Read the given passage carefully and answer the questions that follow.

Water is one of the most valuable natural resources on Earth. It is essential for the survival of all living organisms, including plants, animals, and humans. Despite its importance, many regions of the world are facing serious water shortages due to population growth, pollution, and excessive use of water resources. Rivers, lakes, and groundwater sources are often overused for agriculture, industries, and domestic purposes. When water is wasted or contaminated, it becomes difficult for communities to meet their basic needs. Therefore, conserving water has become an important responsibility for individuals and governments alike. Simple actions such as repairing leaking taps, using water carefully, and protecting water bodies from pollution can make a significant difference. In addition, governments are promoting rainwater harvesting and sustainable water management practices. If people learn to use water wisely, it will help ensure that future generations also have access to this vital resource.

Comprehension:

Read the passage carefully. Answer the questions given below.
Erosion, the gradual removal of soil and rock by water, wind, ice, and gravity, shapes landscapes and poses challenges for human land use. While erosion occurs naturally over geological timescales, human activities dramatically accelerate these processes. Deforestation removes vegetation that anchors soil with root systems and shields ground from rainfall impact. Agricultural practices that leave soil exposed between planting seasons make fields vulnerable to wind and water erosion. Construction and mining operations disturb large areas, creating loose material easily transported by weather. Coastal erosion threatens communities and infrastructure as waves and currents remove beach sand and undermine cliffs. The consequences extend beyond immediate land loss; eroded sediment pollutes waterways, smothering aquatic habitats and filling reservoirs. Nutrient-rich topsoil, which takes centuries to form naturally, disappears within years under intensive use without proper conservation. Erosion control requires multiple strategies including maintaining vegetative cover, contour plowing, terracing steep slopes, and installing physical barriers.

निम्नलिखित गद्यांश को ध्यानपूर्वक पढ़कर पूछे गए प्रश्नो के लिए सही विकल्प चुनकर लिखे
तुम्हें क्या करना चाहिए, इसका ठीक-ठीक उत्तर तुम्हीं को देना होगा, दूसरा कोई नहीं दे सकता। कैसा भी विश्वास-पात्र मित्र हो, तुम्हारे इस काम को वह अपने ऊपर नहीं ले सकता। हम अनुभवी लोगों की बातों को आदर के साथ सुनें, बुद्धिमानों की सलाह को कृतज्ञतापूर्वक मानें, पर इस बात को निश्चित समझकर कि हमारे कामों से ही हमारी रक्षा व हमारा पतन होगा। हमें अपने विचार और निर्णय की स्वतंत्रता को दृढ़तापूर्वक बनाए रखना चाहिए। जिस पुरुष की दृष्टि सदा नीची रहती है, उसका सिर कभी ऊपर न होगा। नीची दृष्टि रखने से यद्यपि रास्ते पर रहेंगे, पर इस बात को न देखेंगे कि यह रास्ता कहाँ ले जाता है। चित्त की स्वतंत्रता का मतलब चेष्टा की कठोरता या प्रकृति की उग्रता नहीं है। अपने व्यवहार में कोमल रहो और अपने उद्देश्यों को उच्च रखो, इस प्रकार नम्र और उच्चाशय दोनों बनो। अपने मन को कभी मरा हुआ न रखो। जो मनुष्य अपना लक्ष्य जितना ही ऊपर रखता है, उतना ही उसका तीर ऊपर जाता है। स्वामी विवेकानंद कहते हैं कि जीवन में एक ही लक्ष्य बनाओ और अपनी पूरी शक्ति लगाकर जुट जाओ, उस लक्ष्य की प्राप्ति के लिए; सफलता अवश्य आपके कदम चूमेगी। असल में जब आप कोई कर्म करते हैं, तो ज़रूरी नहीं कि आपको सफलता मिल ही जाए, लेकिन आपको असफलताओं से घबराना नहीं चाहिए। अगर बार-बार भी असफलता हाथ आती है, तो भी आपको निराश नहीं होना है। एक हज़ार बार प्रयास करने के बाद यदि आप हारकर गिर पड़े हैं, तो एक बार फिर से उठें और प्रयास करें। हमें लक्ष्य की प्राप्ति तक स्वयं पर विश्वास और आस्था रखनी चाहिए और अपनी सोच को हमेशा सकारात्मक रखना चाहिए।

Comprehension:

Read the given passage carefully and answer the questions that follow.

Electricity has become an essential part of modern life, supporting communication, transportation, and daily comfort. A day without electricity can disrupt routines and highlight human dependence on technology. Without power, homes remain dark, electronic devices stop working, and access to information becomes limited. Students struggle to attend online classes, while offices face delays in completing tasks. Household activities such as cooking, storing food, and pumping water also become difficult. At the same time, people may spend more time talking face to face and observing their surroundings. Such an experience reminds individuals of the value of natural resources and careful energy use. Therefore, a day without electricity reveals both the challenges of modern dependence and the importance of responsible consumption. It also encourages people to appreciate simple living and reduce unnecessary energy waste. Such moments can inspire long-term awareness about sustainable habits.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Electricity has become an essential part of modern life, supporting communication, transportation, and daily comfort. A day without electricity can disrupt routines and highlight human dependence on technology. Without power, homes remain dark, electronic devices stop working, and access to information becomes limited. Students struggle to attend online classes, while offices face delays in completing tasks. Household activities such as cooking, storing food, and pumping water also become difficult. At the same time, people may spend more time talking face to face and observing their surroundings. Such an experience reminds individuals of the value of natural resources and careful energy use. Therefore, a day without electricity reveals both the challenges of modern dependence and the importance of responsible consumption. It also encourages people to appreciate simple living and reduce unnecessary energy waste. Such moments can inspire long-term awareness about sustainable habits.

Comprehension:

Read the given passage carefully and answer the questions that follow.
In the modern world, attention is a valuable resource. Unlike money, you cannot save it for later; it exists only in the moment. Today, institutions ranging from advertisers to schools compete aggressively to capture your focus. This competition has changed how we work, learn, and spend our free time.
Research shows that staying focused helps people understand ideas and stay calm. Sustained and focused cognitive engagement allows you to think more deeply. However, our world is full of interruptions. Phone notifications and digital noise fragment our focus, making it harder to concentrate. This affects schools, where learning risks becoming surface-level rather than reflective.
Many people think losing focus is just a personal failure of discipline. But this ignores the world around us. Work cultures today often require employees to respond to messages the moment they arrive. This expectation normalizes constant distraction. We must reframe attention as a shared responsibility. By redesigning environments that respect our mental limits, we can restore the conditions needed for deep thought. Attention, when protected, is not just a personal asset but a collective cognitive resource essential for everyone.

'साँच बराबर तप नहीं' सूक्ति में सत्य की महत्ता को स्वीकारा गया है। सच के मार्ग पर चलना अपने आप में तप है। तप का अर्थ है 'तपना'। सच का मार्ग सदैव कँटीला होता है, कठिन होता है। तप करने की ताकत रखनेवाला ही इस पर चल सकता है। तप वही कर सकता है जिसका हृदय साफ, निष्पाप व एकाग्रचित्त हो। सत्य मानव हृदय के गौरव का प्रतीक है। सच बोलनेवाले के मुखपर एक अलग तरह का तेज रहता है, ओज रहता है। ऐसा व्यक्ति निडर होता है व लोगों के दिल में जगह बनाता है । अप्रिय सत्य मनुष्य को कभी नहीं बोलना चाहिए। सत्य-असत्य की परिभाषा अपने आप में कुछ नहीं, परंतु कल्याण के लिए बोला गया झूठ भी सत्य है। सत्य का पालन करने के लिए सत्यवादी हरिश्चंद्र अपने पूरे जीवन की तपस्वी की तरह जीने पर मज़बूर हुए। तप और सत्य मिलकर मानव जीवन को विकास की राह पर अग्रसर करते हैं। सत्य की प्राप्ति ही कठोरतम तप है। यह संसार का वह सर्वोत्तम धर्म है जिसके बिना जीवन सारहीन हो जाता है। सत्य अटल है। लाख झूठ भी उसके समक्ष टिक नहीं सकते। झूठ बुलबुले की भाँति है जिसका अस्तित्व क्षणिक है। सच स्थायी है, चिरंतन है। एक सच को छुपाने के लिए बोलने पड़ते हैं और अंत में सौ झूठों का आवरण भेदकर सत्य बाहर निकल आता है। सत्य से व्यक्ति जितना मुँह मोड़ता है वह उतना ही पल-पल में सामने आता है। कठिन अवश्य है तप का मार्ग, परंतु कल्याणकारी है।

Comprehension:

Read the passage carefully and answer the questions that follow.

Books have always been an important source of knowledge and imagination. Long before the invention of modern technology, people depended on books to learn about history, science, culture, and human experiences. Reading books allows individuals to explore different ideas and perspectives beyond their immediate surroundings. It also strengthens language skills and improves critical thinking. When readers engage deeply with a text, they learn to analyse arguments, understand characters, and reflect on complex issues. In addition, books often inspire creativity by introducing readers to new worlds, cultures, and possibilities. Although digital media has become increasingly popular, books continue to play a vital role in education and personal development. Many educators believe that regular reading habits help students build concentration and intellectual curiosity. Therefore, encouraging students to read books regularly can contribute significantly to their academic growth and overall understanding of the world.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Many cities around the world are encouraging people to use bicycles instead of cars for short-distance travel. Cycling is not only an environmentally friendly means of transport but also a healthy form of exercise. When people ride bicycles, they reduce air pollution because bicycles do not produce harmful emissions like motor vehicles. In addition, cycling helps individuals maintain physical fitness and reduces the risk of health problems such as obesity and heart disease. To support this practice, several cities have created dedicated bicycle lanes that make cycling safer and more convenient for commuters. However, the success of such initiatives largely depends on public awareness and people's willingness to adopt sustainable habits. If more individuals choose bicycles for daily commuting, cities may experience cleaner air, less traffic congestion, and healthier communities. Therefore, promoting cycling is considered an important step toward creating sustainable and livable urban environments.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Bumblebees are large, fuzzy insects that have black and yellow stripes on their bodies. They are bigger and rounder than honeybees and fly in a slow, gentle way. Bumblebees are very important for nature because they help in pollination. When they sit on flowers to drink nectar, pollen sticks to their hairy bodies. As they move from one flower to another, they spread the pollen and help plants grow fruits and seeds. Many fruits and vegetables depend on bumblebees. Bumblebees live in small groups called colonies. A queen bee lays eggs, and the worker bees collect food and protect the nest. They usually build their nests in the ground or in thick grass. Bumblebees are not aggressive and sting only when they feel threatened. These small insects play a big role in keeping the environment balanced. Without bumblebees, many plants would not grow well and food production would decrease greatly.

Public libraries continue to play an essential role in modern society despite rapid technological advancements. They provide free access to books, newspapers, and digital resources for people from diverse economic backgrounds. Libraries also function as community spaces where individuals can study, attend workshops, or participate in cultural programs. In many regions, libraries help bridge the digital divide by offering internet access and basic computer training. Critics argue that online platforms have reduced the relevance of physical libraries. However, studies suggest that libraries have adapted by expanding digital collections and offering skill-based learning opportunities. Their role has shifted from mere book lending to knowledge facilitation. By promoting lifelong learning and informed citizenship, libraries contribute to social development. Ensuring adequate funding and public support is, therefore, necessary to maintain their relevance. In an increasingly information-driven world, libraries remain valuable institutions that encourage education, inclusion, and community engagement.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Tiny creatures are very small living beings that we often cannot see without help. They include insects, ants, bees, worms, and tiny organisms found in water and soil. Even though they are small, they play a very important role in nature. Some tiny creatures help plants grow by pollinating flowers. Others break down dead plants and animals, which keeps the soil healthy. Many birds and animals eat tiny creatures as food, so they are part of the food chain. Some tiny creatures, like bacteria, can cause diseases, but many others are useful to humans. For example, certain bacteria help in making curd and medicine. Tiny sea creatures also help keep oceans clean. These small beings may look weak, but they are strong in their own way. Without tiny creatures, the balance of nature would be disturbed, and life on Earth would not be the same for plants, animals, and humans.

Comprehension:

Read the given passage carefully and answer the following questions.

Regular physical activity is essential for maintaining a healthy lifestyle, and yoga plays a significant role in achieving this balance. This ancient discipline, rooted in centuries of tradition, strengthens the body while improving mental stability. Through controlled breathing, stretching, and mindful movements, it builds flexibility and endurance. It also reduces stress and fosters a calm state of mind. Consistent practice sharpens concentration and encourages emotional balance in everyday life. By offering relief from the pressures of a demanding routine, yoga nurtures a sense of inner peace and overall well-being. In recent years, it has gained worldwide popularity, as awareness of health and wellness has grown considerably across communities. Many people adopt yoga for its positive effects on fitness, recovery, and long-term vitality. Ultimately, yoga offers something rarely found in a single practice: a simultaneous investment in the body, mind, and spirit.

Comprehension:

Read the following passage carefully and answer the questions based on it.

Hypertension, or high blood pressure, is a common health problem that affects many people around the world. It happens when the pressure of blood in the arteries stays too high for a long time. Many people do not feel sick, so they may not know they have it. If it is not treated, it can seriously harm the heart, brain, kidneys, and eyes. It can also lead to heart attacks and strokes. Some people may have headaches, feel dizzy, or feel very tired. Eating too much salt, not exercising, stress, and smoking can increase blood pressure. Being overweight can also raise the risk. Doctors suggest regular exercise, healthy food, less salt, and enough sleep to control it. It is important to check blood pressure often. With early treatment and simple healthy habits, hypertension can be controlled, and serious problems can be avoided for a better and safer life in future.

भारत का संविधान विश्व का सबसे बड़ा लिखित संविधान है, जो 26 जनवरी, 1950 को लागू हुआ था। इसे बनाने के लिए एक संविधान सभा का गठन किया गया था, जिसमें डॉ. भीमराव अंबेडकर को 'प्रारूप समिति' (Drafting Committee) का अध्यक्ष नियुक्त किया गया। इसी कारण उन्हें 'भारतीय संविधान का जनक' कहा जाता है। संविधान निर्माण का मुख्य उद्देश्य भारत को एक प्रभुत्व-संपन्न, लोकतांत्रिक और धर्मनिरपेक्ष गणराज्य बनाना था। इसमें नागरिकों को मौलिक अधिकार दिए गए हैं, जो समानता, स्वतंत्रता और न्याय सुनिश्चित करते हैं। डॉ. अंबेडकर ने समाज के वंचित और पिछड़े वर्गों के अधिकारों की रक्षा के लिए संविधान में विशेष प्रावधान किए। हमारा संविधान केवल एक कानूनी दस्तावेज नहीं है, बल्कि यह एक जीवित मार्गदर्शिका है जो विविधतापूर्ण भारत को एकता के सूत्र में पिरोए रखती है। संविधान को पूर्ण रूप से तैयार करने में 2 वर्ष, 11 महीने, 18 दिन लगे थे।

Comprehension:

Read the passage carefully and answer the following questions.

The Ganges River is one of the most significant rivers in India, sustaining millions of people across northern plains. Originating from the Gangotri Glacier in the Himalayas, it flows through several states before emptying into the Bay of Bengal. The river supports agriculture by providing fertile soil and irrigation facilities to vast farmlands. Major cities such as Varanasi and Prayagraj developed along its banks, reflecting its economic and cultural importance. For Hindus, the river holds deep spiritual significance and is regarded as sacred. Rituals, festivals, and daily prayers are performed along its shores throughout the year. However, rapid industrialization and population growth have caused serious pollution challenges. Government initiatives aim to clean and preserve the river's ecosystem. Despite environmental concerns, the Ganges remains a powerful symbol of faith, continuity, and life in Indian civilization, shaping history, tradition, and livelihoods for centuries. Recognized as a lifeline of the nation, the Ganges River continues to inspire collective efforts toward its conservation and sustainable future.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Since the Industrial Revolution, human activities such as burning coal, oil, and natural gas have increased carbon dioxide in the atmosphere. As a result, the Earth's average temperature has risen by more than one degree Celsius. This rise in temperature is known as global warming.

As temperatures increase, weather patterns change. Warmer air holds more moisture, causing heavier rainfall and flooding in some regions. At the same time, higher heat leads to evaporation, resulting in severe droughts and heat waves. Oceans are also warming, leading to stronger hurricanes and storms. Therefore, extreme weather events are becoming more frequent and intense.

Global warming also affects human health, wildlife, and economies. Melting ice, rising sea levels, and habitat loss threaten many species. Communities face damage to homes, crops, and infrastructure. Consequently, reducing greenhouse gas emissions and shifting to clean energy sources are necessary steps to protect our planet's future.

Comprehension:

Read the following passage carefully and answer the questions that are given below:-

Healthy food and junk food are different in their effects on our body and mind. Healthy food includes fruits, vegetables, whole grains, lean proteins, and nuts. These foods are rich in vitamins, minerals, and fiber that help our body grow and stay strong. In contrast, junk food is processed and contains large amounts of sugar, salt, and unhealthy fats. While healthy food provides essential nutrients, junk food offers empty calories with little nutritional value.

Another difference is their impact on health. Healthy food helps in weight management because it keeps us full longer and provides steady energy. On the other hand, junk food often leads to weight gain since it is high in calories and encourages overeating.

In conclusion, both types of food can satisfy hunger, but their long-term effects differ. Choosing healthy food supports better growth and well-being while eating junk food regularly can harm our body over time.

Comprehension:

Read the following passage carefully and answer the questions based on it.

Nutrients are important substances in food that help our body grow and stay healthy. Our body needs different types of nutrients every day. Carbohydrates give us energy to work, study, and play. Proteins help build muscles and repair body tissues. Fats give energy and keep our body warm, but we should eat them in small amounts. Vitamins and minerals protect us from diseases and keep our skin, bones, and eyes healthy. For example, calcium makes our bones strong, and vitamin C helps fight infections. Water is also a nutrient because it helps in digestion and keeps our body cool. Eating a balanced diet means taking all these nutrients in the right amounts. Fruits, vegetables, grains, milk, eggs, and pulses are good sources of nutrients. If we do not get enough nutrients, we may feel weak and tired. By eating healthy food daily, we can stay active, strong, and fully energetic.

Comprehension:

Read the following passage carefully and answer the questions that follow.

Water is the foundation of life, supporting people, farms, industries, and natural ecosystems. Yet population growth, climate change, and overuse are making clean water increasingly scarce worldwide. Freshwater forms less than three percent of Earth's water, and only a small portion is easily available for human use today around us.

Water conservation is important in daily life and does not require difficult changes. Fixing leaks, turning off taps, using buckets instead of hoses, and collecting rainwater can save significant amounts. Farmers and industries can use efficient irrigation, recycling, and treatment systems to reduce waste and energy use in communities everywhere.

Water conservation and management together help build a sustainable and secure future. Policies, rainwater harvesting, wastewater recycling, and groundwater protection maintain supplies for coming generations. Awareness about saving water is spreading through schools and social media, sometimes going viral and encouraging communities to act responsibly for the planet everywhere today.

Comprehension:

Read the passage carefully and answer the questions that follow.

A flock of birds struck an IndiGo Airbus that was preparing to take off from Patna airport on Monday morning, damaging one of its engines before departure. The pilot immediately applied emergency brakes and stopped the aircraft moments before take-off.
The incident has once again drawn attention to the airport, which has already been under scrutiny because of obstacles near its landing approach path. The Airbus A320, carrying 89 passengers and six crew members, had begun taxiing when several birds collided with the left side of the aircraft at around 8:05 a.m. The birds were possibly attracted by garbage dumped near the airport.
The pilot quickly halted the aircraft, which was reportedly moving at about 40 nautical miles (74 kmph). Flight 6E 385 was scheduled to depart at 8:10 a.m. for Delhi and then continue to Hyderabad, Bangalore, and Visakhapatnam. Fortunately, no one was injured. Passengers were evacuated and later accommodated on other IndiGo flights.

निम्नलिखित गद्यांश को ध्यानपूर्वक पढ़कर पूछे गये प्रश्नों के सही उत्तर दीजिए।
शिक्षा में समान अवसर किसी भी देश के समावेशी विकास के लिए अत्यंत आवश्यक हैं। शिक्षा व्यक्ति को न केवल ज्ञान प्रदान करती है, बल्कि उसे आत्मनिर्भर, जागरूक और जिम्मेदार नागरिक भी बनाती है। यदि समाज के कुछ वर्गों को आर्थिक कमजोरी, जाति, लिंग या भौगोलिक परिस्थितियों के कारण शिक्षा से वंचित रखा जाए, तो यह सामाजिक असंतुलन को जन्म देता है। आज भी अनेक ग्रामीण क्षेत्रों में विद्यालयों की कमी, प्रशिक्षित शिक्षकों का अभाव और तकनीकी संसाधनों की अनुपलब्धता एक बड़ी चुनौती बनी हुई है। इसके विपरीत शहरी क्षेत्रों में बेहतर सुविधाएँ आसानी से उपलब्ध हैं। इस असमानता को दूर करने के लिए सरकार द्वारा समान शिक्षा नीति, छात्रवृत्तियाँ, डिजिटल प्लेटफॉर्म और निःशुल्क शिक्षा जैसी योजनाएँ लागू की गई हैं। साथ ही समाज और परिवार की भूमिका भी महत्वपूर्ण है, क्योंकि शिक्षा के प्रति सकारात्मक दृष्टिकोण ही बच्चों को आगे बढ़ने की प्रेरणा देता है। वास्तव में, शिक्षा में समान अवसर सुनिश्चित करके ही एक न्यायपूर्ण, सशक्त और प्रगतिशील राष्ट्र का निर्माण संभव है।

Comprehension:

Read the following passage carefully and answer the questions that are given below:-

Land pollution happens when harmful materials contaminate the soil and damage the environment. Waste from homes, industries, agriculture, and mining can pollute the land. Landfills release gases like methane and produce toxic liquids called leachate that may seep into groundwater. Chemicals such as pesticides, heavy metals, and plastics also harm the soil and reduce its natural fertility.

The effects of land pollution are serious for both humans and wildlife. Animals can become trapped in litter or mistake plastic for food, which may lead to injury or starvation. People living near dumpsites face health risks such as respiratory and heart diseases. Poor communities are often more vulnerable because waste facilities are more accessible to them and located nearby.

Reducing land pollution requires effort from everyone. Recycling, reusing materials, composting food waste, and practicing sustainable farming can protect soil health and ensure a cleaner future.

Q.19 Identify the tone of the passage.

Comprehension:

Read the following passage carefully and answer the questions that are given below:-

Land pollution happens when harmful materials contaminate the soil and damage the environment. Waste from homes, industries, agriculture, and mining can pollute the land. Landfills release gases like methane and produce toxic liquids called leachate that may seep into groundwater. Chemicals such as pesticides, heavy metals, and plastics also harm the soil and reduce its natural fertility.

The effects of land pollution are serious for both humans and wildlife. Animals can become trapped in litter or mistake plastic for food, which may lead to injury or starvation. People living near dumpsites face health risks such as respiratory and heart diseases. Poor communities are often more vulnerable because waste facilities are more accessible to them and located nearby.

Reducing land pollution requires effort from everyone. Recycling, reusing materials, composting food waste, and practicing sustainable farming can protect soil health and ensure a cleaner future.

Comprehension:

Read the passage carefully and answer the following questions.
Snowfall is a natural phenomenon that occurs when atmospheric temperatures fall below freezing and water vapour crystallises into ice particles. These delicate crystals combine to form snowflakes, each possessing a unique pattern shaped by humidity and temperature. Mountain regions such as the Himalayas and hill stations experience significant snowfall during the winter months. Snow-covered landscapes attract tourists who enjoy skiing, snowboarding, and scenic beauty. Besides its aesthetic appeal, snowfall plays an important ecological role by storing freshwater in the form of snowpack. When temperatures rise, melting snow feeds rivers and reservoirs, supporting agriculture and drinking water supplies. However, heavy snowfall can disrupt transportation, damage infrastructure, and isolate communities. Climate change has influenced snowfall patterns, causing irregular winter seasons in some areas. Thus, snowfall represents both natural beauty and environmental significance within the broader climate system. Understanding snowfall patterns is essential for weather forecasting, disaster preparedness, and sustainable water management.

Comprehension:

Read the passage carefully and answer the following questions.

Child labour remains a serious social issue affecting the dignity of millions of young people. Various reports suggest that many children engage in different forms of work during their early years. Some perform hazardous tasks in unsafe environments, while others become victims of trafficking, bonded labour, or exploitation by criminal groups. Such conditions harm their health and restrict opportunities for overall development.
It has often been noticed that families living below the poverty line are compelled to rely on children's earnings for basic needs such as food and shelter. Lack of awareness and limited access to quality education further worsen the situation.
Social and voluntary organisations spread awareness and support affected children. However, the problem continues to exist in many places. Weak enforcement of laws and negligent attitudes among employers, families, and authorities allow such exploitation to persist, highlighting the need for stronger action and greater social responsibility.

Social and voluntary organisations spread awareness and support affected children. However, the problem continues to exist in many places. Weak enforcement of laws and negligent attitudes among employers, families, and authorities allow such exploitation to persist, highlighting the need for stronger action and greater social responsibility.

SubQuestion No : 18

Q.18 Identify the overall tone of the passage from the options.

Comprehension:

Read the passage carefully and answer the following questions.

Child labour remains a serious social issue affecting the dignity of millions of young people. Various reports suggest that many children engage in different forms of work during their early years. Some perform hazardous tasks in unsafe environments, while others become victims of trafficking, bonded labour, or exploitation by criminal groups. Such conditions harm their health and restrict opportunities for overall development.
It has often been noticed that families living below the poverty line are compelled to rely on children's earnings for basic needs such as food and shelter. Lack of awareness and limited access to quality education further worsen the situation.

तानाशाह, जनमानस के जागरण को कोई महत्त्व नहीं देता। उसका निर्माण ऊपर से चलता है, किंतु यह लादा हुआ भार-स्वरूप निर्माण हो जाता है। सच्चा राष्ट्र-निर्माण वह है, जो जनमानस की तैयारी पर आधारित रहता है। योजनाएँ शासन और सत्ता बनाएँ, उन्हें कार्यरूप में परिणत भी करें; किंतु साथ ही उन्हें चिर-स्थायी बनाए रखने एवं उनकी पूर्णतया उद्देश्य-पूर्ति के लिए यह आवश्यक है कि जनमानस उन योजनाओं के लिए तैयार हो। स्पष्ट शब्दों में हम कह सकते हैं कि सत्ता, राष्ट्र-निर्माण रूपी फसल के लिए हल चलाने वाले किसान का कार्य तो कर सकती है, किंतु उसकी भूमि जनमानस को ही बनानी पड़ेगी।
जनमानस को तैयार करने के लिए समाचार-पत्र किस नीति और प्रणाली को अपनाएँ? यह प्रश्न अपने आप में एक विवाद लिए हुए है; क्योंकि भिन्न-भिन्न समाचार-पत्र भिन्न-भिन्न नीतियों को उद्देश्य बनाकर प्रकाशित होते हैं। यहाँ तक कि राष्ट्र-निर्माण की योजनाएँ भी उनके समक्ष भिन्न-भिन्न होती हैं।

Comprehension:

Read the passage carefully and answer the following questions.

Throughout history, women have endured severe oppression in male-dominated societies. Practices such as child marriage, restrictions on remarriage, and other discriminatory traditions reduced them to helplessness and silence. For centuries, they were viewed more as symbols of suffering than as sources of strength.
However, a remarkable transformation is gradually unfolding. Constitutional provisions in many nations have granted women equal rights in all spheres of life. No longer confined to domestic roles, women now excel in fields such as medicine, engineering, administration, the arts, and governance, actively participating in decision-making bodies.
This progress, though significant, represents an important milestone rather than the final destination. Contemporary women have developed greater confidence and self-awareness, challenging outdated stereotypes with determination. Their achievements have not only broken barriers but have also reshaped societal attitudes toward the education and empowerment of girls, fostering dignity and ambition from an early age.

Comprehension:

Read the passage carefully and answer the following questions.

There is one primary method through which we gain knowledge, and it appears to be the same for everyone, from the most ordinary individual to the most advanced expert. This method is known as concentration. Without focus, even great effort often fails to produce results. A scientist in a laboratory directs the full power of the intellect toward experiments, and through such focused effort, discoveries are made. Likewise, an astronomer turns a disciplined mind toward the telescope, gradually uncovering the mysteries of the universe. Concentration is the ability to channel one's mental energy toward a single objective while excluding distractions. When the mind is steady and attentive, it becomes sharper and better able to understand complex ideas. Even ordinary tasks improve under such focus. Whether earning a living, pursuing spirituality, or mastering a skill, concentration remains the key to deeper understanding.

There is one primary method through which we gain knowledge, and it appears to be the same for everyone, from the most ordinary individual to the most advanced expert. This method is known as concentration. Without focus, even great effort often fails to produce results. A scientist in a laboratory directs the full power of the intellect toward experiments, and through such focused effort, discoveries are made. Likewise, an astronomer turns a disciplined mind toward the telescope, gradually uncovering the mysteries of the universe. Concentration is the ability to channel one's mental energy toward a single objective while excluding distractions. When the mind is steady and attentive, it becomes sharper and better able to understand complex ideas. Even ordinary tasks improve under such focus. Whether earning a living, pursuing spirituality, or mastering a skill, concentration remains the key to deeper understanding.

Comprehension:

Read the following passage carefully and answer the questions based on it.

Among drinks, green tea is very popular because it is healthy and refreshing. One of the main reasons it is good for health is that it has special natural chemicals called catechins, which are very strong and help protect our body from damage caused by harmful tiny particles, called free radicals, every day. Catechins help stop damage to our cells caused by harmful tiny particles called free radicals. Free radicals can make people sick if they stay in the body for a long time. Drinking green tea regularly can reduce this damage and keep our body strong and healthy. Green tea also helps in digestion, keeps us active, and supports the heart. People often drink it in the morning or evening, sometimes with honey or lemon for better taste. Unlike sugary drinks, green tea has very few calories and no chemicals. Everyone can drink it to stay healthy and active.

Read the passage below and answer the questions that follow:
Despite its rugged reputation the Himalayas is a mosaic of fragile environments that face a range of challenges. It is the source of six of Asia's great rivers, including the Yangtze, Indus and Ganges, but changes in climate are affecting their flow. Melting glaciers and causing floods as glacial lakes burst their banks, whilst downstream water availability is becoming increasingly uncertain as unpredictable seasons bring either too much water or too little. Both the people and wildlife of the region depend on the natural resources of the Himalayas. Yet as human populations increase, people are using the resources faster than the Himalayas can replenish them. Forests are becoming fragmented, which is a serious problem for species like the tiger and elephant that need large territories to wander in. Consequently, people and wildlife are increasingly coming into contact as the wild spaces decrease, and human populations grow.

Despite its rugged reputation the Himalayas is a mosaic of fragile environments that face a range of challenges. It is the source of six of Asia's great rivers, including the Yangtze, Indus and Ganges, but changes in climate are affecting their flow. Melting glaciers and causing floods as glacial lakes burst their banks, whilst downstream water availability is becoming increasingly uncertain as unpredictable seasons bring either too much water or too little. Both the people and wildlife of the region depend on the natural resources of the Himalayas. Yet as human populations increase, people are using the resources faster than the Himalayas can replenish them. Forests are becoming fragmented, which is a serious problem for species like the tiger and elephant that need large territories to wander in. Consequently, people and wildlife are increasingly coming into contact as the wild spaces decrease, and human populations grow.

Comprehension:

Read the passage and answer the questions given below.

Agroforestry is an innovative farming practice that combines trees and shrubs with traditional crop and livestock production to create sustainable agricultural systems. Unlike conventional monoculture, agroforestry promotes biodiversity by integrating a variety of plant species, which helps improve soil fertility and reduces erosion. Trees planted alongside crops can also provide shade, act as windbreaks, and enhance water retention in the soil, contributing to better crop yields during dry periods. Additionally, this system supports wildlife habitats while producing timber, fruits, and fodder, making farms more economically resilient. Many communities around the world use agroforestry to combat climate change, as trees absorb carbon dioxide and help sequester carbon from the atmosphere. Farmers practicing agroforestry often report improved long-term soil health and increased resilience to extreme weather. Educational initiatives now emphasize agroforestry's role in sustainable agriculture, helping future generations adopt practices that balance productivity with ecological preservation.

Comprehension:

Read the given passage carefully and answer the questions that follow.

The Sagrada Familia is a famous basilica in Barcelona, Spain, designed by Catalan architect Antoni Gaudí. Construction began in 1882 and is still ongoing, yet the building attracts millions of visitors each year because of its remarkable architecture and cultural importance. Gaudí devoted the last fifteen years of his life entirely to this project. His design combines Gothic and Art Nouveau styles and features tall spires, detailed facades, and bright interiors filled with natural light. The basilica also reflects Gaudí's strong Christian faith, with three main facades—Nativity, Passion, and Glory—depicting different events from the life of Jesus Christ. One striking feature of the structure is its height; the tallest spire, dedicated to Jesus Christ, is planned to reach 172.5 meters. After Gaudí's death in 1926, construction continued despite setbacks such as damage during the Spanish Civil War. Supported by donations and ticket sales, the project continues today and remains a symbol of artistic innovation.

Q.17 **Which architectural styles influence the design of the Sagrada Familia?**

Comprehension:

Read the given passage carefully and answer the questions that follow.

The Sagrada Familia is a famous basilica in Barcelona, Spain, designed by Catalan architect Antoni Gaudí. Construction began in 1882 and is still ongoing, yet the building attracts millions of visitors each year because of its remarkable architecture and cultural importance. Gaudí devoted the last fifteen years of his life entirely to this project. His design combines Gothic and Art Nouveau styles and features tall spires, detailed facades, and bright interiors filled with natural light. The basilica also reflects Gaudí's strong Christian faith, with three main facades—Nativity, Passion, and Glory—depicting different events from the life of Jesus Christ. One striking feature of the structure is its height; the tallest spire, dedicated to Jesus Christ, is planned to reach 172.5 meters. After Gaudí's death in 1926, construction continued despite setbacks such as damage during the Spanish Civil War. Supported by donations and ticket sales, the project continues today and remains a symbol of artistic innovation.

Comprehension:

Read the passage and choose the correct answer to the questions based on it.

Dentistry is a branch of medicine focused on the evaluation, diagnosis, and treatment of the oral cavity and its maxillofacial structures. Far from being a mere cursory pursuit, oral health is an essential indicator of systemic well-being. The mouth acts as a gateway; periodontal diseases have been clinically linked to cardiovascular issues and diabetes, making the dentist a vital guardian of general health.

The field relies on a synthesis of surgical skill and material science. Procedures such as "endodontics" (root canal therapy) involve the meticulous removal of infected pulp to salvage the natural tooth structure, while orthodontics utilizes biomechanical forces to realign dental arches. Modern dentistry is currently undergoing a digital transformation, utilizing 3D imaging and biocompatible resins to enhance procedural accuracy. Despite these advancements, the primary challenge remains the "calcification" of dental plaque into tartar, necessitating a rigorous commitment to preventative care to avoid irreversible tissue degradation.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Beneath the earth's surface lies a force that recognises no boundaries. It erupts as earthquakes that strike without warning, causing fear and widespread damage. Such disasters make no distinction between a modern city and a simple village. Roads split apart, buildings collapse, and daily life is thrown into confusion as people rush to find safety. Essential services, such as transport, electricity, and gas supplies, are disrupted, making rescue work difficult. Fires may break out, adding to the chaos. Bridges and dams can fail, and deep cracks appear in busy streets, cutting off communication.
The destruction is not confined to land alone. Some earthquakes occur in remote areas, where casualties may be limited, yet their force can still be immense. When one occurs at sea, massive waves sweep inland. In mountainous regions, it can trigger avalanches that thunder into valleys below. No place on earth lies beyond its reach.

तितली और गौरैया प्रकृति के जीवंत रंगों के प्रतीक हैं। तितली का जीवनचक्र प्रकृति का चमत्कार है: अंडे से कैटरपिलर बनती है, जो पत्तियाँ चबाकर बढ़ती है। फिर कोकून में पुपा अवस्था, जहाँ जादुई परिवर्तन होता है। बाहर निकलते ही रंग-बिरंगे पंख फैलाती यह फूलों से अमृत चूसती है, परागण प्रक्रिया में सहायक बनती है। उद्यानों और जंगलों में इसकी उड़ान सौंदर्य बिखेरती है।
दूसरी ओर, गौरैया छोटी, चुस्त चिड़िया है। घरों के छतों पर घोंसला बनाकर अंडे देती है। चहचहाती हुई दाना चुगती है, कीड़े पकड़कर संतुलित पारिस्थितिकी बनाए रखती है। बच्चों को दाना खिलाती माँ गौरैया का दृश्य हृदयस्पर्शी है। तितली नाजुक होती है, हवा के झोंके में उड़ती है, वर्षा में पत्तियों पर छिप जाती है। गौरैया चंचल है, झुंड में उड़ान भरती है। दुर्भाग्य से, आधुनिक शहरीकरण ने दोनों को संकट में डाला—तितली को रासायनिक कीटनाशक, गौरैया को वायु प्रदूषण, प्लास्टिक और ऊँची इमारतों ने लुप्त होने की कगार पर ला दिया। निष्कर्षतः, तितली और गौरैया की रक्षा करना हमारा कर्तव्य है, तभी प्रकृति का संतुलन और सौंदर्य बरकरार रहेगा।

Comprehension:

निम्नलिखित गद्यांश को ध्यानपूर्वक पढ़कर पूछे गए प्रश्नों के लिए सही विकल्प चुनकर लिखे -

मानव जीवन में कुछ महान कर पाने की अदम्य लालसा ही महत्वाकांक्षा है। इस लालसा की पूर्ति का मार्ग परस्पर होड़ से जन्म लेता है। किसी अन्य से आगे बढ़ पाने की आकांक्षा बिना 'अन्य' के प्रति कठोर हुए नहीं पूर्ण की जा सकती। मनुष्य में आगे बढ़ने की जो भी स्वाभाविक इच्छा जन्म लेती है, उसके साथ अप्रत्यक्ष रूप से अन्य मानवों को पीछे छोड़ने की अदृश्य इच्छा भी जुड़ी रहती है। यदि सहृदय होकर इस पर विचार किया जाए तो इस प्रकार की समस्त प्रतिद्वंद्विता निष्ठुरता है, दूसरे के प्रति निर्ममता है, किंतु महानता को पाने के लिए यह निर्ममता या निष्ठुरता एक अनिवार्य दुर्गुण है। महत्वाकांक्षा वह प्रेरणा शक्ति है जो हमें अपने लक्ष्यों को प्राप्त करने के लिए प्रेरित करती है। जीवन में महत्वाकांक्षी होना आवश्यक है ताकि हमारे जीने के पीछे एक मकसद हो। बिना उद्देश्य के जीवन निरर्थक है। जीवन में कुछ करने या बनने का उद्देश्य हमें उसी को पूरा करने के लिए सकारात्मकता और साहस के साथ आगे बढ़ाता है। महत्वाकांक्षा वह प्रेरक शक्ति है जो मनुष्य को गतिशील एवं प्राणवान बनाती है और कर्म करते रहने की प्रेरणा देती है।

Comprehension:

Read the passage carefully and answer the following questions:
Understanding human structure and its needs helps people maintain a healthy life. Basic knowledge of anatomy and physiology allows individuals to make better decisions about food, exercise, and everyday habits. It is not necessary to be a medical expert to stay healthy, but awareness of how the body works can guide people toward a balanced lifestyle. The body requires several nutrients for proper development and functioning. Proteins support the repair and regeneration of tissues, while carbohydrates provide energy for daily activities. In addition, other key nutrients help maintain well-being and protect against illness. Calcium, for example, strengthens bones and teeth, while vitamins support vital biological processes. These nutrients can be obtained from foods such as grains, vegetables, fruits, dairy products, and other protein sources. Therefore, eating a balanced diet with a variety of foods is essential for lifelong health and disease prevention.

Comprehension:

Read the passage carefully. Answer the questions given below.
Hurricanes, also known as typhoons or cyclones depending on geographic location, represent nature's most powerful storm systems. These rotating weather phenomena form over warm ocean waters when atmospheric conditions align to create organized convection and sustained winds. The energy driving hurricanes comes from heat released as water vapor condenses, creating a self-reinforcing cycle that can produce winds exceeding two hundred miles per hour. Hurricane intensity depends on numerous factors including ocean temperature, atmospheric moisture, wind shear, and interaction with land masses. Climate change influences hurricane behavior in complex ways, with warmer oceans potentially fueling more intense storms while other atmospheric changes may affect formation frequency. Coastal populations face increasing hurricane risk as sea-level rise amplifies storm surge flooding, the most lethal hurricane hazard. Modern forecasting has improved dramatically, providing several days' warning for most storms, yet evacuation challenges persist in densely populated areas.

Comprehension:

गद्यांश के आधार पर अग्रलिखित प्रश्नों के उत्तर दीजिए।

पुराने लोग यह मानते थे कि काव्य एक दैवी शक्ति है और अपने आप व्यक्ति में उतर आती है। विकास के अगले चरण ने प्रतिभा को माना, इसे भी ईश्वर की कृपा के रूप में स्वीकार किया गया। अंतिम चरण में प्रतिभा को व्यक्ति की ध्याननिष्ठता के रूप में माना गया। काव्य की प्रेरणा का मूल स्रोत इस ध्यान निष्ठता में है। मूल प्रेरणा संवेदनात्मकता के बीज से कोमल बन कर फूटती है। उसी के पल्लवित होने पर अनेक प्रकार से वह काव्य का विशाल वृक्ष उपस्थित होता है, उसमें मनोहारिणी छाया करने की शक्ति होती है। यह संवेदनात्मकता सदैव सापेक्ष ही हो सकती है, क्योंकि जब तक किसी भी सम्बन्ध से भाव अपने क्षेत्र को छोड़ कर दूसरे क्षेत्र में नहीं आता, तब तक अभिव्यक्ति की आवश्यकता हो ही नहीं सकती। कौन सा व्यक्ति है जिसके भाव में नितान्त नि:संगत्व है। वह तो योगी में ही कहा जाता है।

SubQuestion No : 20

Q.20 किसके भाव में नितान्त नि:संगत्व हो सकता है?1086

Read the passage carefully and answer the questions that follow.

The Met office has updated its forecast after moderate rainfall on Monday morning. It stated that cloudy skies along with light to moderate rain may continue in the city for the next 48 hours. Earlier, weather officials had predicted that rainfall would stop for a few days from the beginning of the week in the city and nearby areas.
The rain reduced the day's maximum temperature to 28.3°C, which was four degrees below normal, compared with Sunday's 33°C.
An official from the Alipore weather office explained that meteorologists had expected the rain to stop because there was no cyclonic circulation and the monsoon trough seemed to be moving away from the city. However, the trough became stronger, which caused rainfall on Monday morning.
Currently, the trough passes through Daltanganj in Jharkhand, Bhagalpur in Bihar, and the central region of Bengal. Though it is not very close to Calcutta, its increased strength led to rainfall in the city.

Comprehension:

Read the given passage and answer the questions that follow.

Walking is one of the simplest forms of exercise and can be practiced by people of all ages. Unlike many other activities, walking does not require special equipment or training. It can be easily included in daily routines such as going to school, work, or the local market. A daily walk helps improve blood circulation, strengthens muscles, and keeps the body active. It also has positive effects on mental health, as walking in fresh air can reduce stress and improve mood. Many doctors recommend walking as part of a healthy lifestyle because it is safe and easy to maintain. When done regularly, walking can prevent several lifestyle-related diseases and contribute to overall well-being.

Comprehension:

गद्यांश के आधार पर अग्रलिखित प्रश्नों के उत्तर दीजिए।

मानवीय विकास के दौरान क्रमशः जंगलों की कटाई हो रही थी और खेती का इलाका बढ़ता जा रहा था। कुछ क्षेत्रों में यह परिवर्तन अन्य क्षेत्रों की अपेक्षा अधिक तेजी से और पूरे तौर पर हुआ। पर्यावरण में परिवर्तन के कारण ही वनवासियों को मजबूर होकर अपना स्थान छोड़ना पड़ा। कुछ और वनवासी जमीन की जुताई करने लगे और कृषक बन गए। कृषकों के ये नए समूह क्षेत्रीय बाजार, मुखियाओं, पुजारियों, मठों और मंदिरों से प्रभावित होने लगे। वे बड़े और जटिल समाजों के अंग बन गए। उन्हें कर चुकाने पड़ते थे और स्थानीय मालिक वर्ग की बेगार करनी पड़ती थी। परिणामस्वरूप किसानों के बीच आर्थिक और सामाजिक अंतर उभरने लगे। कुछ के पास ज्यादा उपजाऊ जमीन होती थी, कुछ लोग मवेशी भी पालते थे और कुछ लोग खेती से खाली समय में दस्तकारी आदि का कुछ काम कर लेते थे। जैसे-जैसे समाज में अंतर बढ़ने लगे, लोग जातियों और उपजातियों में बाँटे जाने लगे और उनकी पृष्ठभूमि और व्यवसाय के आधार पर उन्हें समाज में ऊँचा या नीचा दर्जा दिया जाने लगा। 1093

Comprehension:

Read the following passage and answer the questions given below-
Bioluminescence is the production of light by living organisms through chemical reactions within their bodies. This natural glow can be seen in creatures like fireflies, deep-sea fish, jellyfish, and some fungi. The light is typically blue or green, as these wavelengths travel best through water. In the ocean's depths—where sunlight doesn't reach—bioluminescence helps organisms hunt, hide, and communicate. Some fish use it to lure prey, while others flash patterns to confuse predators. Fireflies use it to attract mates, lighting up forests on summer nights. Scientists are now studying bioluminescence for medical applications, such as tracking cells or detecting diseases. Unlike man-made light, bioluminescent light generates no heat, making it energy-efficient. The phenomenon reminds us that evolution often finds creative solutions in darkness. Whether flickering in a field or glowing beneath the waves, bioluminescence reveals nature's ability to shine—not for spectacle, but for survival. It is beauty with purpose, a silent, glowing signal in the dark.

Comprehension:

Read the passage carefully. Answer the questions given below.
Desertification, the degradation of fertile land into arid desert, threatens food security and livelihoods across multiple continents. This process results from a combination of climate variability and unsustainable human practices including overgrazing, deforestation, and improper irrigation techniques that deplete soil moisture and nutrients. Unlike natural deserts that develop over geological timeframes, human-induced desertification can transform productive land within decades. The Sahel region of Africa exemplifies this crisis, where expanding desert boundaries have displaced communities and intensified resource competition. Soil erosion removes the topsoil essential for plant growth, while declining vegetation cover accelerates water runoff and reduces groundwater recharge. Once degradation reaches advanced stages, restoration becomes exponentially more difficult and expensive. Combating desertification requires integrated land management strategies including sustainable grazing practices, reforestation initiatives, soil conservation techniques, and community engagement. International cooperation proves essential, as desertification respects no political boundaries and its consequences, including migration and conflict, extend far beyond affected regions.

नैतिक मूल्य वे आदर्श और सिद्धांत हैं जो मनुष्य को पशुओं से अलग करते हैं और उसे एक सभ्य नागरिक बनाते हैं। सत्य, ईमानदारी, परोपकार, अनुशासन और बड़ों का सम्मान करना हमारे समाज की नींव हैं। जिस व्यक्ति के जीवन में नैतिक मूल्यों का अभाव होता है, वह भौतिक रूप से कितना भी समृद्ध क्यों न हो, समाज में वास्तविक सम्मान प्राप्त नहीं कर पाता। आज की गलाकाट प्रतिस्पर्धा और स्वार्थ की भावना के बीच नैतिक मूल्यों का महत्व और भी बढ़ गया है। शिक्षा का असली उद्देश्य केवल डिग्रियाँ प्राप्त करना नहीं, बल्कि चरित्र का निर्माण करना होना चाहिए। यदि बचपन से ही बच्चों में नैतिकता के बीज बोए जाएँ, तो वे भविष्य में न केवल सफल इंसान बनेंगे, बल्कि एक न्यायप्रिय और शांतिपूर्ण समाज का निर्माण भी करेंगे। अतः नैतिकता कोई बाहरी वस्तु नहीं, बल्कि अंतरात्मा की वह पुकार है जो हमें सही और गलत के बीच भेद करना सिखाती है।

Comprehension:

Read the passage carefully and answer the questions that follow.

Different systems of medicine are practised to treat illness and maintain health. Each follows its own principles and methods, yet they all aim to reduce suffering and improve well-being across diverse populations. Some approaches depend mainly on synthetic drugs and advanced technology, while others rely on natural remedies and traditional healing practices passed down through generations. Every system has its own strengths and limitations. Certain methods may provide quick relief, especially in acute conditions, while others focus on building natural resistance and long-term health. Natural treatments are often considered gentle, though they may take longer to show results, whereas modern treatments act faster but must be used carefully due to possible side effects. Since people have varying needs and beliefs, they may seek suitable forms of treatment. Understanding these medical disciplines therefore helps individuals make informed choices about maintaining health and managing illness more effectively.

Comprehension:

Read the following passage and answer the questions given below-
After his conquest of Kalinga, Emperor Ashoka witnessed such destruction and suffering that he underwent a profound transformation. The bloodshed haunted him. Choosing peace over war, Ashoka embraced Buddhism and devoted his reign to nonviolence, public welfare, and moral governance. He issued edicts carved on pillars and rocks across his empire—written in Prakrit using Brahmi script—spreading messages of compassion, tolerance, and respect for all religions. These inscriptions spoke not of military triumphs, but of planting trees, building hospitals, and treating even prisoners humanely. Ashoka became one of the earliest known rulers to promote ethical conduct as state policy. His ideals were so forward-thinking that India later adopted his emblem—the four lions—as its national symbol. Today, Ashoka stands not only as a powerful monarch but as a moral visionary. His reign marked a rare moment in history when power bowed to principle, and stone carried the weight of conscience instead of conquest.

Comprehension:

Read the passage carefully and answer the questions given below.

Air pollution constitutes a major public health crisis, causing millions of premature deaths annually through respiratory diseases, cardiovascular conditions, and cancer. Particulate matter, nitrogen oxides, sulfur dioxide, and ground-level ozone compromise air quality in urban centers worldwide, with sources including vehicle emissions, industrial processes, power generation, and agricultural activities. The health impacts fall disproportionately on vulnerable populations including children, elderly individuals, and those with pre-existing conditions, creating environmental justice concerns as poorer communities often face higher exposure levels. Beyond immediate health effects, air pollution reduces agricultural productivity, damages ecosystems through acid deposition, and contributes to climate change through emissions of greenhouse gases and short-lived climate pollutants. Addressing air quality requires integrated strategies targeting multiple pollution sources simultaneously. Transitioning to cleaner transportation, implementing stricter industrial emission standards, shifting to renewable energy, and modifying agricultural practices all play essential roles.

Comprehension:

Read the given passage carefully and answer the questions that follow:
It is becoming more common for governments to apologize for past wrongs, such as unfair laws or the mistreatment of certain groups. These apologies are meant to help a country heal and move toward reconciliation. However, people disagree on whether these apologies actually work.
Some critics argue that an apology is just a "symbolic" gesture. They believe that without new laws or financial help for victims, an official "sorry" offers a sense of closure without actually fixing the original problem. In these cases, the apology might just be for show.
On the other hand, supporters say that apologies are important because they admit the truth. By taking responsibility, a government stops ignoring or hiding the harm it caused. This helps change how the public remembers history and shows respect to people who were ignored in the past.
The success of an apology depends on how it is done. If the language is vague or defensive, people will doubt it. But if the apology is backed up by school programs or real policy changes, it is seen as sincere. An apology is not the end of the story; it is just the starting point for real change.

Comprehension:

Read the given passage carefully and answer the questions that follow:
It is becoming more common for governments to apologize for past wrongs, such as unfair laws or the mistreatment of certain groups. These apologies are meant to help a country heal and move toward reconciliation. However, people disagree on whether these apologies actually work.
Some critics argue that an apology is just a "symbolic" gesture. They believe that without new laws or financial help for victims, an official "sorry" offers a sense of closure without actually fixing the original problem. In these cases, the apology might just be for show.
On the other hand, supporters say that apologies are important because they admit the truth. By taking responsibility, a government stops ignoring or hiding the harm it caused. This helps change how the public remembers history and shows respect to people who were ignored in the past.
The success of an apology depends on how it is done. If the language is vague or defensive, people will doubt it. But if the apology is backed up by school programs or real policy changes, it is seen as sincere. An apology is not the end of the story; it is just the starting point for real change.

Comprehension:

Read the following passage carefully and answer the questions that follows.

Junk food is widely available, from brightly packaged snacks to fast-food outlets in busy neighborhoods. These products are usually high in sugar, salt, and unhealthy fats, while low in essential nutrients such as fibre, vitamins, and minerals. Teenagers need balanced diets to support growth, concentration, and energy throughout the day.

Although eating junk food occasionally may seem trivial, frequent consumption can damage health over time. Diets high in processed foods are associated with weight gain, fatigue, tooth decay, and poor concentration at school. Inadequate nutrition may also affect mood, sleep quality, and a teenager's ability to participate in physical activity.

Developing healthy eating habits requires knowledge and planning. Reading nutrition labels helps people compare products and limit excess sugar, salt, and saturated fat. Choosing fruits, vegetables, whole grains, and home-cooked meals provides lasting energy and supports overall wellbeing. Small, consistent improvements in daily food choices can produce lifelong health benefits.

Comprehension:

Read the passage and choose the correct answer to the questions based on it.

Fishing, or angling, is often perceived as a tranquil hobby, yet it is a sophisticated discipline requiring an intimate understanding of aquatic biology and fluid dynamics. Success depends on a fisherman's ability to mimic the prey's behavior using artificial lures or organic bait. This process is governed by the "optical properties" of water; a fisherman must select colors and vibrations that remain visible or detectable to fish at varying depths and turbidities.

Beyond the individual skill, the fishing industry is currently grappling with the ethics of "overfishing" and the destruction of marine habitats. This has led to the rise of Catch and Release—a conservation-minded practice aimed at preserving population numbers while maintaining the sport's recreational value. As global fish stocks face unprecedented pressure from climate change, the modern angler must transform from a mere harvester into balancing the thrill of the catch with a rigorous commitment to ecological sustainability.

Q.16 **Which title best encapsulates the shift in perspective discussed in the passage?**

Comprehension:

Read the passage and choose the correct answer to the questions based on it.

Fishing, or angling, is often perceived as a tranquil hobby, yet it is a sophisticated discipline requiring an intimate understanding of aquatic biology and fluid dynamics. Success depends on a fisherman's ability to mimic the prey's behavior using artificial lures or organic bait. This process is governed by the "optical properties" of water; a fisherman must select colors and vibrations that remain visible or detectable to fish at varying depths and turbidities.

Beyond the individual skill, the fishing industry is currently grappling with the ethics of "overfishing" and the destruction of marine habitats. This has led to the rise of Catch and Release—a conservation-minded practice aimed at preserving population numbers while maintaining the sport's recreational value. As global fish stocks face unprecedented pressure from climate change, the modern angler must transform from a mere harvester into balancing the thrill of the catch with a rigorous commitment to ecological sustainability.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Nitrogen pollution, though less publicized than carbon emissions, significantly damages ecosystems and human health. Nitrogen, essential for life, becomes problematic when human activities concentrate it beyond natural cycles' capacity to process. Fertilizer application, fossil fuel combustion, and livestock waste release reactive nitrogen compounds into environments. Excess nitrogen in waterways causes eutrophication, where algae blooms proliferate, depleting oxygen and creating dead zones where aquatic life cannot survive. Coastal dead zones now number in the hundreds globally, with some covering thousands of square miles. Atmospheric nitrogen compounds contribute to smog formation, acid rain, and particulate matter that causes respiratory diseases. Nitrogen oxides also function as greenhouse gases, contributing to climate warming. The nitrogen cycle has been altered as dramatically as the carbon cycle, yet receives far less policy attention. Agricultural practices account for the largest nitrogen releases, presenting challenges since food production requires nitrogen inputs.

Comprehension:

Read the following passage and answer the questions given below-
Ramesh, a postman in a remote Himalayan village, walks 24 kilometers daily to deliver letters. His route winds through forests, streams, and steep trails. He carries letters wrapped in plastic, shielding them from rain and snow. For over 20 years, he hasn't missed a single day—even during landslides or blizzards. Once, he carried a letter that reunited two estranged brothers after years. Another time, he delivered an exam admit card the night before the test, hiking by torchlight. Villagers call him "the bridge of hope." When asked why he keeps going, he smiles and says, "People wait for news. I can't let them down." Though technology has reached the towns, Ramesh's bag remains full. Not just of paper—but of trust, duty, and care. His story is not about distance, but dedication. In a world rushing toward speed, Ramesh walks—steadily, purposefully—delivering more than just mail. He delivers commitment, one step at a time.

Q.16 **What's unique about Ramesh's delivery?**

Comprehension:

Read the following passage and answer the questions given below-
Ramesh, a postman in a remote Himalayan village, walks 24 kilometers daily to deliver letters. His route winds through forests, streams, and steep trails. He carries letters wrapped in plastic, shielding them from rain and snow. For over 20 years, he hasn't missed a single day—even during landslides or blizzards. Once, he carried a letter that reunited two estranged brothers after years. Another time, he delivered an exam admit card the night before the test, hiking by torchlight. Villagers call him "the bridge of hope." When asked why he keeps going, he smiles and says, "People wait for news. I can't let them down." Though technology has reached the towns, Ramesh's bag remains full. Not just of paper—but of trust, duty, and care. His story is not about distance, but dedication. In a world rushing toward speed, Ramesh walks—steadily, purposefully—delivering more than just mail. He delivers commitment, one step at a time.

विज्ञान का मतलब क्या है? विज्ञान मानव सभ्यता और संस्कृति का एक रूप है। विज्ञान एक औजार बन गया है जिससे प्रकृति के रहस्यों को खोलने की कोशिश की जाती है। इस प्रक्रिया में उपजे ज्ञान को विज्ञान का नाम दिया गया है। विज्ञान वस्तुनिष्ठता है, क्रमबद्ध ज्ञान है, पूर्वाग्रहों से मुक्त ज्ञान का भंडार है- ऐसा कहा जाता है, किंतु दुर्भाग्य यह है कि पहले विज्ञान समाज का एक हिस्सा था और उसकी अन्य प्रक्रियाओं से जुड़ा हुआ था। विज्ञान को विकास से जोड़ा जाता है। आज विकास का अर्थ है, प्राकृतिक संसाधनों पर नियंत्रण। जिन आदिवासियों ने सदियों प्रकृति के साथ सम्मानजनक रिश्ता बनाए रखा, आज उन्हें अविकसित कहा जाता है और कहा जा रहा है कि उन्हें तरक्की में हमारी जरूरत है। हमारे विकास की परिभाषा मशीनीकरण, आधुनिकीकरण और औद्योगिकरण की पर्याय बन गई है। आधुनिक युग में विकास को नापने का पैमाना यह बन गया है कि हम पहले प्रकृति की प्रक्रियाओं पर किस हद तक नियंत्रण कर पाए हैं। 57

Comprehension:

Read the passage below and answer the questions that follow:
Indian art is spread over a subcontinent and has a long, very productive history; but it nevertheless shows a remarkable unity and consistency. Works produced in the several geographical and cultural regions possess decidedly individual characteristics but at the same time have sufficient elements in common to justify their being considered manifestations of a general style. The existence of this style is evidence of the essential cultural unity of the subcontinent and to the uninterrupted contact between the various geographical units, at least from the historical period onward. Developments in one area have been quickly reflected in the others. The regional idioms have contributed to the richness of Indian art, and the mutual influences exercised by them have been responsible for the multi-faceted development of that art throughout the course of its long life. Notably, the styles of Indian art are determined by conditions of time and space.

Comprehension:

Read the following passage carefully and answer the questions that follow.

Regular physical activity is one of the strongest predictors of long-term health. Research shows that people who move their bodies consistently have lower risks of heart disease, diabetes, certain cancers, weak bones, depression, and early death. Even moderate exercise, such as brisk walking, improves heart function, blood circulation, and energy use. The relationship is dose-related: more activity usually leads to greater health benefits, especially for previously inactive individuals.

Physical activity helps prevent and manage cardiovascular disease. Active people have lower blood pressure, healthier cholesterol levels, and stronger hearts. Exercise-based rehabilitation also reduces death rates in patients with existing heart problems. Regular movement improves insulin action, helping control blood sugar and lowering the risk of type two diabetes, particularly in overweight adults.

Exercise also supports bone strength, balance, and mental health. Weight-bearing activities slow bone loss and reduce fractures, while regular movement decreases stress, improves mood, and enhances quality of life.

Physical activity helps prevent and manage cardiovascular disease. Active people have lower blood pressure, healthier cholesterol levels, and stronger hearts. Exercise-based rehabilitation also reduces death rates in patients with existing heart problems. Regular movement improves insulin action, helping control blood sugar and lowering the risk of type two diabetes, particularly in overweight adults.

Exercise also supports bone strength, balance, and mental health. Weight-bearing activities slow bone loss and reduce fractures, while regular movement decreases stress, improves mood, and enhances quality of life.

श्रम मानव सभ्यता का मूल आधार है। प्राचीन काल से ही श्रम ने समाज को उन्नत बनाया है। भारतीय संस्कृति में श्रम को 'कर्मयोग' के रूप में पूजा जाता है, जैसा कि भगवद्गीता में श्रीकृष्ण ने अर्जुन को उपदेश दिया। श्रमिक, चाहे किसान हो, मजदूर हो या वैज्ञानिक, सभी राष्ट्र-निर्माण के नायक हैं। फिर भी, आधुनिक समाज में श्रम का सम्मान न्यून हो गया है। धनाढ्य वर्ग को ही श्रेष्ठ मानने की प्रवृत्ति ने श्रमिकों को हेय दृष्टि का शिकार बना दिया है। किसान वर्षा पर आश्रित होकर रात-दिन खेतों में पसीना बहाता है, ताकि हमारी थाली में अन्न पहुँचे। मजदूर ऊँची इमारतें खड़ी करता है, जो शहरों की शोभा बढ़ाती हैं। डॉक्टर रोगियों की सेवा में जीवन समर्पित करते हैं, इनका श्रम बिना सम्मान के व्यर्थ हो जाता है। श्रम का अपमान समाज का अपमान है। श्रम का सम्मान तभी संभव है जब शिक्षा प्रणाली में व्यावसायिक कौशल को महत्व दिया जाए। सरकारें श्रमिक कल्याण योजनाएँ लागू करें। प्रत्येक नागरिक श्रम की महत्ता समझे। तभी 'श्रमेव जयते' का मंत्र साकार होगा और राष्ट्र समृद्ध बनेगा।

Comprehension:

Read the following passage and answer the questions given below-
Rukmini Devi Arundale transformed Indian classical dance by lifting Bharatanatyam from temple courtyards to global stages. At a time when the dance was dismissed as archaic or even improper, she reimagined it as a powerful art form rooted in spiritual and aesthetic values. Rukmini Devi was the first woman to perform Bharatanatyam publicly in modern times, defying societal norms and criticism. She founded Kalakshetra in 1936, an academy dedicated to preserving and innovating Indian art. Her productions combined tradition with theatrical elegance, setting new standards. A pioneer, visionary, and artist, she brought dignity, discipline, and international respect to a once-misunderstood form. Rukmini Devi also championed animal rights, vegetarianism, and education, reflecting a holistic view of culture. Her legacy continues to inspire dancers and reformers alike. Through her, Bharatanatyam was no longer confined—it became celebrated. She danced not just with her body, but with conviction, giving voice to culture, courage, and quiet revolution.

Comprehension:

Read the following passage and answer the questions given below-
Standing in the courtyard of Qutub Minar in Delhi is the Iron Pillar—over 1,600 years old and a marvel of ancient metallurgy. Built during the reign of Chandragupta II (around 4th century CE), it is 7.2 meters tall and weighs over 6 tons. What baffles scientists is its resistance to rust despite centuries of exposure to rain and pollution. The iron used is almost pure and has a protective layer formed naturally over time. Historians believe the pillar may have originally stood in Udayagiri and was later moved to Delhi. Inscriptions in Sanskrit on the pillar mention its dedication to Lord Vishnu and praise the king's valor. The Iron Pillar is not just a tourist attraction—it's a reminder of India's advanced scientific knowledge long before modern tools existed. Today, it symbolizes a fusion of faith, technology, and timeless craftsmanship that continues to puzzle and inspire researchers across the world.

Comprehension:

Read the following passage and answer the questions given below-
At eight years old, Leela dreamed of flying. Her village lacked electricity, let alone a computer or aviation school. Yet she watched planes soar above the fields and folded paper into wings. Her father, a school janitor, brought her discarded science books. She read about thrust and lift by candlelight. One day, she wrote a letter to the Indian Air Force, asking how she could become a pilot. Months later, a reply came—simple, encouraging, and signed by a female officer. Inspired, Leela studied relentlessly, often waking before dawn. Years later, she stood on a runway, her name stitched on a real uniform. She wasn't just a pilot—she was the first from her village. Today, she visits rural schools, urging children to believe beyond boundaries. Her message: "Your dreams need wings, not wealth." Leela's story is not about flight alone—it's about rising above limits, one paper wing, one hope, and one brave letter at a time.

One of the most powerful aspects of travel is its ability to deepen our connection with humanity. Simple acts of kindness—sharing a smile, assisting a stranger, or chatting with locals—create moments of genuine warmth and raise our vibrations. These interactions help us appreciate the inherent goodness in people and the wonder of our interconnectedness with others.
On a recent trip to Kerala, I boarded a public bus for a short ride. A visibly stressed woman in her late thirties stood near my seat, clutching a heavy bag with one hand while gripping the railing with the other. Although there was space to set her bag down, she held onto it, lost in her worries.
Seeing her discomfort, I offered to hold her bag on my lap. Instantly, her tense expression softened into a radiant smile. She looked at me with joy, said a few grateful words, and placed her bag on the designated space.
This simple moment reminded me that when we operate from a place of joy and harmony, we naturally uplift others. Joy is contagious; by embodying compassion and positivity, we create ripples of happiness that can transform the energy and emotions of those around us.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Urbanization concentrates populations in cities, transforming landscapes and creating environmental challenges distinct from rural areas. Cities generate heat islands where temperatures exceed those of the surrounding countryside due to heat-absorbing surfaces like concrete and asphalt, reduced vegetation, and waste heat from vehicles and buildings. This temperature differential affects local weather patterns, energy consumption, and public health during heat waves. Urban areas consume vast resources including water, energy, and materials, while producing concentrated waste streams and pollution. Storm water management becomes problematic as impermeable surfaces prevent natural water infiltration, increasing flood risk and reducing groundwater recharge. However, cities also offer environmental advantages through efficiency gains from density. Compact development reduces per-capita land consumption and enables efficient public transportation systems that decrease individual vehicle use. Shared infrastructure and services require less total resource input than dispersed suburban development. The environmental impact of urbanization depends critically on planning and design choices.

Comprehension:

Read the below passage carefully and answer the questions that follow.
During the monsoon our small library becomes the busiest room in the neighbourhood. Rain drums steadily on the tin awning, creating a rhythm that seems to draw people indoors like a gentle summons. Children arrive first, shaking water from umbrellas and racing towards the comics shelf. Later come office workers who pretend they only need shelter, yet soon settle into chairs with novels open on their laps. The librarian moves quietly between tables, placing bookmarks and recommending titles with soft authority. Outside, streets flood and traffic stalls, but inside the atmosphere remains dry, warm, and oddly adventurous. Conversations bloom about distant countries, imaginary heroes, and forgotten histories. By afternoon the library feels less like a building and more like a vessel carrying us beyond the storm. When the clouds finally thin, nobody rushes away. The shared stillness teaches that stories provide refuge, proving that reading sometimes protects the mind more effectively than any umbrella could.

गद्यांश के आधार पर प्रश्न का उत्तर दें।
जीवन में सहजता का भाव न होने के वजह से अधिकतर लोग हमेशा ही असफल होते हैं। सहज भाव लाने ले लिए हमें एक तो नियमित रुप से योगासन, प्राणायाम और ध्यान करने के साथ ईश्वर का स्मरण अवश्य करना चाहिए। इससे हमारे तन, मन और विचारों के विकार बाहर निकलते हैं और तभी हम सहजता के भाव का अनुभव कर सकते हैं। याद रखने की बात है कि हमारे विकार ही अन्दर बैठकर असहजता का भाव उत्पन्न करते हैं। ईर्ष्या, द्वेष और परनिंदा जैसे गुण हम अनजाने में ही अपना लेते हैं और अंतत: जीवन में हर पल असहज होते हैं और उससे बचने के लिए आवश्यक है कि हम अध्यात्म के प्रति अपने मन और विचारों का रुझान रखें।

Comprehension:

Read the given passage carefully and answer the questions that follow.

During the monsoon, little Aarav would sit by the window with a stack of old newspapers. As the rain tapped gently against the glass, he folded paper boats—some neat, some lopsided. When the rain eased, he'd rush outside and release them into the flowing gutters. Neighbours often warned, "You'll catch a cold!" But he only smiled. One evening, a much older man stood watching. "You remind me of someone," he said softly, eyes distant. Aarav offered him a freshly made boat. The man took it, carefully placed it in the water, and whispered, "I used to do this too." Aarav beamed, not needing words to understand. Over the next few weeks, they folded boats together—old fingers and young ones, creasing memories into paper. The boats didn't go far, but they carried something real. Sometimes, a quiet tradition is enough to link one heart to another.

Comprehension:

Read the given passage and answer the questions that follow.
Public libraries have long been regarded as quiet spaces filled with books, but their role has evolved significantly over time. Today, libraries function as community learning centres that provide access not only to printed material but also to digital resources, workshops, and public discussions. For many students, libraries offer a distraction-free environment that supports focused study and independent learning. They also promote equal access to knowledge, especially for those who cannot afford private resources. In an era dominated by online information, libraries continue to serve as reliable spaces where information is curated rather than chaotic. Their continued relevance lies not in nostalgia, but in their ability to adapt to changing educational needs.

Comprehension:

Read the given passage carefully and answer the questions that follow.

Online learning has rapidly gained popularity, offering both benefits and challenges for students, educators, and institutions. One major advantage is flexibility. Students can access materials anytime and from anywhere, making it easier to balance education with work, family responsibilities, and other commitments. It also supports self-paced learning, allowing learners to revisit difficult concepts. Another benefit is accessibility. Online platforms provide a wide range of courses and specialized programs that may not be available locally. Multimedia content, interactive tools, and collaborative features enhance learning and support different learning styles. However, online learning presents challenges. The lack of face-to-face interaction can reduce immediate feedback, personal connection, and motivation, sometimes leading to isolation. Students must also demonstrate strong self-discipline and time management skills without a structured classroom environment. Technical issues, such as unreliable internet or limited digital skills, may disrupt learning. Balancing these advantages and challenges is essential for effective online education.

Comprehension:

Read the passage carefully. Answer the questions given below.
Volcanic eruptions rank among nature's most dramatic and destructive phenomena, capable of reshaping landscapes and affecting global climate patterns. When molten rock, gases, and debris are expelled from beneath Earth's surface, the consequences can be catastrophic for nearby populations. The 1815 eruption of Mount Tambora in Indonesia ejected such vast quantities of ash into the atmosphere that it caused global temperature drops, leading to widespread crop failures and famine across continents. Modern monitoring systems have improved eruption prediction, allowing authorities to evacuate vulnerable areas, yet the unpredictability of volcanic behavior means some level of risk remains unavoidable. Volcanic regions, despite their dangers, attract dense human settlement because volcanic soil is exceptionally fertile, supporting productive agriculture. The coexistence of human communities with active volcanoes demonstrates humanity's willingness to accept natural risks in exchange for economic benefits. Understanding volcanic processes helps scientists assess hazards, yet complete protection from these powerful geological forces remains impossible.

Comprehension:

Read the passage carefully and answer the questions given below.

Coral reefs, often called the rainforests of the sea, support extraordinary biodiversity despite occupying less than one percent of the ocean floor. These complex structures, built by tiny colonial organisms called polyps, provide habitat, breeding grounds, and food sources for roughly twenty-five percent of all marine species. Beyond their ecological significance, coral reefs protect coastlines from erosion and storm damage while supporting fishing industries and tourism that sustain millions of livelihoods globally. However, reefs face multiple existential threats, with ocean warming causing mass bleaching events that expel the symbiotic algae essential for coral survival. Ocean acidification, resulting from absorbed atmospheric carbon dioxide, weakens coral skeletons and impedes growth. Pollution, overfishing, and destructive fishing practices compound these stresses, leaving reefs vulnerable to disease and unable to recover from disturbances. Some scientists explore interventions including coral transplantation and selective breeding of heat-resistant varieties, yet these efforts remain experimental and limited in scale.

आज का समय बहुत अशांत है। मनुष्य के जीवन में अनेक उतार-चढ़ाव देखे जा रहे हैं। वह समझ नहीं पा रहा "कैसे जिया जाए'। वह एक ऐसी जीवन पद्धति की तलाश में है जो व्यवसायिक सफलता देने के साथ मानसिक शांति भी प्रदान करे। पुरानी जीवन पद्धति रास नहीं आ रही, साथ ही तकनीकी युग में व्यवहारिक भी प्रतीत नहीं होती। जहाँ वह पारिवारिक आनंद लेना चाहता है तब परिस्थितियों या सांसारिक कठिनाइयों के कारण बेबस नज़र आता है। युवाओं की सारी शक्ति कैरियर बनाने तथा नयी कुशलता अर्जित करने में निकल जाती है। जीवन में जीविका भी आवश्यक है। व्यस्तता इतनी है कि ना तो बच्चों को समय दे पाता है और न माता-पिता को। महिलायें भी कामकाजी होने के कारण बच्चों की परवरिश सम्बन्धी तकलीफ़ों का सामना कर रहीं हैं। बच्चों में सांस्कृतिक एवं नैतिक मूल्यों की स्थापना, रिश्तों में सामंजस्य तथा सामाजिक दायित्व निभाना आदि धीरे-धीरे विलुप्त होने के कगार पर है। इस संदर्भ में अंग्रेज़ी के कवि विलियम वर्ड्स वर्थ ने ठीक ही कहा है कि संसार में हम इतने खो गए हैं कि हमारे पास ज़िंदगी की ख़ूबसूरत चीज़ों को देखने का समय नहीं है।

Q.10 **In the following number-pairs, the second number is obtained by applying certain mathematical operations to the first number. Which numbers should replace X and Y so that the pattern followed by the two numbers on the left side of :: is same as that on the right side of :: ?**
(NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into their constituent digits. E.g. 13 – Operations on 13 such as adding / subtracting / multiplying, etc. to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)
X : 162 :: 131 : Y254

Ans
✗ 1. X=157, Y=126
✗ 2. X=167, Y=135
✗ 3. X=167, Y=121
✓ 4. X=167, Y=126

Q.11 **In the following number-pairs, the second number is obtained by applying certain mathematical operations to the first number. Select the set in which the numbers are related in the same way as are the numbers of the following sets.**
