D. None

Q148 Reasoning

8 is related to 67 following a certain logic. Following the same logic, 6 is related to 39. To which of the following is 24 related to, following the same logic?

(NOTE : Operations should be performed on the whole numbers, without breaking down the numbers into its constituent digits. E.g. 13 – Operations on 13 such as adding / subtracting / multiplying etc. to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed)

A. 577

B. 579 ✓

C. 576

D. 580

Q149 Reasoning

In this question, a group of number/symbol is coded using letter codes as per the codes given below and the conditions which follow. The correct combination of codes following the conditions is your answer. If none of the conditions follow, then codes for the respective Number/Symbol to be followed directly as given in the table.

Numb er/sy mbol	@	2	5	?	9	!	*	4	+	3	#	7	\$	8
Code	J	L	Z	D	C	G	K	Q	P	H	T	A	E	F

Conditions –

- (i) If the first element is a symbol and the last element is a number, interchange the codes of the first and last elements.
- (ii) If the first element is an odd number and the last element is an even number, code both first and last elements as @.
- (iii) If both second and third elements are perfect squares, code the third element using the code of the second element.

2 # * 8 \$

A. LTDFE

B. LTKFJ

C. LTKFE

D. DTKFE

Q150 Reasoning

In this question, a group of number/symbol is coded using letter codes as per the codes given below and the conditions which follow. The correct combination of codes following the conditions is your answer. If none of the conditions follow, then codes for the respective Number/Symbol to be followed directly as given in the table.

Number/S ymbol	@	2	%	5	!	8	#	4	+	1
Code	H	M	Q	T	B	F	K	R	P	V

Conditions –

- (i) If the first element is a symbol and the last a number, the codes for these two (the first and the last elements) are to be interchanged.
- (ii) If the first element is an odd number and the last an even number, the first and last elements are to be coded as @
- (iii) If both second and third elements are perfect squares, the third element is to be coded as the code for the second element.

% 1 4 8 @

A. QRRFH

B. QVVFH

C. RQVFH

D. QVRFH
