Comprehension:

Read the following passage carefully and answer the questions that are given below:-

Land pollution happens when harmful materials contaminate the soil and damage the environment. Waste from homes, industries, agriculture, and mining can pollute the land. Landfills release gases like methane and produce toxic liquids called leachate that may seep into groundwater. Chemicals such as pesticides, heavy metals, and plastics also harm the soil and reduce its natural fertility.

The effects of land pollution are serious for both humans and wildlife. Animals can become trapped in litter or mistake plastic for food, which may lead to injury or starvation. People living near dumpsites face health risks such as respiratory and heart diseases. Poor communities are often more vulnerable because waste facilities are more accessible to them and located nearby.

Reducing land pollution requires effort from everyone. Recycling, reusing materials, composting food waste, and practicing sustainable farming can protect soil health and ensure a cleaner future.

भारतीय संविधान केवल एक कानूनी पुस्तक नहीं है, बल्कि यह करोड़ों भारतीयों की आशाओं और आकांक्षाओं का दर्पण है। इसे तैयार करने में 2 वर्ष, 11 महीने और 18 दिन का समय लगा। भारत का संविधान 'लिखित' होने के साथ-साथ 'लचीला' और 'कठोर' दोनों का अनूठा मिश्रण है। इसका अर्थ है कि इसमें आवश्यकतानुसार संशोधन किए जा सकते हैं, लेकिन इसकी मूल संरचना को नहीं बदला जा सकता। संविधान की 'प्रस्तावना' इसे एक संप्रभु, समाजवादी, धर्मनिरपेक्ष और लोकतांत्रिक गणराज्य घोषित करती है। यह दुनिया का सबसे विस्तृत संविधान है क्योंकि इसमें केंद्र और राज्यों के प्रशासन के साथ-साथ नागरिकों के अधिकारों और कर्तव्यों का भी विस्तार से वर्णन है। यह प्रत्येक नागरिक को कानून के समक्ष समानता का अधिकार देता है, चाहे उसका धर्म, जाति या लिंग कुछ भी हो। डॉ. बी.आर. अम्बेडकर को इस महान संविधान का मुख्य वास्तुकार माना जाता है।
