्यकों पर अपनी विचारधारा थोपना नहीं होता। यह फासीवाद है जो भारतीय प्रकृति के विरुद्ध है।

Comprehension:

Read the passage carefully and answer the questions that are given below.

Global warming refers to the rise in Earth's average surface temperature due to human activities. Since the Industrial Revolution, burning fossil fuels like coal and gas has released greenhouse gases such as carbon dioxide into the air. These gases trap heat in the atmosphere, causing the planet to warm faster than before.

Scientists worldwide have gathered data for years and found strong evidence that human actions are the main cause. The Intergovernmental Panel on Climate Change (IPCC) reported that global temperatures have already risen about 1.07 °C since the 1800s. This could lead to rising sea levels, extreme weather, and loss of biodiversity.

To avoid the worst effects, countries joined the Paris Agreement, aiming to keep global warming below 1.5 °C above preindustrial levels. The treaty encourages governments to reduce carbon emissions and support green technologies. Individuals can also help by using energy-efficient appliances, reducing car use, or signing online climate petitions.

लोकतंत्र में मीडिया को चौथे स्तंभ की उपमा दी जाती है क्योंकि यह जनता और सरकार के बीच संवाद का सेतु बनता है। परंतु आज मीडिया में पक्षपात, टीआरपी की होड़ और बाजारवाद हावी होता जा रहा है, जिसके कारण इसकी विश्वसनीयता पर प्रश्नचिह्न लगने लगे हैं। कई बार समाचारों की सत्यता पर संदेह किया जाने लगा है और जनता के विचारों को भटकाने के प्रयास भी बढ़ गए हैं। लोकतांत्रिक मूल्यों को सुरक्षित रखने के लिए आवश्यक है कि मीडिया निष्पक्ष, तथ्यपरक और जिम्मेदार बने। मीडिया को अपनी भूमिका केवल सूचना देने तक सीमित न रखते हुए जनता को जागरूक और सशक्त करने की दिशा में भी कार्य करना चाहिए। साथ ही, मीडिया को नकारात्मकता और सनसनी से दूर रहते हुए समाज में सकारात्मक सोच और विवेकपूर्ण दृष्टिकोण को बढ़ावा देना चाहिए। मीडिया की स्वतंत्रता के साथ उसकी जवाबदेही भी सुनिश्चित की जानी चाहिए ताकि लोकतंत्र की मजबूती बनी रहे।

Comprehension:

Read the passage carefully and answer the questions that follow.

Every evening, Rafi would sit on the rooftop of his small house and write letters addressed to the wind. They weren't posted anywhere, just folded neatly and tied to a piece of string that fluttered in the breeze. His neighbours called it strange, but Rafi believed the wind carried messages to those we couldn't reach. One day, a girl named Tara moved into the building next door. Curious, she read one of his letters caught on a tree branch. It was a note to his sister, who had passed away two years earlier. Touched, Tara wrote back—not as the sister, but as a friend. They started exchanging notes this way, tied to strings or hidden behind pots. What began as silent mourning slowly turned into healing. Rafi no longer wrote to the wind alone. His grief had found a listener. And sometimes, that's all we need to feel understood.

Comprehension:

Read the passage carefully and answer the questions that follow.

The old playground on Nila Street was once filled with laughter, skipping ropes, and the bouncing of footballs. For many years, it was the heart of the neighborhood, where children played and friendships were made. But slowly, things changed. The swings rusted, the slide cracked, and the once-green field turned to dry earth. As tall apartment buildings rose nearby, the open spaces shrank. Parents, concerned about safety and traffic, began keeping their children indoors. Today, children turn to screens instead of swings, and friendships grow more virtual than real. The air is quieter, but the silence isn't joyful. "Even the quarrels were lively," says Mrs. Meena, a retired teacher who lives nearby. She and a few others have started petitioning the local council for a new public park. Whether the sound of children's laughter will return depends on how much the community values shared spaces and childhood joy.

अपने चारों ओर नजर दौड़ाने पर हमें विभिन्न प्रकार की वस्तुएँ नज़र आती हैं, जिनका आकार, आकृति और बनावट अलग-अलग होता है। इस विश्व में प्रत्येक वस्तु जिस सामग्री से बनी होती है उसे वैज्ञानिकों ने 'पदार्थ' का नाम दिया। जिस हवा में हम श्वास लेते हैं, जो भोजन हम खाते हैं, पत्थर, बादल, तारे, पौधे एवं पशु, यहाँ तक कि पानी की एक बूँद या रेत का एक कण, ये सभी पदार्थ हैं। ध्यान देने योग्य बात यह भी है कि ऊपर लिखी सभी वस्तुओं का द्रव्यमान होता है और ये कुछ स्थान (आयतन) घेरती हैं। प्राचीन काल से ही मनुष्य अपने आस-पास को समझने का प्रयास करता रहा है। भारत के प्राचीन दार्शनिकों ने पदार्थ को पाँच मूल तत्वों में वर्गीकृत किया, जिसे 'पंचतत्व' कहा गया। ये पंचतत्व हैं: वायु, पृथ्वी, अग्नि, जल और आकाश। उनके अनुसार, इन्हीं पंचतत्वों से सभी वस्तुएँ बनी हैं, चाहे वो सजीव हों, या निर्जीव। उस समय के यूनानी दार्शनिकों ने भी पदार्थ को इसी प्रकार वर्गीकृत किया है। आधुनिक वैज्ञानिकों ने पदार्थ को भौतिक गुणधर्म एवं रासायनिक प्रकृति के आधार पर दो प्रकार से वर्गीकृत किया है।

Comprehension:

Read the given passage carefully and answer the questions that follow.

Over the past few years, a number of clinical studies have explored whether high-protein, low-carbohydrate diets are more effective for weight loss than other frequently recommended diet plans, such as diets that drastically curtail fat intake (Pritikin) or that emphasize consuming lean meats, grains, vegetables, and a moderate amount of unsaturated fats (the Mediterranean diet). A 2009 study found that obese teenagers who followed a low-carbohydrate diet lost an average of 15.6 kilograms over a six-month period, whereas teenagers following a low-fat diet or a Mediterranean diet lost an average of 11.1 kilograms and 9.3 kilograms respectively. Two 2010 studies that measured weight loss for obese adults following these same three diet plans found similar results. Over three months, subjects on the low-carbohydrate diet plan lost anywhere from four to six kilograms more than subjects who followed other diet plans.

Comprehension:

Read the given passage and answer the questions that follow.

Automation is rapidly changing the nature of jobs in India. Machines and software are now used in manufacturing, banking, customer service, and even agriculture. These technologies help improve speed and reduce human error. While automation creates some new jobs, especially in areas like data analysis and robotics, it also replaces many low-skill and repetitive roles. Workers in sectors like textiles, transport, and retail face the risk of job loss. Small businesses often find it hard to compete with automated systems used by large companies. This leads to job insecurity and the need for reskilling. The government and private institutions are now offering skill development programs to help workers adjust. Automation cannot be stopped, but it can be managed. With proper planning, India can reduce its negative impact and prepare workers for a changing job market. The key lies in education, awareness, and policy support for inclusive growth.

Comprehension:

Read the passage and choose the correct answer to the questions based on it.

Since her debut in 1959, Barbie has transitioned from a mere plaything to a polarizing cultural icon. Created by Ruth Handler, the doll was revolutionary for offering a "grown-up" silhouette in a market saturated with infant-like dolls, suggesting that a woman's future could extend beyond domesticity. Over the decades, Barbie's identity has been malleable, encompassing hundreds of careers—from astronaut to surgeon—intended to inspire "unlimited potential." However, the brand has frequently ignited fierce debate regarding unrealistic beauty standards and the "commodification" of femininity.

Critics argue that her anatomical proportions promoted a narrow, unattainable ideal. In response, recent iterations have embraced a more pluralistic approach, introducing diverse body types, skin tones, and disabilities to better reflect global reality. This shift suggests that Barbie is no longer just a static toy; she is a mirror of society's evolving discourse on gender, representation, and the tension between commercialism and empowerment.

आधुनिक उपभोक्तावादी संस्कृति ने व्यक्ति की वास्तविक आवश्यकताओं को आकांक्षाओं और दिखावे में बदल दिया है। लोग सुविधाओं और विलासिता की वस्तुओं के पीछे इस हद तक भाग रहे हैं कि पर्यावरणीय संतुलन बिगड़ता जा रहा है। विलासिता की वस्तुएँ बनाने और तकनीकी उपकरणों के उत्पादन में प्राकृतिक संसाधनों का अत्यधिक दोहन किया जा रहा है, जिससे कार्बन उत्सर्जन और प्रदूषण की मात्रा बढ़ रही है। प्लास्टिक, ई-कचरा और अति उत्पादन न केवल संसाधनों की बर्बादी करते हैं, बल्कि पारिस्थितिकी तंत्र, जलवायु और जैव विविधता पर भी नकारात्मक प्रभाव डालते हैं। इस उपभोक्तावाद ने समाज में असंतोष और निरंतर प्रतिस्पर्धा की भावना को भी जन्म दिया है, जिससे व्यक्ति मानसिक तनाव का शिकार होता जा रहा है। आवश्यकता इस बात की है कि उपभोक्तावाद पर नियंत्रण रखते हुए सरल, पर्यावरण हितैषी और संतुलित जीवनशैली को अपनाया जाए ताकि विकास और पर्यावरण के बीच संतुलन स्थापित हो सके और पृथ्वी पर जीवन सुरक्षित रह सके।

निर्देश: दिये गए गद्यांश के आधार पर अग्रलिखित प्रश्नों के उत्तर दीजिए।

लोग चाहते हैं कि उन्हें नियमित काम, बेहतर मज़दूरी और अपनी उपज अथवा अन्य उत्पादों के लिए अच्छी कीमतें मिलें। दूसरे शब्दों मे वे ज्यादा आय चाहते हैं। किसी भी तरह से ज़्यादा आय चाहने के अतिरिक्त, लोग बराबरी का व्यवहार, स्वतंत्रता, सुरक्षा और दूसरों से आदर मिलने की इच्छा भी रखते हैं। वे भेदभाव से अप्रसन्न होते हैं। ये सभी महत्त्वपूर्ण लक्ष्य हैं। बल्कि, कुछ मामलों में ये अधिक आय और अधिक उपभोग से अधिक महत्त्वपूर्ण हो सकते हैं, क्योंकि जीने के लिए केवल भौतिक वस्तुएँ ही पर्याप्त नहीं होती। द्रव्य या उससे खरीदी जा सकने वाली भौतिक वस्तुएँ एक कारक है जिस पर हमारा जीवन निर्भर है। लेकिन हमारा बेहतर जीवन ऊपर लिखी अभौतिक वस्तुओं पर भी निर्भर करता है। अगर आप को यह बात स्पष्ट नहीं लगती है, तो अपने जीवन में अपने मित्रों की भूमिका के बारे में ज़रा सोचिए। आपको उनकी मित्रता की इच्छा हो सकती है। इसी तरह और भी बहुत सी चीजें हैं जिन्हें आसानी से मापा नहीं जा सकता, लेकिन उनका हमारे जीवन में बहुत महत्त्व हैं। इनकी प्रायः उपेक्षा कर दी जाती है। लेकिन, यह निष्कर्ष निकालना गलत होगा कि जिसे मापा नहीं जा सकता, वह महत्त्व नहीं रखता।

लोग चाहते हैं कि उन्हें नियमित काम, बेहतर मज़दूरी और अपनी उपज अथवा अन्य उत्पादों के लिए अच्छी कीमतें मिलें। दूसरे शब्दों मे वे ज्यादा आय चाहते हैं। किसी भी तरह से ज़्यादा आय चाहने के अतिरिक्त, लोग बराबरी का व्यवहार, स्वतंत्रता, सुरक्षा और दूसरों से आदर मिलने की इच्छा भी रखते हैं। वे भेदभाव से अप्रसन्न होते हैं। ये सभी महत्त्वपूर्ण लक्ष्य हैं। बल्कि, कुछ मामलों में ये अधिक आय और अधिक उपभोग से अधिक महत्त्वपूर्ण हो सकते हैं, क्योंकि जीने के लिए केवल भौतिक वस्तुएँ ही पर्याप्त नहीं होती। द्रव्य या उससे खरीदी जा सकने वाली भौतिक वस्तुएँ एक कारक है जिस पर हमारा जीवन निर्भर है। लेकिन हमारा बेहतर जीवन ऊपर लिखी अभौतिक वस्तुओं पर भी निर्भर करता है। अगर आप को यह बात स्पष्ट नहीं लगती है, तो अपने जीवन में अपने मित्रों की भूमिका के बारे में ज़रा सोचिए। आपको उनकी मित्रता की इच्छा हो सकती है। इसी तरह और भी बहुत सी चीजें हैं जिन्हें आसानी से मापा नहीं जा सकता, लेकिन उनका हमारे जीवन में बहुत महत्त्व हैं। इनकी प्रायः उपेक्षा कर दी जाती है। लेकिन, यह निष्कर्ष निकालना गलत होगा कि जिसे मापा नहीं जा सकता, वह महत्त्व नहीं रखता।

Comprehension:

Read the given passage carefully and answer the questions that follow.

The rule of law is a foundational principle of democracy. It means that laws govern everyone equally, limiting the use of arbitrary power. However, the law is not applied automatically. It is shaped by a society's history, politics, and power structures.

History reveals that laws have often been used to exclude people. In the past, discriminatory rules were legally sanctioned to restrict voting and property rights. These examples prove that legality does not always guarantee justice. Instead, laws often reflect the moral assumptions of their time.

Judicial interpretation also plays a major role. Judges do not just apply rules; they explain what the language means as social values evolve. Public confidence in the system depends on fairness. When enforcement is biased, the law loses its legitimacy. For the law to fulfill its promise, it must serve as a safeguard for all people rather than a mechanism of control.

Q.16 What is the central theme of the passage?

Comprehension:

Read the given passage carefully and answer the questions that follow.

The rule of law is a foundational principle of democracy. It means that laws govern everyone equally, limiting the use of arbitrary power. However, the law is not applied automatically. It is shaped by a society's history, politics, and power structures.

History reveals that laws have often been used to exclude people. In the past, discriminatory rules were legally sanctioned to restrict voting and property rights. These examples prove that legality does not always guarantee justice. Instead, laws often reflect the moral assumptions of their time.

Judicial interpretation also plays a major role. Judges do not just apply rules; they explain what the language means as social values evolve. Public confidence in the system depends on fairness. When enforcement is biased, the law loses its legitimacy. For the law to fulfill its promise, it must serve as a safeguard for all people rather than a mechanism of control.

Comprehension:

Read the below passage carefully and answer the questions that follow.

At dawn, the municipal park appears almost theatrical, a stage where ordinary residents rehearse their private rituals before the city fully wakes. Elderly walkers trace the gravel paths with deliberate steps, comparing blood pressure readings as if they were cricket scores. A gardener waters beds of marigolds, directing the hose like a conductor guiding an orchestra of leaves. Near the pond, two teenagers practise photography, adjusting lenses to capture the mist lifting from the surface. None of them speaks loudly; the air seems to demand quiet civility. By eight o'clock, vendors roll in carts of tea and newspapers, and conversation begins to thicken like steam. The park gradually shifts from sanctuary to marketplace, yet its early gentleness lingers in memory. Observing this transformation each morning, I understand how public spaces teach patience, cooperation, and shared ownership without any formal instruction.

Comprehension:

Read the given passage and answer the questions that follow.

Venezuela, a nation once synonymous with immense oil wealth, currently navigates a complex socio-economic landscape. Possessing the world's largest proven oil reserves, the country initially experienced periods of significant prosperity and rapid modernization. However, over-reliance on a single commodity—petroleum—created a precarious "petro-state" vulnerable to global market fluctuations. When oil prices plummeted and internal systemic inefficiencies surfaced, the economy entered a period of hyperinflation and contraction.

This paradox of being resource-rich yet economically strained has prompted a massive humanitarian shift, with millions of citizens migrating in search of stability. Despite these hardships, Venezuela remains a cultural powerhouse, boasting diverse landscapes from the Andes Mountains to the Caribbean coast. The current climate is one of resilience and transformation, as the nation seeks to recalibrate its domestic policies and international relations.

Comprehension:

Read the below passage carefully and answer the questions that follow.

My grandfather keeps a modest vegetable plot behind the house, bordered by uneven bricks and a wire fence. To strangers it appears ordinary, yet to him it is a laboratory of memory. Each seed packet carries a story: beans traded with a neighbour, chillies saved from a festival dish, coriander brought years ago from a distant town. He wakes before sunrise to loosen soil with a short hoe, humming tunes older than the radio. I once asked why he refused chemical fertilisers when quicker methods existed. He replied that patience flavours food more deeply than haste. Watching him measure rainwater and compost scraps, I realise gardening is his quiet conversation with time. Harvest days are celebrated modestly, with neighbours receiving baskets tied by twine. Nothing is wasted, not even wilted leaves, which return to the earth as mulch. Through this small patch, he teaches sustainability without speeches, demonstrating that care for soil becomes care for community.

निम्नलिखित गद्यांश के आधार पर पूछे गए प्रश्नों के सही विकल्प का चयन कीजिए-
जो समझता है कि वह दूसरों का उपकार कर रहा है वह अबोध है, जो समझता है कि दूसरे उसका अपकार कर रहे हैं वह भी बुद्धिहीन है। कौन किसका उपकार करता है, कौन किसका अपकार कर रहा है? मनुष्य केवल जी रहा है, अपनी इच्छा से नहीं, इतिहास विधाता की योजना के अनुसार। किसी को उससे सुख मिल जाये, बहुत अच्छी बात है, नहीं मिल सका, कोई बात नहीं, परंतु उसे अभिमान नहीं होना चाहिए। सुख पहुँचाने का अभिमान यदि गलत है, तो दुख पहुँचाने का अभिमान तो नितांत गलत है। दुख और सुख तो मन के विकल्प हैं। सुखी वह है जिसका मन वश में है, दुखी वह है जिसका मन परवश है। परवश होने का अर्थ है- खुशामद करना, दाँत निपोरना, चाटुकारिता, जी हुज़ूरी। जिसका मन अपने वश में नहीं है, वही दूसरे के मन का छंदावर्तन करता है, अपने को छिपाने के लिए मिथ्या आडंबर रचता है, दूसरों को फँसाने के लिए जाल बिछाता है।

Comprehension:

Read the given passage carefully and answer the questions that follow.

Making moral choices is rarely easy. People often must act quickly without knowing all the facts. While ethical theories provide a guide, they cannot remove all doubt. The hard part is using big ideas to solve complicated, real-world problems.

Utilitarian ideas focus on results and doing what helps the most people. Deontological views focus on following duties and rules, no matter what. Virtue ethics focuses on a person's character and habits. Each theory looks at a different side of a problem, but none has all the answers.

Real-life dilemmas often involve clashing duties. A choice that helps most people might hurt a few. Following rules too strictly can also feel unfair. This shows that moral thinking is about personal judgment as much as logic. Ethical maturity is not about being 100% sure. It is about the ability to think, learn, and take responsibility.

Q.16 **Which title best suits the passage?**

Generated by rank.qmaths.in

Comprehension:

Read the given passage carefully and answer the questions that follow.

Making moral choices is rarely easy. People often must act quickly without knowing all the facts. While ethical theories provide a guide, they cannot remove all doubt. The hard part is using big ideas to solve complicated, real-world problems.

Utilitarian ideas focus on results and doing what helps the most people. Deontological views focus on following duties and rules, no matter what. Virtue ethics focuses on a person's character and habits. Each theory looks at a different side of a problem, but none has all the answers.

Real-life dilemmas often involve clashing duties. A choice that helps most people might hurt a few. Following rules too strictly can also feel unfair. This shows that moral thinking is about personal judgment as much as logic. Ethical maturity is not about being 100% sure. It is about the ability to think, learn, and take responsibility.

Comprehension:

Read the passage and choose the correct answers to the questions based on it.

Fireless cooking, often dismissed as a modern convenience, is actually a sophisticated intersection of culinary art and thermal physics. This method relies on techniques such as osmosis, fermentation, and acid-based denaturing — as seen in the preparation of ceviche — to transform raw ingredients into palatable meals. By eliminating open flames, fireless cooking minimizes the risk of kitchen accidents and preserves heat-sensitive vitamins, such as Vitamin C and B-complex, which are often degraded by high-temperature sautéing or boiling.

Furthermore, fireless techniques like 'insulation cooking' utilize the principle of thermal retention. A dish is brought to a brief boil and then placed in a vacuum-sealed or insulated container where it continues to cook using its own latent heat. This approach is a cornerstone of sustainable living, drastically reducing carbon footprints and energy consumption.

व्यक्ति को समझने के लिए पहले उस समाज को समझना पड़ता है जो उस व्यक्ति को पैदा करता है, उसे विकसित करता है, उसे आधार देता है। कृष्ण एक हुए हों या अनेक हुए हों, आज वे जिस चरित्र और व्यक्तित्व के रूप में देश और विश्व के सामने हैं, उस चरित्र और व्यक्तित्व को भारतीय समाज ने बनाया है, विकास और आधार दिया है। चरित्र में यदि संभावनाएं ही नहीं हैं तो विकास कैसे किया जा सकता है? पौराणिकों ने मिथक गढ़े और उनका उपयोग अवतारवाद के अपने सिद्धांत में किया। अवतारवाद उनके कई मतलबों को सिद्ध करने का काम करने का साधन बना। यह साधन उन्हें क्यों निर्मित करना पड़ा, इसके अनेक कारण थे। पहला कारण तो यह था कि जिस विष्णु के उन्होंने चौबीस अवतार कल्पित किए, उस विष्णु के चरित्र में विकास की संभावनाएं नहीं थीं। विष्णु का जो चित्र है वह एक अकर्मण्य देवता का, गतिहीन देवता का, चित्र है। विष्णु क्षीर सागर में शेषनाग की शैय्या पर लेटा है। लक्ष्मी उसके पांव दबा रही है। सारे चित्र में लक्ष्मी के पांव दबाने की क्रिया के अतिरिक्त सब कुछ जड़ है, गतिहीन है। कृष्ण के साथ ऐसा नहीं है। कृष्ण की जो छवियां हैं, उनमें कहीं गतिहीनता नहीं है। बचपन में दही-मक्खन खाते हुए, गोपियों के साथ नृत्य करते हुए, गाएं चराते हुए, बंशी बजाते हुए, चक्र उठाते हुए, रथ हांकते हुए सर्वत्र एक गतिशीलता है।

Comprehension:

Read the given passage carefully and answer the questions that follow.
Today, breakthroughs rarely happen in isolation. Solving crises like climate change requires experts from different fields to work together. This interdisciplinary collaboration allows researchers to see problems from many angles, leading to better solutions.
However, working together isn't always easy. A biologist relying on numbers might struggle to understand a sociologist using stories. These different "languages" cause tension. Without respect and clear communication, the partnership becomes superficial.
Money also plays a role. Most grants favor projects promising quick, measurable results. This pressure makes scientists afraid to take risks. Instead of breaking down walls, this system often keeps researchers trapped within narrow specialties to ensure they get funded.

Comprehension:

Read the given passage carefully and answer the questions that follow.

The ozone layer is a part of the Earth's stratosphere that protects living beings from the sun's harmful ultraviolet (UV) radiation. It absorbs most of the UVB rays, which can cause skin cancer, eye problems like cataracts, and harm to crops and marine life. This protective layer is located about 15 to 30 kilometers above the Earth's surface and plays a vital role in keeping life safe.

Since the 1970s, scientists have discovered that the ozone layer is being damaged by ozone-depleting substances (ODS). These are human-made chemicals, such as chlorofluorocarbons (CFCs), used in refrigerators, air conditioners, and aerosol sprays. When these substances reach the stratosphere, they release chlorine and bromine atoms, which break down ozone molecules. One chlorine atom can destroy over 100,000 ozone molecules.

One major effect of ozone damage is the ozone hole over Antarctica, which appears every spring. Similar ozone thinning has also been observed in other parts of the world.

Technology is playing an increasingly important role in education. Many schools now provide students with laptops or tablets, and lessons are often supported by online tools and resources. This shift helps make learning more personalized, allowing students to study at their own pace. It also helps teachers track student progress and plan lessons more effectively.

However, technology in schools also brings challenges. Some students may get distracted, and not all schools have equal access to high-speed internet or proper devices. Research has also shown that simply using more technology does not always improve learning outcomes.

To make technology truly helpful, schools need clear goals and proper training for teachers. It's also important to ensure that all students have equal opportunities to use digital tools. When used wisely, technology can support creativity, improve communication, and prepare students for the modern world.

Comprehension:

Read the passage carefully. Answer the questions given below.

Tsunamis, commonly misnamed tidal waves despite having no connection to tides, are powerful ocean waves generated by underwater disturbances such as earthquakes, volcanic eruptions, or landslides. These waves travel at extraordinary speeds across open ocean, often exceeding five hundred miles per hour, yet remain barely noticeable to ships due to their long wavelengths and low amplitude in deep water. As tsunamis approach shallow coastal areas, their speed decreases while wave height increases dramatically, sometimes reaching over one hundred feet. The 2004 Indian Ocean tsunami demonstrated the catastrophic potential of these events, claiming over two hundred thousand lives across multiple countries. Early warning systems now monitor seismic activity and ocean conditions to provide coastal populations with evacuation time, though effectiveness depends on proximity to the disturbance source and public preparedness. Coastal development in tsunami-prone regions raises difficult questions about balancing economic growth with disaster vulnerability.

Comprehension:

Read the passage carefully and answer the questions that are given below.

Water is an essential natural resource, yet it is becoming increasingly scarce in many parts of the world. Due to rapid population growth, pollution, and the effects of climate change, billions of people face daily challenges in accessing clean and safe drinking water. According to the United Nations, this crisis is expected to worsen unless immediate action is taken.
The consequences of water scarcity are severe and far-reaching. It leads to the spread of diseases, poor sanitation, and reduced agricultural productivity. Environmental damage such as the drying up of rivers and wetlands also affects biodiversity and increases the risk of natural disasters like droughts and floods.
Addressing this issue requires both individual and collective efforts. People can conserve water by using it responsibly at home, fixing leaks, and supporting sustainable gardening practices. Governments must implement strong water policies and promote fair distribution to ensure clean water is available for future generations.

Comprehension:

Read the given passage carefully and answer the questions that follow.
Sociologists argue that domestic labor—tasks like caregiving and household management—occupies a strange place in our world. These activities are essential for society to function, yet they remain "invisible" in economic reports. Because this work is often unpaid and mostly performed by women, it is systematically undervalued. This creates a social imbalance: we treat paid office work as "real" productivity while treating home labor as secondary.
Public policy is slowly changing to address this. Government programs like parental leave and childcare subsidies show that attitudes are shifting. However, many policies still fail because they assume every family follows a traditional structure. Cultural norms also play a role. Media representations often praise caregiving as a "moral virtue" or a "kind act," but they rarely frame it as a skilled job requiring expertise and intelligence.
Reframing domestic labor means recognizing its true social value. It is not just a personal task; it is a contribution that sustains families and communities. If we value care as much as we value wages, we can challenge inequality and redefine what it means to contribute to society.

Comprehension:

Read the given passage carefully and answer the questions that follow.
For a long time, museums were seen as the ultimate experts on history. They decided which stories were important, often focusing only on powerful cultures. Today, however, many people are questioning whose history is being told and whose is being ignored. This has forced museums to rethink how they show the past.
One major debate is about repatriation or returning items to their original homes. Many artifacts were taken during colonial times. To the cultures they came from, these items are more than just art; they are part of their identity and spirit. Museums are now learning to share ownership or return these items, proving that "keeping things safe" is not always a good enough reason to own them forever.
Museums are also becoming more interactive. Visitors want to participate in the story, not just look at objects. Using digital tools and community-made exhibits, museums are trying to make history more inclusive. While some worry this makes museums less "serious", others believe it makes them more relevant. Museums are moving from being quiet monuments of the past to active spaces for conversation.

For years, a long, dull grey wall separated the school from the marketplace. Students passed it daily, barely noticing its presence. One morning, a teacher brought cans of paint and brushes, inviting students to paint anything they wished. At first hesitant, a few students began sketching trees, birds, and stars. Within a week, the wall had become a riot of colours—depicting local heroes, folk tales, and dreams. The community stopped to look. Shopkeepers smiled. Even strangers paused to take photos. The wall, once ignored, became a symbol of imagination. “It’s still a wall,” said the headmaster, “but now, it speaks.” More than decoration, it inspired students to express themselves and reminded adults that creativity doesn’t need permission. What was once silent now told a story—not in words, but in colour.

अपने कदमों से बुलंदियाँ हासिल करने का सपना देखने वाली अवनि साल 2012 में हुई दुर्घटना के चलते सीधे व्हीलचेयर (Wheelchair) पर आ गई। नियति को तो शायद कुछ और ही मंजूर था। पर 12 साल की उम्र में पैरालिसिस का दंश झेलने वाली अवनि यहाँ रुकने वाली नहीं थी। दुर्घटना के महज तीन साल बाद ही अवनि ने अभिनव बिंद्रा से प्रेरित होकर शूटिंग को अपने जीवन का लक्ष्य बनाया और 5 साल के अंतराल में ही उसने 'गोल्डन गर्ल' का तमगा हासिल कर लिया। राजधानी जयपुर की रहने वाली, पिज्जा, चॉकलेट, आइसक्रीम की शौकीन अवनि को गोवा, दुबई जैसी जगहों में घूमना बहुत पसंद है। दुर्घटना से पहले वह बहुत सक्रिय थी और स्कूल की हर गतिविधि में भाग लेती थी, पर दुर्घटना ने उसकी जिंदगी बदल दी। उसने स्वयं को एक कमरे में बंद कर लिया था। उसका आत्मविश्वास लगभग समाप्त हो चुका था। वह अपनी हालत पर गुस्से में थी और किसी से बात नहीं करना चाहती थी। किंतु उसके माता-पिता ने हार नहीं मानी और उसे निरंतर प्रेरित करते रहे। उसके पिता ने अभिनव बिंद्रा की बायोग्राफ़ी लाकर उसे दी। बदलाव के लिए, उसे जयपुर के जगतपुरा में जेडीए शूटिंग रेंज में ले जाया गया। यह उसे मिली निरंतर प्रेरणा तथा प्रोत्साहन का ही परिणाम था कि उसकी रुचि शूटिंग में पैदा हुई।

अपने कदमों से बुलंदियाँ हासिल करने का सपना देखने वाली अवनि साल 2012 में हुई दुर्घटना के चलते सीधे व्हीलचेयर (Wheelchair) पर आ गई। नियति को तो शायद कुछ और ही मंजूर था। पर 12 साल की उम्र में पैरालिसिस का दंश झेलने वाली अवनि यहाँ रुकने वाली नहीं थी। दुर्घटना के महज तीन साल बाद ही अवनि ने अभिनव बिंद्रा से प्रेरित होकर शूटिंग को अपने जीवन का लक्ष्य बनाया और 5 साल के अंतराल में ही उसने 'गोल्डन गर्ल' का तमगा हासिल कर लिया। राजधानी जयपुर की रहने वाली, पिज्जा, चॉकलेट, आइसक्रीम की शौकीन अवनि को गोवा, दुबई जैसी जगहों में घूमना बहुत पसंद है। दुर्घटना से पहले वह बहुत सक्रिय थी और स्कूल की हर गतिविधि में भाग लेती थी, पर दुर्घटना ने उसकी जिंदगी बदल दी। उसने स्वयं को एक कमरे में बंद कर लिया था। उसका आत्मविश्वास लगभग समाप्त हो चुका था। वह अपनी हालत पर गुस्से में थी और किसी से बात नहीं करना चाहती थी। किंतु उसके माता-पिता ने हार नहीं मानी और उसे निरंतर प्रेरित करते रहे। उसके पिता ने अभिनव बिंद्रा की बायोग्राफ़ी लाकर उसे दी। बदलाव के लिए, उसे जयपुर के जगतपुरा में जेडीए शूटिंग रेंज में ले जाया गया। यह उसे मिली निरंतर प्रेरणा तथा प्रोत्साहन का ही परिणाम था कि उसकी रुचि शूटिंग में पैदा हुई।

Comprehension:

Read the given passage carefully and answer the questions that follow.

Biographies are often seen as windows into amazing lives, but they also show the values of the time they were written. A book from the 1800s might focus on "good character", while a modern book might focus on mental struggles. What a writer emphasizes tells us what society cares about at that moment.

The hardest part is balancing praise with honest criticism. If a writer admires someone too much, they might hide the person's flaws. However, focusing only on failures can distort why the person was important. A fair writer must consider the person's culture and circumstances.

Gathering information is also tricky. Private letters and diaries aren't always honest; people often write them to make themselves look better. Public speeches might hide secret doubts. A biographer must "read between the lines" to find the truth that was left out.

Today, many biographers are honest about what they don't know. Instead of a perfect story, they show a person's mistakes and uncertainties. This encourages readers to think critically. In the end, a biography is not just a list of events; it is an attempt to understand the complicated truth of a human life.

Comprehension:

Read the given passage carefully and answer the following questions.

From high above, the polar ice appears flat, white, and unchanged. It radiates a sense of calm and stability, yet beneath this frozen exterior, profound changes are unfolding. As the Earth warms, surface ice melts and sends meltwater deep into small cracks, widening them and weakening ice that has been frozen for thousands of years.

Over time, glaciers thin and floating ice shelves retreat, permanently reshaping the coastline. In some areas, small plants have even begun to take root in soil once locked beneath the ice for centuries. Scientists explain that these ice shelves act like a stopper in a bottle; they hold back the glaciers behind them, preventing them from sliding too quickly into the ocean. When these shelves weaken or shatter, the glaciers accelerate into the sea, reminding us that changes at the poles affect the entire planet.

Comprehension:

Read the given passage carefully and answer the questions that follow.
Inflation is often discussed using numbers, but its effects are deeply personal. When prices rise, households are affected in different ways. While general statistics might show a stable economy, individual experiences tell a different story. For low- and middle-income families, essential costs like food and housing take up a larger portion of their paycheck, making them more vulnerable.
Many people view inflation as a temporary problem caused by outside events. However, internal factors like supply chain issues and government policy also matter. When wages do not grow as fast as prices, purchasing power erodes. This leads to more debt and higher stress, affecting social wellbeing.
Governments often try to control inflation by changing interest rates. While this can slow down rising prices, it can also make it harder for people to find jobs or get loans. If leaders only look at the "big picture" of the economy, they may ignore how their choices increase inequality. Understanding inflation requires more than just looking at math; it requires looking at how wealth is distributed and how policies affect everyday life.

Comprehension:

Read the given passage carefully and answer the following questions.

Mobile phones have become an integral part of modern childhood, with many children using them at a very early age. Since most households rely on mobile devices for daily communication, children naturally gain access to these devices. Beyond making calls, children use phones for entertainment, such as playing games, listening to music, and watching videos.

While mobile phones help parents stay connected and ensure their child's safety, experts warn that unrestricted use can have harmful effects. Excessive screen time may reduce focus on schoolwork, limit physical activity, and disturb sleep patterns. These devices can also shorten attention spans and weaken real-life social skills.

For this reason, parental supervision is essential. Parents should establish clear boundaries, regularly monitor their children's online activities, and encourage responsible use of technology. By offering guidance and support, families can ensure that mobile phones serve as valuable resources instead of distractions.

23 अक्तूबर, 1938 ई. को हजारों की संख्या में सफ़ेद खादी के वस्त्र और टोपी पहने प्रदर्शनकारियों का एक समूह जेल में डाले गए नेताओं को रिहा कराने की माँग को लेकर त्रावणकोर के कोडियार महल की तरफ मार्च कर रहा था। उसे रोकने के लिए ब्रिटिश पुलिस अफसर ने जवानों को उन सब पर गोली चलाने का आदेश दिया। यह आदेश सुनते ही एक खुली जीप से एक महिला ने उतरकर अफसर को ललकारते हुए कहा, "मैं इनकी नेता हूँ। दूसरों को गोली मारने से पहले मुझे गोली मारो।" इतनी दिलेरी। पुलिस प्रशासन शायद इसके लिए तैयार न था, उसे अपना आदेश वापस लेना पड़ा और इतना बड़ा नरसंहार टल गया। यह वीरांगना थी- अक्कम्मा चेरियन। देश भर में उनके साहस की धूम मच गई और गांधी जी ने उन्हें 'त्रावणकोर की झाँसी की रानी' की उपाधि दी। भारत को स्वतंत्र देखने की इच्छा मन में सँजोए अक्कम्मा ने एक दिन अपनी प्रतिष्ठित नौकरी छोड़ दी और वर्ष 1938 में 'आवणकोर राज्य काँग्रेस' की सक्रिय सदस्य बन गईं। अक्कम्मा ने महिला स्वयंसेवी समूह 'देशसेविका संभ' की स्थापना की और महिलाओं को स्वतंत्रता आंदोलन में शामिल होने के लिए प्रेरित करना शुरू किया। अपनी आत्मकथा 'जीविथम ओरू समारम' (जीवन एक संघर्ष) की भूमिका में वे लिखती हैं- 'मेरे लिए यह जीवन, जो अन्यायपूर्ण और बेईमान है, उसके विरुद्ध संघर्ष है।'

Comprehension:

Read the following the passage and answer the given questions.
Every year, when the river near Meena's village swelled with monsoon rains, the old bamboo bridge was rebuilt by hand. Villagers gathered with ropes, logs, and laughter, tying each part carefully. Meena, just 14, had always watched from the banks. "It's too dangerous," her mother warned. But this year, when a log slipped and nearly fell, Meena dashed forward and caught it with surprising strength. The elders paused, then nodded approvingly. For the first time, she was allowed to help. Her hands shook, but her heart was steady. When the bridge was completed, Meena didn't just walk across it—she had built part of it. From then on, she stood taller, not because of pride, but because of belonging. The bridge wasn't only a way across the river. It was a link between generations, strength and trust, tradition and change.

Forests play a vital role in maintaining the balance of nature. They provide shelter for a wide variety of plants and animals and support rich biodiversity. Trees in forests absorb carbon dioxide from the atmosphere and release oxygen, which helps regulate the Earth's climate and maintain air quality. Forests also prevent soil erosion by holding the soil together with their roots. In addition, they influence rainfall patterns and help maintain water cycles in many regions. Millions of people around the world depend on forests for resources such as food, medicine, and raw materials. However, rapid deforestation caused by human activities such as logging, urban expansion, and agriculture has become a serious environmental concern. If forests continue to disappear at the current rate, it may lead to loss of biodiversity and climate imbalance. Therefore, protecting forests is essential for sustaining life and ensuring environmental stability for future generations.

अक्सर हम घर को सजाने के लिए दीवारों पर सुंदर पेंटिंग्स या तस्वीरें लगा देते हैं, लेकिन क्या आप जानते हैं कि वे केवल सजावट की वस्तु नहीं हैं? वास्तु शास्त्र के अनुसार, हर तस्वीर एक विशिष्ट ऊर्जा पैदा करती है, जो आपके मानसिक स्वास्थ्य, रिश्तों और आर्थिक स्थिति पर गहरा असर डालती है। एक घर सिर्फ ईंट, पेंट और फर्नीचर से नहीं बनता। यह एक जीवंत स्थान है जो हमारी भावनाओं, यादों और प्राण-ऊर्जा से जुड़ा होता है। इस ऊर्जा को सबसे खामोश, लेकिन सबसे प्रभावशाली तरीके से प्रभावित करती हैं-हमारी दीवारों पर लगी तस्वीरें और पेंटिंग्स। अक्सर हम सजावट अनजाने में करते हैं। किसी गैलरी से पसंद आई पेंटिंग ले आए, सीढ़ियों के बगल वाली दीवार को एस्थेटिक लुक देने के लिए परिवार दोस्तों के साथ बिताए खुशनुमा पलों का कोलाज बना दिया या पूर्वजों की तस्वीरों को सहेज दिया। ये फ्रेम घर के खालीपन को तो भर देते हैं, लेकिन क्या आपने कभी सोचा है कि ये तस्वीरें आपके घर की ऊर्जा और आपके आसपास परिवेश को सकारात्मक या नकारात्मक बनाने की भी भूमिका निभाते हैं। यही कारण है कि घर में लगने वाली तस्वीरों का चुनाव खूब सोच-समझकर करने की सलाह दी जाती है।

पवित्र काशी में महाशिवरात्रि का पर्व एक साधारण धार्मिक उत्सव न होकर आध्यात्मिक महापर्व बन जाता है। फाल्गुन कृष्ण चतुर्दशी की यह रात्रि शिव और शक्ति के दिव्य मिलन की रात्रि मानी जाती है। यह वह रात्रि है जब साधक जागरण कर अपने भीतर के अज्ञान अंधकार को दूर करता है और चेतना को ऊर्ध्वगामी बनाता है। काशी की महाशिवरात्रि का दृश्य अद्वितीय होता है। विश्वनाथ धाम में रात्रि-भर जल, दूध, बेलपत्र और भस्म से अभिषेक होता है। रुद्राभिषेक, महामृत्युंजय जप, शिवपुराण पाठ और अखंड कीर्तन से पूरा वातावरण गुंजायमान हो उठता है। साधु, संत, गृहस्थ, विद्यार्थी और वृद्ध सभी हर-हर महादेव के उद्घोष में लीन दिखाई देते हैं। काशी में महाशिवरात्रि केवल एक दिन का पर्व नहीं, बल्कि एक अनुभूति है, जिसमें बाहरी और आंतरिक दोनों यात्राएं साथ-साथ चलती हैं। महाशिवरात्रि का संदेश अत्यंत गहरा है। शिव हमें सिखाते हैं कि विष को कंठ में धारण कर भी लोककल्याण किया जा सकता है, कि अहंकार का त्याग ही सच्ची साधना है और कि संतुलन ही जीवन का सार है। काशी की महाशिवरात्रि हमें स्मरण कराती है कि शिव केवल मंदिरों में नहीं, बल्कि प्रत्येक प्राणी के अंत:करण में निवास करते हैं।

Comprehension:

Read the given passage carefully and answer the questions that follow.

Water is one of the most valuable natural resources on Earth. It is essential for the survival of all living organisms, including plants, animals, and humans. Despite its importance, many regions of the world are facing serious water shortages due to population growth, pollution, and excessive use of water resources. Rivers, lakes, and groundwater sources are often overused for agriculture, industries, and domestic purposes. When water is wasted or contaminated, it becomes difficult for communities to meet their basic needs. Therefore, conserving water has become an important responsibility for individuals and governments alike. Simple actions such as repairing leaking taps, using water carefully, and protecting water bodies from pollution can make a significant difference. In addition, governments are promoting rainwater harvesting and sustainable water management practices. If people learn to use water wisely, it will help ensure that future generations also have access to this vital resource.
