## Quant

**Q1** Quant

A person planned his trip to a destination in the following way: 168 km by taxi at an average speed of 14 km/hr, 152 km by bus at an average speed of 19 km/hr, and the remaining 184 km by train at an average speed of 23 km/hr. What was his average speed for the entire journey?

- **A.** A. 16.4 km/hr
- **B.** B. 18 km/hr ✓
- **C.** D. 18.5 km/hr
- **D.** C. 20 km/hr

**Q2** Quant

A can complete a work in 26 days, and B can do the same work in 39 days. They work together for 13 days; what fraction of the work is left?

- **A.** $\frac{1}{3}$
- **B.** $\frac{1}{6}$ ✓
- **C.** $\frac{1}{4}$
- **D.** $\frac{1}{5}$

**Q3** Quant

A person travels from City A to City B at a speed of 48 km/hr. On the return journey, from City B to City A, the speed reduces to 32 km/hr due to some traffic. The average speed for his entire trip is:

- **A.** A. 38.4 km/hr ✓
- **B.** C. 38.1 km/hr
- **C.** B. 39.2 km/hr
- **D.** D. 39.8 km/hr

**Q4** Quant

A grocer bought sugar worth ₹9,000. He sold one-third of it at a gain of 10%. At what gain percentage must the remaining be sold to have a gain of 12% on the whole?

- **A.** D. 13% ✓
- **B.** C. 12%
- **C.** B. 14%
- **D.** A. 15%

**Q5** Quant

Find the least number which is exactly divisible by 3, 5, 10 and 15.

- **A.** D. 15
- **B.** B. 60
- **C.** A. 30 ✓
- **D.** C. 90

**Q6** Quant

If p : (q + r) = 2 : 5 and r : (p + q) = 1 : 3, then find q : (p + r).

- **A.** C. 8 : 13
- **B.** A. 7 : 13
- **C.** D. 13 : 15 ✓
- **D.** B. 13 : 3

**Q7** Quant

For any given dataset, which statement about mode is correct?

- **A.** C. It is always equal to median
- **B.** B. Mode may not exist or may not be unique ✓
- **C.** D. Mode always exists
- **D.** A. The Mode will always be zero

**Q8** Quant

The ratio of the ages of two friends is 5 : 6. If the sum of their ages is 44 years, find the difference of their ages.

- **A.** A. 2 years
- **B.** D. 4 years ✓
- **C.** B. 5 years
- **D.** C. 7 years

**Q9** Quant

By how much is 30% of 65 greater than 20% of 35?

- **A.** A. 12.5 ✓
- **B.** D. 7.5
- **C.** B. 9.5
- **D.** C. 14.5

**Q10** Quant

A and B working together can do a piece of work in 6 days. B alone can do the same work in 7 days. How long (in days) will A alone take to do thrice the work?

- **A.** A. 126 ✓
- **B.** C. 252
- **C.** B. 378
- **D.** D. 504

**Q11** Quant

₹8,913 is divided among X, Y, and Z such that if ₹28, ₹76, and ₹20 are deducted from their respective shares, the remaining amounts are in the ratio 9:2:6. Find X's share after the deduction.

- **A.** D. ₹4,653 ✓
- **B.** B. ₹4,603
- **C.** A. ₹4,753
- **D.** C. ₹4,803

**Q12** Quant

What smallest natural number should be added to 47105 so that the sum is completely divisible by 27?

- **A.** D. 10 ✓
- **B.** B. 15
- **C.** A. 12
- **D.** C. 8

**Q13** Quant

A shopkeeper fixes the marked price of an item at 40% above its cost price. What percentage of discount on the marked price should be allowed to gain 19%?

- **A.** A. 15% ✓
- **B.** B. 18%
- **C.** D. 13%
- **D.** C. 14%

**Q14** Quant

If the compound interest (compounded annually) on a sum of ₹y at 8% per year for 2 years is ₹832, what will be the amount after 2 years?

- **A.** ₹5,832 ✓
- **B.** ₹6,327
- **C.** ₹5,519
- **D.** ₹6,140

**Q15** Quant

AB is the diameter of a circle with center O. Point D lies on the circle such that OD is perpendicular to AB. Find the angle ∠BAD.

|---|---|---|---|---|---|
| No. of workers | 3 | 1 | 3 | 3 | 5 |

Find the arithmetic mean of the weight of the workers (in kg) using the Direct method.

- A. 71
- B. 75
- C. 76 ✓
- D. 78

**Q8** Quant

A starts a business with ₹9,49,984 and after 5 months, B joins with A as his partner. After a year, the profit is divided in the ratio 4 : 5. What is B's contribution in the capital?

- A. ₹20,35,680 ✓
- B. ₹16,28,544
- C. ₹22,53,784
- D. ₹18,68,350

**Q9** Quant

By how much is 30% of 65 greater than 30% of 30?

- A. 10.5 ✓
- B. 5.5
- C. 7.5
- D. 12.5

**Q10** Quant

₹9,728 is divided among X, Y, and Z such that if ₹60, ₹91, and ₹36 are deducted from their respective shares, the remaining amounts are in the ratio 15:13:19. Find X's share after the deduction.

- A. ₹3045 ✓
- B. ₹2895
- C. ₹3095
- D. ₹2945

**Q11** Quant

If the compound interest on a sum of ₹y at 4% per year for 2 years, compounded annually, is ₹663, what will be the amount after 2 years?

- A. ₹8788 ✓
- B. ₹8750
- C. ₹9245
- D. ₹8396

**Q12** Quant

Two circles of radii 6 cm and 3 cm are touching each other externally. Find the length of common tangent.

A. $8$ cm

B. $7\sqrt{2}$ cm

C. $6\sqrt{2}$ cm ✓

D. $9$ cm

**Q16** Quant

Two secants AB and AP are drawn to a circle from an external point A. AB intersects the circle at points S and T, and AP intersects the circle at C and D. AS < AT and AC < AD, AS = 8 cm, ST = (4x + 3) cm, AC = 12 cm and CD = (2x - 3). What is the length (in cm) of AD?

A. 22

B. 27

C. 14 ✓

D. 19

**Q17** Quant

In a triangle, the angles are in the ratio of 1 : 2 : 1. The corresponding sides are in the ratio:

A. $1 : \sqrt{2} : 1$ ✓

B. $1 : 1 : \sqrt{2}$

C. $\sqrt{2} : \sqrt{2} : 1$

D. $\sqrt{2} : 1 : 1$

**Q1** Quant

What is the area (in $cm^2$) of an equilateral triangle having side 200 cm? (Use $\sqrt{3}=1.73$)

- A. 14,100
- B. 15,200
- C. 16,800
- D. 17,300 ✓

**Q2** Quant

Car M takes 7 hours to travel from point A to point B. It would have taken 8 hours if it had travelled the same distance at a speed 22.6 km/hr less than its original speed. What is the distance between points A and B?

- A. 1052.5 km
- B. 1132.5 km
- C. 1265.6 km ✓
- D. 1376.7 km

**Q3** Quant

A car covers 180 km from Pune to Ahmednagar at an average speed of 60 km/h. On the return trip, the car encounters a traffic jam and travels at the average speed of 30 km/h. The overall average speed for round trip is:

- A. 30 km/h
- B. 35 km/h
- C. 40 km/h ✓
- D. 45 km/h

**Q4** Quant

In a school, the ratio of the number of boys to the number of girls is 3:2. If there are 120 more boys than girls, find the number of boys in the school.

- A. 240
- B. 300
- C. 360 ✓
- D. 400

**Q5** Quant

A cuboidal tank 2.2 m × 2.0 m × 1.5 m is filled with water from a cylindrical bucket of radius 0.25 m and height 0.28 m. How many buckets of water are needed to fill the tank completely? (Use π = 22/7)

- A. 110
- B. 115
- C. 120 ✓
- D. 125

**Q6** Quant

The average of 8 numbers is 42. If one more number is added and the new average becomes 40, find the number added.

- A. 24 ✓
- B. 23
- C. 22
- D. 21

**Q7** Quant

Find the value of $2.\overline{07}+3.\overline{19}+13.\overline{08}$.

- A. $18.\overline{34}$ ✓
- B. $18.\overline{35}$
- C. $19.\overline{34}$
- D. $19.\overline{35}$

**Q8** Quant

Which of the following ratios is equivalent to 4:7?

- A. 28:49 ✓
- B. 98:105
- C. 44:73
- D. 54:70

If the mode of 1, 1, 1, 5, 9, 8, 7, 9, 9, 63, 4, 5, 6, 88, 8, 4, 44, 6, 6, 6, 9, 9, 9, and 1 is "v", then find the value of $\frac{\sqrt{v}}{3}$.

- A. $2$
- B. $\frac{1}{3}$
- C. $\frac{2\sqrt{2}}{3}$
- D. $1$ ✓

**Q10** Quant

The cost of 4 pens and 3 notebooks is ₹86, while 2 pens and 5 notebooks cost ₹78. What is the cost of one pen?

- A. ₹12
- B. ₹14 ✓
- C. ₹16
- D. ₹18

**Q11** Quant

Manoj spends 62.5% of his monthly income and saves ₹1236 per month. What is the monthly income of Manoj?

- A. ₹3196
- B. ₹3216
- C. ₹3236
- D. ₹3296 ✓

**Q12** Quant

A jacket has a marked price of ₹2,500. A shopkeeper offers two successive discounts of 20% and 10% on it. What is the final selling price of the jacket?

- A. ₹2,000
- B. ₹1,800 ✓
- C. ₹1,750
- D. ₹1,700

**Q13** Quant

A shopkeeper marks up his goods by 30% and allows two successive discounts of 10% and 5% on the marked price. If the marked price of such an item is ₹260, find the percentage profit (rounded off to two decimal places) made by the shopkeeper.

- A. 11.15% ✓
- B. 22.30%
- C. 12.25%
- D. 15.15%

**Q14** Quant

One pipe can fill a tank in 6 minutes while another pipe can empty the completely filled tank in 9 minutes. If both the pipes are opened together when the tank is empty, how many minutes will it take to fill one-third of the tank?

- A. 6 ✓
- B. 12
- C. 18
- D. 24

D. $4.\overline{26}$

**Q2** Quant

For which value of k will the equation $x^2 + kx + 441 = 0$ have equal roots?

A. ±21

B. ±42 ✓

C. ±44

D. ±22

**Q3** Quant

The side of a square is 5 cm more than the radius of a circle whose circumference is 16π cm. What is the perimeter of the square?

A. 48 cm

B. 52 cm ✓

C. 56 cm

D. 64 cm

**Q4** Quant

A shopkeeper buys an item for ₹200 and sells it for ₹250. What is the percentage profit?

A. 25% ✓

B. 20%

C. 30%

D. 15%

**Q5** Quant

A and B can do a piece of work in 5 days, B and C can do it in 8 days, C and A can do it in 10 days. Find the time taken by B alone to complete this work.

A. $5\frac{3}{7}$ days

B. $7\frac{5}{9}$ days

C. $8\frac{8}{9}$ days ✓

D. $10\frac{5}{7}$ days

**Q6** Quant

John covers two-fifth of the total distance at 9 km/hr and the remaining distance at 12 km/hr in the total duration of 6 hours 48 minutes. Find the distance covered by him at 12 km/hr.

A. 43.2 km ✓

B. 28.8 km

C. 48.2 km

D. 34.8 km

**Q7** Quant

Which of the following numbers is divisible by 16?

(i) 8914266
(ii) 5282140
(iii) 4674032
(iv) 5463776

A. ( ii ) and ( iv ) only

B. ( i ) and ( iii ) only

C. ( ii ) and ( iii ) only

D. ( iii ) and ( iv ) only ✓

**Q8** Quant

If a:b=6:17, then the value of (a+b):(b-a) is:

A. 21:13

B. 11:23

C. 13:21

D. 23:11 ✓

**Q9** Quant

A sample of 15 data is given as follow: 52.1, 54.7, 51.2, 55.9. 51.2, 57.4, 59.5, 55.9, 52.1, 55.9, 54.7, 52.1, 55.9, 51.2. Find the mode of the data.

A. 52.1

B. 51.2

C. 54.7

D. 55.9 ✓

**Q10** Quant

X and Y started a business by investing ₹60,000 and ₹90,000, respectively. After 6 months, X adds ₹30,000 more to his investment, and Y withdraws ₹30,000. If the total profit at the end of the year is ₹1,20,000, what is Y's share?

A. ₹54,000

B. ₹60,000 ✓

C. ₹66,000

D. ₹72,000

**Q11** Quant

If 20% of a number is added to 24, then the result is the same number. 80% of the same number is:

A. 24 ✓

B. 6

C. 54

D. 44

**Q12** Quant

A and B working together can do a piece of work in 2 days. B alone can do the same work in 5 days. How long (in days) will A alone take to do thrice the work?

A. 10 ✓

B. 20

C. 30

D. 40

**Q13** Quant

A sum of ₹1,589 is divided into three parts such that half of the first part, one-fourth of the second part, and one-eighth of the third part are equal. What is the positive difference (in ₹) between the first and the second parts?

A. 227 ✓

B. 177

C. 277

D. 77

**Q14** Quant

The profit made on a product is 24%. What is the loss percentage (correct to two decimal places) incurred on the sale if the figures of both cost price and selling price are interchanged?

A. 19.35% ✓

B. 23.01%

C. 19.33%

D. 19.54%

**Q15** Quant

If the compound interest on a sum of ₹y at 5% per year for 2 years, compounded annually, is ₹287, what will be the amount after 2 years?

A. ₹3087 ✓

B. ₹2801

C. ₹3551

D. ₹2694

P, Q, R, S and T in the given order are points on a circle, such that PR is a diameter and PQ = QR. If ∠STP = 124°, then what is the degree measure of ∠SPQ?

- **A.** 79° ✓
- **B.** 34°
- **C.** 72°
- **D.** 45°

**Q17** Quant

Two circles touch each other externally at point A. BC is a common tangent to both the circles touching the circles at point B and point C. If the radii of the circles are 8 cm and 3 cm, and length of BC = x cm, find the value of $x^2$.

- **A.** 90
- **B.** 92
- **C.** 94
- **D.** 96 ✓

**Q18** Quant

In what time (in months) will ₹3300 fetch an interest of ₹440 at 5% per year simple interest?

- B. ₹14,000
- C. ₹12,000
- D. ₹13,500

**Q2** Quant

The price of a commodity is reduced by 20% and then increased by 15%. What is the net effect?

- A. 8% increase
- B. 8% decrease ✓
- C. 9% increase
- D. 9% decrease

**Q3** Quant

Two trains, X and Y, travel on parallel tracks. When moving in the same direction, X crosses Y in 100 seconds. When moving in opposite directions, they cross each other in 20 seconds. If the length of X is twice the length of Y, then what is the ratio of the time taken by train X to the time taken by Y to cover a distance of 720 m?

- A. 2 : 3 ✓
- B. 3 : 2
- C. 5 : 11
- D. 11 : 5

**Q4** Quant

A car travels from A to B at a speed of 60 km/h and returns from B to A at a speed of 40 km/h. Find the average speed of the car for the whole journey.

- A. 45 km/h

**Q10** Quant

Divide ₹1190 into three parts in such a way that half of the first part, one-fourth of the second part and one-eighth of the third part are equal. What is the value of the second part (in ₹)?

- A. 340 ✓
- B. 390
- C. 290
- D. 490

**Q11** Quant

Given that $81^{0.4} = x$, $81^{0.78} = y$ and $x^z = y^2$, then the value of z is:

- A. 3.9 ✓
- B. 2.09
- C. 7
- D. 4.31

**Q12** Quant

If the compound interest on a sum of ₹y at 10% per year for 2 years, compounded annually, is ₹378, what will be the amount after 2 years?

- A. ₹2178 ✓
- B. ₹2112
- C. ₹1941
- D. ₹2199

**Q13** Quant

A sector is cut out from a circle of diameter 28 cm. If the angle of the sector is 108°, then its area (in $cm^2$) is:
[Use π = 22/7]

- A. 148.2
- B. 184.8 ✓
- C. 188.5
- D. 198.7

**Q14** Quant

Find the area of a sector of arc length 11 cm, which subtends an angle of $60^o$at the centre of the circle. (Use π = 22/7)

In a performance test, engineers find that when they increase the train's speed by 20% above its standard operating speed, the journey time decreases by t hours. When they decrease the train's speed by 25% below its standard operating speed, the journey time increases by (t+1) hours. What is the standard journey time between stations P and Q?

- **A.** 5 hours
- **B.** 6 hours ✓
- **C.** 7 hours
- **D.** 8 hours

**Q6** Quant

A shopkeeper marks an item at 60% above the cost price. He offers two successive discounts of 20% and 25% on the item, and he incurs a loss of ₹180. What is the cost price of the item?

- **A.** ₹4100
- **B.** ₹4200
- **C.** ₹4300
- **D.** ₹4500 ✓

In a parallelogram ABCD, point P divides side AB in ratio 2:3 (from A) and point Q divides side AD in ratio 1:2 (from A). If the area of triangle APQ is 12 square units, then the area of parallelogram ABCD (in square units) is:

- **A.** 180 ✓
- **B.** 100
- **C.** 150
- **D.** 120

**Q17** Quant

In a courtyard, there are two triangular flower beds. Flower bed LMN has sides LM = 15 m, MN = 12 m and LN = 9 m. Flower bed STU has sides ST = 12 m, TU = 15 m and SU = 9 m.
Based on the above information, can it be concluded that flower bed LMN is congruent to flower bed STU?

- **A.** Yes, all three sides of LMN are equal to the corresponding sides of STU.
- **B.** Yes, all three angles of LMN are equal to the corresponding angles of STU.
- **C.** Yes, because LMN and STU have same sides.
- **D.** No, because the corresponding sides of LMN and STU are not equal. ✓

**Q18** Quant

The pipes P and Q together can completely fill an empty cistern with water in 4 hours. If P alone can fill the cistern with water in 16 hours, in how many hours will Q alone fill three-fourth of the same cistern with water?

- **A.** 4 ✓
- **B.** 8
- **C.** 5
- **D.** 9

Two trains are travelling toward each other on parallel tracks. The first train is 400 metres long and travels at a speed of 100 km/hr. The second train is 600 metres long and travels at a speed of 80 km/hr. The distance between the two trains when they start is 10 km. Find how much time will it take for the two trains to completely pass each other?

- A. 220 seconds ✓
- B. 210 seconds
- C. 200 seconds
- D. 215 seconds

**Q4** Quant

A cyclist travels to a point. If he travel at 16 km/hr for the first half of the journey and then 12 km/hr for the second half, he is 10 minutes late. If he travel at 18 km/hr for the first half and 16 km/hr for the second half, he is 5 minutes early. What is the distance (in km)?

- A. 15
- B. 18 ✓
- C. 21
- D. 24

**Q5** Quant

A vendor sells candles in packs of 6 and lanterns in packs of 9. He creates gift sets with equal numbers of candles and lanterns, using the smallest possible total. If each candle costs ₹5 and each lantern costs ₹10, how much does one gift set cost?

- A. ₹210
- B. ₹270 ✓
- C. ₹300
- D. ₹360

**Q6** Quant

If the ratio of mean and median of a certain set of data is $\frac{2}{3}:\frac{4}{5}$ respectively, then, by using empirical relation, find the ratio of its mode and median.

- A. 4 : 3 ✓
- B. 3 : 4
- C. 8 : 5
- D. 5 : 8

**Q7** Quant

Find the mean proportional to 9.6 and 2.4.

- A. 3.6
- B. 4.8 ✓
- C. 5.2
- D. 6.4

D. $14.5\sqrt{3}$ cm$^2$

**Q16** Quant

The total surface area of a solid cylinder having radius 9 cm and height 14 cm is:

A. 414π cm$^2$ ✓

B. 348π cm$^2$

C. 433π cm$^2$

D. 440π cm$^2$

**Q17** Quant

Rahul sells a table to Mohit at a profit of 25%, and then Mohit sells it to Vinod at a profit of 40%. If Vinod pays ₹6,475 for the table, its cost price (in ₹) for Rahul is:

A. 3,700 ✓

B. 3,701

C. 3,699

D. 3,698

**Q18** Quant

One pipe can fill the tank in 4 minutes, while another pipe can empty a completely filled tank in 8 minutes. If both the pipes are operated together when the tank is empty, how long (in minutes) will it take to fill the tank completely?

A. 8 ✓

B. 9

C. 10

D. 11

**Q19** Quant

The product of (x - 17) and (x + 8) is:

A. $x^2$ - 9x - 136 ✓

B. $x^2$ + 10x - 136

C. $x^2$ - 8x + 136

D. $x^2$ + 9x + 136

**Q20** Quant

A number is increased by 15% and then decreased by 10%. What is the net percentage increase in the number?

A. 25%

B. 5%

**Q1** Quant

Find the volume of a right circular cylinder (in $cm^3$) of radius 25 cm and height 49 cm.

$\left(\text{Use } \pi = \frac{22}{7}\right)$

- **A.** C. 96,250 ✓
- **B.** D. 98,200
- **C.** A. 86,250
- **D.** B. 92,350

**Q2** Quant

Two pipes, P and Q, can fill a tank in 18 minutes and 20 minutes, respectively. If both pipes are opened simultaneously, then find the time taken to fill the tank completely.

- **A.** $7\frac{2}{11}$ minutes
- **B.** $8\frac{5}{17}$ minutes
- **C.** $9\frac{9}{19}$ minutes ✓
- **D.** $10\frac{7}{22}$ minutes

**Q3** Quant

The ratio of two numbers is 3 : 5. If each number is increased by 10, the ratio becomes 5 : 7. Find the numbers.

- **A.** A. 15 and 25 ✓
- **B.** C. 15 and 20
- **C.** D. 12 and 25
- **D.** B. 12 and 20

**Q4** Quant

A car travels from Delhi to Jaipur at 60 km/hr and returns at 80 km/hr. If the total time taken for the journey is 8.75 hours, find the distance between Delhi and Jaipur.

- **A.** C. 300 km ✓
- **B.** A. 330 km
- **C.** D. 360 km
- **D.** B. 390 km

**Q5** Quant

Simplify: $30 \div 6 \times \left(\frac{25}{14} \text{ of } \frac{7}{5} \div \frac{5}{7} \text{ of } \frac{7}{10}\right)$

- **A.** D. 25 ✓
- **B.** C. 1
- **C.** A. 24
- **D.** B. 12

**Q6** Quant

Find the curved surface area of a sphere whose volume is $2145\frac{11}{21}$ $cm^3$.

$(\text{Use } \pi = \frac{22}{7})$

- **A.** $487\frac{3}{7}$ $cm^2$
- **B.** $563\frac{4}{7}$ $cm^2$
- **C.** $786\frac{3}{7}$ $cm^2$
- **D.** $804\frac{4}{7}$ $cm^2$ ✓

**Q7** Quant

Find the actual price of a dress if it is sold for ₹4,624 after a 32% discount.

- **A.** D. ₹6,800 ✓
- **B.** C. ₹6,900
- **C.** B. ₹5,960
- **D.** A. ₹6,850

**Q8** Quant

The median of the data 5,8,12,15,20,34,36, is

- **A.** A. 10
- **B.** C. 15 ✓
- **C.** D. 20
- **D.** B. 25

**Q9** Quant

18 women can finish a work in 48 hours. How many women are required to complete the same work in 36 hours?

- **A.** A. 21
- **B.** B. 24 ✓
- **C.** D. 22
- **D.** C. 23

**Q10** Quant

If 20% of a number is added to 48, then the result is the same number. 75% of the same number is:

- **A.** D. 45 ✓
- **B.** A. 55
- **C.** B. 75
- **D.** C. 65

**Q11** Quant

A and B working together can do a piece of work in 4 days. B alone can do the same work in 8 days. How long (in days) will A alone take to do thrice the work?

- **A.** C. 24 ✓
- **B.** B. 48
- **C.** D. 72
- **D.** A. 96

**Q12** Quant

₹509 is divided among Nitin, Asha and Aaditya in such a way that if ₹24, ₹22 and ₹19 are deducted from their respective shares, they have money in the ratio 5 : 18 : 14. Find the actual share of Asha.

- **A.** D. ₹238 ✓
- **B.** C. ₹218
- **C.** B. ₹254
- **D.** A. ₹266

**Q13** Quant

If at the same rate of interest, in 2 years, the simple interest is ₹60 and compound interest is ₹70, then what is the principal (in ₹)?

- **A.** B. 90 ✓
- **B.** C. 85
- **C.** A. 83
- **D.** D. 94

**Q14** Quant

Two lines EF and GH are parallel to each other such that a transversal line A ∠GSR = 110°, then determine the value of ∠ARE and ∠SRF, respectively.

- **A.** 110°,110° ✓

**Q10** English

Read the following passage carefully and answer the questions that follow.

The story is set in a future world where society is fully controlled to keep people stable and orderly. The year is A.F. 632, and people are created in laboratories instead of being born naturally. Society is divided into five groups called castes, from Alphas at the top to Epsilons at the bottom. Each group has fixed roles and cannot change its position. Children are trained from a very young age to think and behave in certain ways. This training helps maintain peace but limits freedom and personal choice. People are taught to avoid strong emotions and follow rules without question. Bernard Marx is an Alpha who feels different and does not fully fit into society. He meets John, who was raised outside this controlled world. John begins to question the system and believes people should have freedom and real feelings. The story shows how too much control can reduce individuality and stop people from living meaningful and independent lives.

What is the meaning of “stable” in the passage?

**A.** Fixed and not likely to change ✓

**B.** Fast and always moving quickly

**C.** Weak and easy to break down

**D.** New and recently developed

**Q11** English

**B.** A.F. 700 in modern society

**C.** A.F. 632 in the future world ✓

**D.** A.F. 300 in early history

**Q13** English

Which idea best reflects the theme?

**A.** Control can limit individuality and choice ✓

**B.** Science improves all aspects of life

**C.** Rules help people live peacefully

**D.** Society must avoid all emotions

**Q14** English

What can be inferred about freedom in society?

**A.** People have the freedom to choose their roles

**B.** People live with limited personal freedom ✓

**Q12** English

Read the given passage carefully and answer the questions that follow.

The Mesopotamian civilisation, often called the "cradle of civilisation," developed between the Tigris and Euphrates rivers. It is known for several important achievements that shaped early human society. One of its greatest contributions was the invention of writing, known as cuneiform, which allowed people to record information, trade, and laws.

Mesopotamians also made advances in mathematics and astronomy. They developed a number system based on sixty, which is still used today to measure time and angles. In addition, they built impressive structures such as ziggurats, which served as religious centres.

Another major achievement was the creation of one of the earliest legal codes, known as the Code of Hammurabi. This helped establish rules and maintain order in society. The civilisation also improved irrigation techniques, allowing farming to flourish in a dry region.

These achievements show that Mesopotamia played a crucial role in the development of organised society and human progress.

What was the primary purpose of ziggurats?

**A.** Centres of political administration

**B.** Facilities for commercial exchange

**C.** Structures for religious activities ✓

**D.** Storage units for agricultural goods

Read the given passage and answer the questions that follow.

The city park is a favourite spot for many families, morning joggers and nature lovers. Every morning, people from nearby neighbourhoods come to jog, walk their dogs, stretch or simply enjoy the calm, fresh air. Children laugh and play on the swings, see-saws and colourful slides, while elderly people sit peacefully on benches, reading newspapers or chatting with old friends. The park is always well maintained, with blooming seasonal flowers adding charm throughout the year and birds chirping merrily in the trees. It provides a peaceful and refreshing escape from the noise, traffic and stress of daily city life. Local volunteers frequently organise weekend clean-up drives to keep the park neat, clean and green. The entire community values this shared green space, as it encourages health, happiness, bonding and a strong sense of togetherness among all residents.

**Q9** English

Read the given passage and answer the questions that follow.

Mobile phones have become an essential part of teenagers' lives in the modern world. They are used not only for communication but also for education, entertainment, and social interaction. With access to the internet, teenagers can gather information quickly and stay connected with friends and family. However, excessive use of mobile phones can have negative effects. Many teenagers spend long hours on social media or playing games, which may reduce their focus on studies and physical activities. It can also affect sleep patterns, as late-night screen use is common. In some cases, overdependence on mobile phones may lead to reduced face-to-face communication and social skills. Despite these concerns, mobile phones can be beneficial when used wisely. They provide learning opportunities, access to educational content, and tools for creativity. Therefore, maintaining a balance between usage and other activities is important for the healthy development of teenagers.

Time management is a crucial skill that significantly influences a student's academic and personal success. Students who plan their daily activities effectively are able to balance studies, extracurricular activities, and leisure without feeling overwhelmed. By setting clear goals and prioritising tasks, they can complete assignments on time and reduce unnecessary stress. Moreover, proper time management enhances productivity and allows students to make better use of available resources. It also improves concentration, as organised schedules minimise distractions and confusion. Students who manage their time wisely often develop a sense of discipline and responsibility, which benefits them in the long run. However, poor time management can lead to missed deadlines, anxiety, and decreased performance. Many students struggle because they procrastinate or fail to organise their tasks efficiently. Therefore, developing good time management habits is essential for achieving academic excellence and maintaining a balanced lifestyle.

**Q11** English

Read the given passage carefully and answer the following questions.

Gaming addiction has emerged as a growing concern, particularly among teenagers and young adults. What begins as a harmless recreational activity can gradually develop into a compulsive behaviour that interferes with daily life. Excessive gaming often leads to poor academic performance, disrupted sleep patterns, and reduced social interaction. Psychologists argue that many games are designed to keep users engaged through reward systems and constant challenges, making it difficult for players to disengage. While some defend gaming as a source of relaxation and skill development, the lack of self-regulation can turn it into a harmful habit. Parents and educators face the challenge of distinguishing between healthy engagement and addiction. Furthermore, the rise of online multiplayer platforms has intensified peer pressure and competitiveness. Addressing gaming addiction requires awareness, time management, and supportive intervention rather than strict prohibition. Ultimately, the responsibility lies in striking a balance between entertainment and personal well-being.

What is one effect of excessive gaming mentioned in the passage?

**A.** Improved social interaction

**B.** Better academic performance

**C.** Disrupted sleep patterns ✓

**D.** Increased outdoor activities

**Q12** English

Why do psychologists believe games are addictive?

Read the passage and answer the questions that follow.

Teamwork is a fundamental element in achieving success in both academic and professional environments. When individuals collaborate effectively, they can combine their skills, knowledge, and ideas to accomplish tasks more efficiently. Working as a team encourages communication, mutual support, and the sharing of responsibilities, which leads to improved outcomes. In addition, teamwork helps individuals develop essential interpersonal skills such as cooperation, leadership, and adaptability. Students who participate in group activities often learn how to respect diverse opinions and resolve conflicts constructively. These experiences prepare them for real-world situations where collaboration is essential. It also promotes a sense of unity and collective responsibility among team members. **Q11** English

Read the following passage carefully and answer the questions that follow.
In 2018, a young tigress disappeared from Bandhavgarh Tiger Reserve in Madhya Pradesh. For nearly three years, she was not seen in official records. In 2021, camera traps in Achanakmar Tiger Reserve in Chhattisgarh captured a tigress with cubs. Stripe patterns confirmed that she was the same tigress, later named Jhumri. She had travelled nearly 400 kilometres, likely in search of new territory after reaching dispersal age. Such movements are common when young tigers leave crowded areas to find space, food, and mates. Similar cases, like a male tiger moving from Kanha to Achanakmar, show that forest corridors still allow movement between regions. Chhattisgarh’s tiger population, which had declined earlier, is now increasing due to better protection, improved habitats, and stronger anti-poaching efforts. However, experts stress that maintaining forest corridors is essential. These pathways help tigers move safely, find new territories, and reproduce, ensuring long term survival of tiger populations in central India.

Read the passage and answer the questions that follow.

One of the most memorable events in my school life was the annual cultural fest last year. The entire campus was decorated with vibrant colours, and students eagerly participated in various competitions such as dance, music, and drama. I took part in a group dance performance, which required weeks of practice and coordination. On the day of the event, the atmosphere was filled with excitement and anticipation. Our performance was scheduled in the evening, and despite feeling nervous, we managed to perform confidently. The audience responded with loud applause, which boosted our morale. Teachers and judges appreciated the effort and teamwork displayed by all participants. The event concluded with a prize distribution ceremony, where our team secured the second position. This experience taught me the value of teamwork, dedication, and self-confidence. It remains a cherished memory, reminding me of the joy of collective effort and achievement.

Read the passage and answer the questions that follow.

Decision-making under pressure is a complex psychological process influenced by time constraints, emotional intensity, and cognitive limitations. When individuals are required to make quick decisions, they often rely on instinctive thinking rather than careful analysis. This can lead to efficient outcomes in familiar situations but may also result in errors when the context is unfamiliar or highly complex. Stress plays a significant role in shaping decisions made under pressure. Moderate levels of stress can enhance focus and alertness, enabling individuals to respond swiftly. However, excessive stress may impair judgment, reduce concentration, and increase the likelihood of impulsive choices. Additionally, external factors such as expectations, peer influence, and perceived consequences further complicate the decision-making process. Understanding these psychological dynamics is essential for improving decision-making skills. By developing strategies such as critical thinking, emotional regulation, and prior preparation, individuals can make more balanced and effective decisions, even in high-pressure situations.

Read the given passage and answer the following questions:
Volcanoes are openings in the Earth's crust that allow molten rock, ash, and gases to escape from beneath the surface. Eruptions can be sudden and violent, causing destruction to nearby areas, including homes, roads, and farmland. However, volcanic eruptions also have positive effects. Lava and ash break down to form fertile soil that supports agriculture. Minerals released during eruptions enrich the land, benefiting plants and crops. Scientists study volcanoes to predict eruptions and reduce their destructive impact. While dangerous, volcanoes are essential to Earth's geological processes. They create new landforms, influence climate, and recycle Earth's materials. Many regions around the world, such as the Pacific Ring of Fire, are volcanically active. Understanding and monitoring these natural phenomena can save lives and help communities use volcanic soils productively. Balancing safety with the benefits of volcanic regions is crucial for sustainable living.

As I approached the grand structure, its white marble façade shimmered under the sunlight, creating an impression of timeless beauty. Built by Emperor Shah Jahan in memory of his wife Mumtaz Mahal, the monument stands as a symbol of love and architectural brilliance. Walking through the gardens, I observed the intricate carvings and symmetrical design that reflected the craftsmanship of the Mughal era. The calm surroundings and reflective pools enhanced the monument's elegance, making the visit both educational and memorable. The guide explained the historical significance and the techniques used in its construction, deepening my appreciation for heritage conservation. This visit not only enriched my understanding of history but also instilled a sense of pride in cultural legacy. It reminded me that preserving such monuments is essential for future generations.

Read the passage and answer the questions that follow:
Daily exercise plays a vital role in maintaining both physical and mental well-being. Engaging in regular physical activity helps strengthen the heart, improve muscle tone, and enhance overall stamina. Beyond physical benefits, exercise also contributes significantly to mental health by reducing stress, anxiety, and symptoms of depression. When individuals exercise, the body releases endorphins, often referred to as "feel-good" hormones, which elevate mood and promote a sense of happiness. Moreover, daily exercise fosters discipline and consistency, qualities that are essential for success in various aspects of life. It also improves concentration and cognitive function, making it particularly beneficial for students. Despite these advantages, many people neglect regular exercise due to busy schedules or lack of motivation. However, even simple activities such as walking, cycling, or stretching can make a noticeable difference. Incorporating exercise into daily routines is not merely a lifestyle choice but a necessity for long-term health and productivity.

Identify a suitable title for the passage:

**A.** C. The Role of Exercise in Building Strong Muscles Only

Read the following passage carefully and answer the questions that follow.
The passage presents a lively marketplace where a series of questions and answers reveal the variety of goods and activities within it. Merchants display rich fabrics, ornaments, and finely crafted objects, while vendors sell essential items such as spices, grains, and fruits. Skilled workers prepare beauty products, create jewellery, and offer items for entertainment. Musicians play instruments, and magicians add a sense of wonder, making the space vibrant and engaging. Flower sellers prepare garlands for celebrations as well as arrangements for mourning, reflecting different stages of life. The marketplace includes people from various social and economic backgrounds, offering both necessities and luxuries. It serves as more than a place of trade, representing culture, tradition, and artistic skill. Through its colours, sounds, and activities, the passage highlights the richness and diversity of local life, showing how such a space brings together commerce, community, and the full range of human experiences.

**Q12** English

Read the passage carefully and answer the questions that follow.

ADHD affects how the brain handles attention, motivation, and self-control. For some, this means racing thoughts, missed deadlines, and constant restlessness. For others, it feels like a fog of distraction that makes following through on tasks frustratingly difficult.

Brain imaging studies in people with ADHD show subtle differences in how attention and reward circuits communicate. These systems rely on chemical messengers such as dopamine and noradrenaline. When the signalling of these messengers is less efficient, even simple, everyday tasks become harder to start and sustain.

Medicines such as methylphenidate (Ritalin) and lisdexamfetamine (Vyvanse) increase dopamine and noradrenaline activity in the brain, thereby enhancing focus, motivation, and impulse control. Large clinical reviews also show wider benefits, including reduced risks of depression, substance misuse, and even criminal behaviour in people with ADHD.

Which of the following is the most appropriate title for the passage?

**A.** B. Childhood Behavioural Disorders

**B.** A. Understanding ADHD and Its Treatment ✓

**C.** C. The History of Brain Imaging

**D.** D. Depression and Substance Misuse

**Q13** English

Which option best summarises the passage?

**Q14** English

Read the passage and answer the questions that follow.

Innovation has become a driving force behind economic growth and technological advancement. Industries continuously develop new products, systems, and processes to improve efficiency and meet growing demands. However, this rapid pace of innovation often comes at a significant environmental cost. Increased production, resource extraction, and energy consumption contribute to pollution, habitat destruction, and climate change. Balancing innovation with environmental sustainability presents a complex challenge. While technological progress can offer solutions such as renewable energy and eco-friendly materials, it can also intensify environmental degradation if not managed responsibly. Companies and governments must therefore adopt sustainable practices, integrating environmental considerations into the design and implementation of innovations. Furthermore, consumers play a vital role by supporting environmentally responsible products and practices. Achieving a balance requires collective effort, long-term planning, and ethical decision-making. Only through a conscious and coordinated approach can societies ensure that progress does not come at the expense of the planet's well-being.

The internet has transformed the way people communicate worldwide. Through emails, messaging apps, and social media platforms, individuals can connect instantly across continents. Businesses use the internet to reach global markets, conduct online transactions, and interact with customers. Students and professionals access vast amounts of information for learning, research, and work. However, while the internet provides numerous benefits, it also carries risks. Online misinformation, cyberbullying, and privacy concerns are common challenges. Overuse of digital devices can affect mental health and reduce physical activity. Therefore, responsible and balanced internet usage is essential. Parents and educators should guide young users, while governments should enforce cybersecurity measures. By using the internet wisely, people can maximize its advantages, maintain social connections, and enhance knowledge without compromising safety or well-being.

**Q4** English

Read the given passage and answer the questions that follow.

Air pollution is a major concern across Indian cities, with significant variations in air quality levels between large metropolitan areas and smaller cities. A new and alarming trend has emerged—smaller cities, once considered relatively cleaner, are now experiencing dangerously high pollution levels. Byrnihat, a small industrial town on the Assam-Meghalaya border, has emerged as India's new pollution hotspot, surpassing even Delhi in annual PM2.5 levels. According to the Central Pollution Control Board (CPCB), Byrnihat in 2024 recorded an alarming average PM2.5 concentration of 133.4 µg/ $m^3$, exceeding the national standard by a staggering 3.3 times. This marks a significant shift in India's air pollution crisis, as smaller towns are now registering pollution levels once thought to be a problem only for metro cities.
The air quality in Byrnihat has deteriorated to such an extent that a drastic 70 per cent reduction in PM2.5 levels is required to meet the annual standard.

Read the passage and answer the questions that follow.

On 11 July 1987, the global population touched the 5 billion mark. To spread awareness about population-related issues, the then-Governing Council of the United Nations Development Programme in 1989 decided to observe 11 July as World Population Day. The day was first marked in 1990 across 90 countries. The number of people living in a particular city, town or country constitutes its population. By 2050, the world population could be around 9.8 billion. However, we may reach the mark even earlier, due to the health-care crisis precipitated by the coronavirus pandemic and the subsequent lockdown. With a population of 1.3 billion or 130 crore, India is the second most populous country in the world, next to China. On World Population Day, this primer looks at the factors that affect population growth, the impact of COVID-19 crisis on population control measures and why we need to fight population explosion, sooner than later.

**Q10** English

Read the given passage carefully and answer the questions that follow.

Tree plantation plays a vital role in protecting the environment and maintaining ecological balance. Trees absorb carbon dioxide and release oxygen, helping to reduce air pollution and combat climate change. They also prevent soil erosion by holding the soil together with their roots and improve groundwater levels by allowing rainwater to seep into the ground. In urban areas, trees help lower temperatures and provide shade, making the environment more comfortable. They also support biodiversity by providing shelter and food for various species of birds and animals. However, rapid urbanisation and deforestation have reduced green cover, leading to environmental problems such as increased pollution and loss of wildlife habitats. Tree plantation is an effective solution, but it requires proper planning and regular care to ensure long-term benefits. Public awareness and community participation are essential for successful plantation efforts. By planting and protecting trees, individuals can contribute significantly to environmental sustainability and a healthier future.

How do trees help reduce air pollution?

**A.** D. They absorb carbon dioxide from the air. ✓

**B.** A. They block movement of polluted air.

**C.** C. They prevent formation of harmful gases.

**D.** B. They release gases harmful to pollutants.

**Q11** English

**Q9** English

Read the given passage and answer the questions that follow.
With regard to other animals, humans have long since become gods. We don't like to reflect on this too deeply, because we have not been particularly just or merciful gods. If you watch the National Geographic channel, go to a Disney film or read a book of fairy tales, you might easily get the impression that planet Earth is populated mainly by lions, wolves and tigers who are an equal match for us humans. Simba the lion king holds sway over the forest animals; Little Red Riding Hood tries to evade the Big Bad Wolf; and little Mowgli bravely confronts Shere Khan the tiger. But in reality, they are no longer there. Our televisions, books, fantasies and nightmares are still full of them, but the Simbas, Shere Khans and Big Bad Wolves of our planet are disappearing. The world is populated mainly by humans and their domesticated animals.

**Q5** English

Read the passage and choose the correct answer to the questions based on it.

Jaisalmer, often called the "Golden City," is a stunning desert town located in the heart of the Thar Desert, Rajasthan. Its distinctive nickname comes from the yellow sandstone used in its architecture, which glows like gold at sunset. The centerpiece is the magnificent Jaisalmer Fort, a UNESCO World Heritage site and one of the world's few living forts, where nearly a quarter of the old city's population still resides. Constructed in the 12th century, the fort houses intricately carved Jain temples and havelis (mansions) adorned with elaborate facades. Beyond the fort, the city is famed for the Sam Sand Dunes, offering visitors an authentic experience of the desert landscape through camel safaris and traditional folk performances. Jaisalmer's isolation has helped preserve its unique medieval charm and rich cultural heritage, making it a compelling study in desert resilience, trade history, and architectural brilliance.

Which of the following would be the most precise title for the passage?

**D.** It is constructed primarily from marble and stone.

**Q8** English

What can be inferred about Jaisalmer's enduring unique character?

**A.** It is primarily due to recent heavy investment in modernization.

**B.** Its geographical isolation has safeguarded its historical charm. ✓

**C.** Its historical trade significance has completely faded away.

**D.** The fort's current function is solely as a museum and not a residence.

**Q10** English

Read the given passage and answer the questions that follow.

Sea ice and snow are crucial components of the cryosphere and the climate system. Both sea ice and spring snow in the Northern Hemisphere (NH) have been decreasing at an alarming rate in a changing climate. Changes in NH sea ice and snow have been linked with a variety of climate and weather extremes including cold spells, heatwaves, droughts and wildfires
Understanding of these linkages will benefit the predictions of climate and weather extremes. However, existing work on this has been largely fragmented and is subject to large uncertainties in physical pathways and methodologies. This has prevented further substantial progress in attributing climate and weather extremes to sea ice and snow change and will potentially risk the loss of a critical window for effective climate change mitigation. With efforts being made by environmentalists, there is still a ray of hope.

**Q5** English

Read the given passage and answer the questions that follow.

For most of human history, people lived by hunting animals and gathering wild plants. Philosophers often described this life as hard, dangerous and short because no food was grown or stored, so every day was a struggle to find something to eat. This began to change about 10,000 years ago, when people in different parts of the world started domesticating plants and animals. The agricultural revolution spread widely, and now only a few hunter-gatherer groups remain. From the progressivist point of view, it seems obvious why hunter-gatherers shifted to farming — agriculture produces more food with less effort. Crops provide far more yield per area than wild plants, and domestic animals offer a steady food source. Imagine a tired group of hunter-gatherers coming across an orchard full of fruit or a field of sheep; they would instantly see the benefits. Farming promised a more reliable and productive way to get food compared to constant foraging and hunting.

For most of history, how did humans get their food?

**A.** By trading goods

**B.** By hunting and gathering ✓

**C.** By farming crops

**D.** By raising animals only

**Q6** English

Approximately how many years ago did people begin to domesticate plants and animals?

**B.** 5,000 years ago

**C.** 10,000 years ago ✓

**D.** 20,000 years ago

**Q7** English

According to the progressivist view, what was the main advantage of agriculture over hunting and gathering?

**A.** It required more travel.

**B.** It provided more food with less effort. ✓

**C.** It preserved wild resources.

**D.** It reduced population growth.

**Q8** English

Which of the following would be the most suitable title for the passage?

**A.** The Disadvantages of Agriculture

**B.** Life of Hunter-Gatherers

**C.** The Shift from Hunting to Farming ✓

**D.** Wild Foods and Their Benefits

Scientific research plays a fundamental role in expanding human knowledge and addressing complex global challenges. Through systematic investigation and experimentation, researchers develop new theories, technologies, and solutions that improve various aspects of life. Advances in medicine, environmental science, and engineering often emerge from sustained research efforts carried out in universities and research institutions. However, scientific research also requires rigorous standards of accuracy, transparency, and ethical responsibility. Researchers must ensure that their findings are based on reliable evidence and that their methods can be verified by others. Academic integrity is particularly important because inaccurate or misleading research can have serious consequences for society. For example, flawed medical studies may lead to ineffective treatments or incorrect policy decisions. For these reasons, the scientific community emphasizes peer review, careful documentation, and open discussion of research findings. Such practices help maintain the credibility of scientific knowledge and ensure that research continues to contribute positively to human progress.

Identify the suitable title for the passage from the following options.

**A.** The Significance of Ethical and Dependable Scientific Research ✓

**B.** The Historical Development of Scientific Laboratories

**Q8** English

Read the passage and choose the correct answer to the questions based on it.

Baroque Art emerged in Europe around 1600, primarily in Rome, as a dynamic, dramatic, and emotionally intense reaction against the restrained classicism of the Renaissance and Mannerism. This style was strategically utilized by the Catholic Church during the Counter-Reformation to reaffirm its power and engage the emotions of the populace. Characterized by dramatic use of light and shadow (chiaroscuro), intense emotion, elaborate ornamentation, and a focus on movement, Baroque works sought to overwhelm the viewer. Key figures include the sculptor Bernini, known for his passionate Ecstasy of Saint Teresa, and the painter Caravaggio, whose intense naturalism and use of tenebrism (extreme chiaroscuro) revolutionized painting. The style was not monolithic; it flourished differently in Catholic and Protestant countries, demonstrating adaptability while maintaining its characteristic sense of theatrical grandeur, influencing everything from architecture to music. The movement created an immersive experience that transformed static spaces into living spectacles of divine and royal authority.

Which of the following best captures the essence of the passage?

A. The Origins of 17th-Century Italian Sculpture

B. Baroque Art: Drama, Emotion, and the Aesthetic ✓

C. The Artistic Legacy of Bernini and Caravaggio

D. Comparing Renaissance with Baroque Art

Read the passage carefully and answer the questions that follow.

In a remote village in Rajasthan, water scarcity has shaped the lives of its residents for generations. Every drop of water is valued, and traditional rainwater harvesting systems, known as "johads", have been ingeniously used to store and channel water. Women and children walk miles daily to fetch water, turning it into a communal activity that strengthens social bonds. Over time, modern interventions like solar-powered pumps have complemented these age-old practices, improving efficiency without disrupting traditional methods. The village's resilience lies not only in technology but in the people's collective awareness and adaptability. By preserving indigenous knowledge and embracing sustainable solutions, the community ensures survival amid harsh climatic conditions. This delicate balance between tradition and innovation highlights the role of human ingenuity in confronting environmental challenges. The story reflects how resource scarcity can foster cooperation, innovation, and respect for natural systems.

What is a "johad" used for in the village?

**Read the given passage and answer questions that follow.**
The Kohinoor diamond, one of the world's most famous gems, carries with it a history as dazzling as it is dark. Once believed to bring immense power to its owner, it was said to curse any man who possessed it with misfortune and tragedy. Legends trace its origins to ancient India, where it adorned the thrones of mighty rulers before being seized in battles and exchanged between empires. Every kingdom that claimed it seemed to suffer downfall soon after. When the diamond eventually came into British hands, stories of its curse deepened — kings faced turmoil, and queens guarded it carefully. Today, the Kohinoor rests among the British Crown Jewels, untouchable yet endlessly controversial. To some, it is a priceless relic of India's lost glory; to others, a reminder that even the brightest treasures may cast the darkest shadows of fate.

What idea lies at the heart of the passage's narrative?

**A.** The cultural and artistic value of ancient gemstones

**B.** The intertwined nature of power, greed, and misfortune ✓

**C.** The trade and craftsmanship of Indian jewelers

**D.** The scientific origin of the diamond's brilliance

**Q8** English

What is the tone of the passage?

**B.** Analytical and critical towards historical ownership

**C.** Reflective and mysterious with undertones of tragedy ✓

**D.** Playful and imaginative in recounting the legend

**Q9** English

What belief surrounded the possession of the Kohinoor according to legend?

**A.** It would reward its holder with lasting peace and honour.

**B.** It would bring downfall and misfortune to any man who owned it. ✓

**C.** It would vanish if passed from one ruler to another.

**D.** It would bestow power only upon queens and empresses.

Read the passage carefully and answer the questions that follow:

Urban gardens have emerged as vital spaces in modern cities, offering both ecological and social benefits. Amidst concrete buildings and busy streets, these green pockets provide residents with access to fresh vegetables, flowers, and medicinal plants. Beyond the practical benefits, urban gardens foster community engagement, bringing people together across age and cultural divides. Workshops and gardening activities teach sustainable practices, composting, and water conservation, making citizens more environmentally conscious. Studies have shown that spending time in gardens reduces stress, improves mental health, and enhances creativity. Moreover, these spaces support local biodiversity, attracting birds, bees, and other beneficial insects. As cities continue to expand, urban gardens represent a sustainable approach to integrating nature into urban life, promoting wellness, education, and ecological balance. They remind us that even in densely populated areas, small initiatives can yield significant positive impacts for both people and the environment.

Read the passage and answer the questions that follow.

Trees are vital to life on Earth. They produce oxygen, absorb carbon dioxide, and prevent soil erosion. Forests provide habitats for countless species of animals and plants, maintaining ecological balance. Trees also offer fruits, timber, and shade. In cities, they reduce pollution, lower temperatures, and improve mental health. However, deforestation has become a major problem due to urbanization, logging, and agriculture. Large-scale tree cutting causes loss of biodiversity, climate changes, and natural disasters like floods. Protecting existing forests and planting new trees are essential to ensure a sustainable environment. Every individual's effort to plant and care for trees contributes to a healthier planet for future generations.

According to the passage, what do trees absorb from the atmosphere?

**A.** Oxygen

Read the passage carefully and answer the questions that follow.

Recycling has become an essential practice in modern society to address the growing problem of waste management. By converting paper, plastic, metal, and glass into reusable materials, recycling reduces landfill burden, conserves natural resources, and lowers environmental pollution. Communities and businesses worldwide are adopting recycling programs, educating citizens about segregation of waste and proper disposal techniques. The practice also encourages innovation, as new methods are developed to process materials more efficiently. Moreover, recycling has economic benefits, generating employment opportunities in collection, sorting, and processing industries. Despite its advantages, effective recycling requires active participation from individuals, who must take responsibility for separating recyclable materials and minimizing single-use products. In this way, recycling not only preserves the environment but also promotes awareness, responsibility, and sustainable living habits, demonstrating that small individual efforts can collectively produce significant positive impacts for the planet.

Read the following passages and answer the questions that are given below.
Reading plays a vital role in the overall development of an individual and serves as the foundation for lifelong learning. Reading is a fundamental skill that shapes knowledge, imagination, and critical thinking. Books, newspapers, and articles provide information, improve vocabulary, and enhance communication skills. Reading also stimulates creativity, broadens perspectives, and helps individuals understand cultures and ideas different from their own. Students who read regularly perform better academically and can solve problems more effectively. However, with the rise of digital media, people spend less time reading traditional books. Encouraging reading habits, whether through libraries, online resources, or storytelling, is essential for personal growth and lifelong learning. Reading not only educates but also entertains and inspires, making it an indispensable activity for everyone. Therefore, nurturing a consistent reading habit from an early age can empower individuals to think critically, communicate effectively, and succeed in all aspects of life.

According to the passage, what benefit do students who read regularly experience?

**A.** They perform better academically. ✓

**B.** They spend less time studying.

**C.** They prefer digital media over books.

**D.** They become physically stronger.

**Q7** English

Read the given passage and answer the questions that follow.

Apples are juicy, sweet, and tasty, and they are also an important part of a healthy diet. Research shows that eating apples can reduce the risk of cancer, stroke, and heart disease. Studies at Cornell University and in Hawaii found nutrients in apples slow cancer cell growth and lower the risk of lung cancer. Research in Finland showed men who ate apples had a lower risk of stroke, and at the University of California-Davis, apples helped prevent harmful LDL cholesterol buildup, reducing heart attack risk.

Apples also aid digestion because they contain enzymes and fibre, particularly pectin, which lowers cholesterol. A medium apple has about 80 calories and 5 grams of fibre. Eating apples also cleans teeth and massages gums.

Apples are rich in phytochemicals, antioxidants, vitamins, and minerals like potassium and vitamin C. Phytochemicals reduce cell damage from free radicals. Combined with other fruits, like oranges, apples improve nutrient absorption. Eating at least one apple a day supports overall health.

Identify the central theme of the passage.

**A.** Apples are nutritious and contribute to overall health. ✓

**B.** Apples are only a tasty snack with no health benefits.

**C.** Fruits and vegetables are unnecessary for a healthy diet.

**D.** Apple juice is more beneficial than whole apples.

**Q8** English

Why do apples work well with other fruits, like oranges?

**A.** Apples make fruits less nutritious.

**B.** Apples reduce the benefits of other fruits.

**C.** Apples improve the body's absorption of vitamin C from oranges. ✓

Read the given passage carefully and answer the following questions.

Reality television is a type of show that claims to present unscripted dramatic or funny situations, real events, and ordinary people instead of professional actors. Although such shows have been around for many years, they have become much more popular in recent times. One reason people enjoy them is that they put regular individuals in unusual, challenging, or surprising situations, which attracts viewers' attention. These programs can also make participants widely known, sometimes turning them into celebrities or public figures. However, some experts say that the term "reality television" is not entirely accurate because many shows are partially scripted and manipulated by producers. In competition-based or special-living-environment shows, producers often dictate the format, guide daily activities, and curate the environment, creating a partly artificial world for entertainment. Despite this, viewers still enjoy the mix of drama, excitement, tension, and human reactions these shows consistently offer.

Identify the correct tone of the passage from the options.

**A.** Highly critical and accusatory

**B.** Enthusiastic and promotional

**C.** Informative and balanced ✓

**D.** Sarcastic and dismissive

**Q4** English

Read the passage carefully and answer the questions that follow.

The art of storytelling has always been a cornerstone of human culture. From ancient cave paintings to modern novels, stories have conveyed knowledge, preserved traditions, and fostered empathy. Oral traditions allowed communities to share moral lessons, historical events, and cultural values long before writing systems were developed. In contemporary society, storytelling continues to play a crucial role, shaping perspectives through literature, cinema, and digital media. Stories can inspire action, challenge social norms, and connect individuals across generations and geographies. Moreover, the process of storytelling engages both the teller and the listener, enhancing creativity, critical thinking, and emotional intelligence. As technology advances, new platforms allow stories to reach wider audiences, yet the essence remains unchanged: storytelling is a reflection of human experience, a tool to understand ourselves and others, and a bridge between the past and the present.

**Q5** English

Read the given passage and answer the questions that follow.

Gratitude is more than a polite response to kindness—it is a conscious habit that shapes how we view life. People who regularly reflect on what they have, rather than what they lack, tend to show greater resilience and emotional balance. Gratitude does not deny hardship; instead, it offers perspective by reminding us of the support and opportunities we often overlook. Psychologists note that thankful individuals sleep better, manage stress effectively, and maintain stronger relationships. In families, gratitude encourages empathy; in workplaces, it improves cooperation and motivation. Yet, in a culture driven by competition and comparison, the practice of gratitude often fades. Developing this habit requires mindfulness—the ability to pause, appreciate, and express thanks even for small blessings. Over time, such awareness transforms dissatisfaction into contentment and converts ordinary moments into sources of joy. Gratitude, therefore, is not a reaction to comfort but a discipline that nurtures peace, humility, and optimism in daily life.

Which psychological benefit of gratitude is mentioned in the passage?

**A.** It enhances intelligence

**B.** It reduces stress ✓

**C.** It promotes creativity

**D.** It decreases competition

**Q6** English

Read the given passage carefully and answer the questions that follow.

The rise of the digital economy has fundamentally transformed traditional commerce worldwide. Online platforms enable businesses to reach customers far beyond local markets, reducing costs and improving efficiency. Small and medium enterprises (SMEs) now have access to digital tools, global supply chains, and marketing opportunities that previously favoured larger firms. E-commerce has become a key driver of economic growth, innovation, and competitiveness in numerous sectors.

However, this rapid expansion has also created significant challenges. Cybersecurity threats, digital payment fraud, and data privacy concerns have increased, requiring businesses and governments to adopt robust protective measures. Additionally, workers in traditional retail sectors face the risk of displacement, making reskilling and upskilling programs essential. Policymakers are introducing regulations to ensure fair competition, consumer protection, and inclusive growth. Balancing the benefits of digital commerce with social and economic safeguards has become a pressing priority for modern economies.

Read the given passage and answer the questions that follow.

The tension between tradition and modernization is a persistent feature of rapidly evolving societies. Traditions, often rooted in cultural heritage and long-established practices, provide individuals with a sense of identity and continuity. In contrast, modernization introduces new technologies, values, and lifestyles that promise efficiency and progress. While these developments can improve living standards, they may also challenge established norms and belief systems. In many communities, younger generations tend to embrace modern ideas, whereas older generations may prefer to preserve traditional ways of life. This divergence can create conflicts within families and societies, particularly when changes are perceived as threats to cultural integrity. At the same time, some traditions may hinder social progress, especially when they conflict with principles of equality and individual freedom. Balancing tradition with modernization requires thoughtful adaptation rather than complete rejection. Societies must find ways to preserve meaningful cultural elements.

Identify a suitable title for the passage.

Summer is a popular time for pilgrimage in India, as it coincides with several religious festivals and offers favourable weather conditions for travel to many sacred sites. These pilgrimage destinations in India offer not just spiritual solace but also an opportunity to immerse oneself in the rich cultural heritage and traditions that define the country's religious landscape. Whether braving treacherous mountain trails or seeking solace in serene temple towns, pilgrims embark on a journey of self-discovery and enlightenment, guided by unwavering faith and devotion.

Vaishno Devi Temple, nestled in the picturesque Trikuta Mountains in Katra, Jammu, is dedicated to Goddess Vaishno Devi. Pilgrims embark on a challenging trek, covering approximately 13 kilometres from the base camp at Katra to the temple located at an altitude of around 5,200 feet. The journey, though strenuous, is undertaken with unwavering faith and devotion.

**Q15** English

Read the following passage carefully and answer the questions that follow.
Childhood obesity is rising rapidly in India. In 2025, around 41 million children aged 5 to 19 were overweight or obese. This reflects a global trend, with more than one in five children affected worldwide. One major reason is the sharp increase in screen time from smartphones, tablets, and televisions. Although digital devices support learning, excessive use leads to less physical activity, unhealthy eating habits, poor sleep, and weight gain. Many school students spend over two hours daily on screens for non-academic purposes, and some spend even more time on games, videos, and social media. This trend increased after the COVID period and continues today in both urban and rural areas. Too much screen use reduces exercise, encourages mindless snacking, and disrupts sleep cycles. These factors together lead to weight gain. To prevent obesity, children need balanced screen use, regular physical activity, nutritious food, and adequate sleep. Parental guidance and school awareness programs can help children build healthier habits.

How is the passage mainly structured?

**A.** Storytelling with characters and events

**B.** Comparison between two different countries

**C.** Problem followed by causes and solutions ✓

**D.** Description of a single personal experience

**Q16** English

**Q9** English

Read the following passages and answer the questions that are given below.

Success is never achieved overnight; it is built step by step through consistent hard work and dedication. Hard work is one of the most essential qualities that lead to success. It builds discipline, patience, and a strong sense of responsibility. People who work hard are better prepared to face challenges and turn their dreams into reality. Unlike luck, which is temporary, the results of hard work last for a lifetime. Students who study consistently achieve better results and develop confidence in their abilities. Hard work also earns respect and trust from others, as it reflects sincerity and dedication. Every great achievement, from scientific discoveries to athletic victories, is a result of persistent effort. When individuals work with determination and focus, they not only reach their goals but also inspire others to follow the same path toward success and self-improvement. In every walk of life, hard work remains the true key that unlocks the door to lasting success and personal growth.

Read the passage carefully and answer the following questions.
We should remember that a contented mind and healthy living can help to keep us free from many diseases. In some ways, it is easier for the people in developing nations to achieve positive health, because they have more close-knit social systems, with better communication between people, than do many people in wealthy and developed nations. With very little by way of resources or sophisticated medical facilities we can achieve positive health for the majority of individuals in our communities. This does not mean that we do not need medical care. We definitely need proper medical care under certain circumstances. We need proper vaccination and immunisation against infectious diseases, proper treatment of diseases by medical and surgical intervention required proper maternal care before and after child birth, and regular medical checks after the age of forty years.

According to the passage, why it is easier for the people in developing nations to achieve positive health?

Read the passage carefully and answer the following questions.

In the history of science, few names are as significant as Marie Curie. She was born in Warsaw, Poland in 1867 and became a highly influential figure in physics and chemistry due to her strong determination and thirst for knowledge. Marie Curie faced many challenges in her early years, especially because she was a woman in a field dominated by men. However, she didn't let this discourage her. She excelled in her studies and eventually went to Paris for further education, where she met Pierre Curie, a fellow scientist who later became her husband and research partner. Together, the Curies explored the mysterious world of radioactivity and made groundbreaking discoveries, identifying two new elements: polonium and radium. Marie Curie became the first woman to win a Nobel Prize and later, the first person to win two Nobel Prizes in different scientific areas. But her contributions went beyond discoveries. She pioneered radiotherapy, using radium to treat cancer.

**Q6** English

Read the passage and choose the correct answer to the questions based on it.

The Vikings, Norse seafaring people from Scandinavia, dominated European history from the late 8th to the mid-11th centuries—an era known as the Viking Age. While often stereotyped solely as brutal raiders, the Vikings were also skilled traders, explorers, and settlers. Their longships, marvels of maritime engineering, allowed them to launch swift, terrifying attacks on wealthy monasteries, but also enabled extensive trade routes stretching from North America to the Middle East.Their culture was rich with complex mythology, centered on gods like Odin and Thor, and elaborate burial rituals involving ships. The Vikings weren't just destructive forces; they established important settlements and political centers in places like Britain (the Danelaw), France (Normandy), and Russia. They split into various tribes as they started fighting amongst themselves. Their lasting legacy includes their influence on language, trade, and the geopolitical map of medieval Europe, revealing a society of adaptability and formidable ambition.

Read the passage and answer the following questions.

In the fable 'The Monkey and the Crocodile', a clever monkey lives near a river and befriends a crocodile. The crocodile, tempted by the idea of eating the monkey's heart, invites him to his home. Sensing danger, the monkey uses his wit to save himself. When the crocodile tries to carry him across the river, the monkey cleverly tricks the crocodile by saying he left his heart on the tree and needs to fetch it. The crocodile returns him to safety, and the monkey escapes unharmed. The story highlights intelligence and quick thinking as tools for survival. It teaches that cleverness can overcome physical strength and that one must be cautious of hidden motives, even from friends. Through lively storytelling, the fable conveys lessons on trust, resourcefulness, and the importance of thinking before acting.

**Q8** English

Read the following passage and answer the questions.

In the fable The Bird with Two Heads, a bird is born with two heads. At first, the heads argue constantly, each wanting to eat and fly differently. This disagreement causes confusion and prevents the bird from acting effectively. Observing the chaos, the other birds warn the two-headed bird that it must learn to cooperate or it will suffer. Gradually, the two heads realize that they can survive and thrive only if they agree on their actions and share responsibilities. Once they start cooperating, the bird becomes strong, capable of finding food and flying safely. The story teaches the importance of unity, cooperation, and working together despite differences. It emphasizes that conflict within oneself or between partners can lead to failure, while harmony and coordination bring success.

According to the fable, what was the primary catalyst that forced the two heads to transition from conflict to cooperation?

**A.** B. A lack of physical strength that prevented the bird from being able to fly at all.

**B.** A. The realization that their survival and ability to thrive depended on shared actions. ✓

**C.** C. A direct command from the other birds who threatened to exile the two-headed bird.

**Q14** English

Read the following passage carefully and answer the questions based on it.

Golf is a precision sport that combines skill, patience, and strategic thinking, played on a large outdoor course with natural landscapes. The objective is to hit a small ball into a series of holes using as few strokes as possible. Each course is designed with challenges such as sand bunkers, water hazards, and uneven ground, which test the player's control and planning. Unlike many fast-paced sports, golf requires calm focus and careful decision-making before every shot. Players must judge distance, wind direction, and the condition of the ground to perform well. The game is usually played individually, but it also encourages sportsmanship and respect among players. Golf is popular worldwide and is often associated with discipline and mental strength. Learning golf can improve concentration and patience, making it not only a sport but also a valuable life skill that teaches persistence and thoughtful action over time in real life situations.

How is the passage mainly organized?

**Q13** English

Read the following passage and answer the questions given below.
Urban green spaces, such as parks, gardens, and tree-lined streets, play a vital role in improving the quality of life in cities. They provide residents with areas for recreation, relaxation, and social interaction, contributing to both physical and mental well-being. In addition, green spaces help reduce air pollution, regulate temperature, and support biodiversity by offering habitats for various species. Despite these benefits, rapid urbanization has led to the reduction of such areas in many cities around the world. Expanding infrastructure and population growth often take precedence over environmental considerations. However, urban planners and policymakers are increasingly recognizing the importance of integrating green spaces into city development. Initiatives such as rooftop gardens, vertical forests, and community parks are being promoted to address this issue. By balancing development with environmental sustainability, cities can create healthier and more livable environments for present and future generations. These efforts require consistent planning, investment, and active community participation.

What is the central theme of the passage?

**A.** D. The growth of infrastructure in modern cities

**B.** A. The importance and preservation of urban green spaces ✓

**C.** C. The decline of biodiversity in rural areas

**D.** B. The role of community parks in entertainment

Read the following passage and answer the questions given below.
Deserts are among the most extreme environments on Earth, characterized by low rainfall, intense temperatures, and limited vegetation. Despite these harsh conditions, deserts support a surprising variety of life forms that have adapted uniquely to survive. Plants such as cacti store water in their tissues, while animals like camels and reptiles conserve moisture and remain active during cooler periods. Deserts can be hot, like the Sahara, or cold, like the Gobi, demonstrating their diverse nature. Human settlements in deserts are often sparse, with communities relying on scarce water resources and traditional knowledge to sustain their livelihoods. However, deserts are increasingly affected by human activities such as mining, overgrazing, and climate change, which threaten their fragile ecosystems. Understanding desert environments is essential for developing sustainable practices that protect biodiversity while supporting the needs of people who inhabit these challenging regions. Effective conservation strategies are necessary to ensure long-term ecological balance and environmental sustainability in these regions.

How do desert plants like cacti survive?

**A.** By absorbing moisture from the air

**B.** By storing water in their tissues ✓

**C.** By growing only during rainy seasons

**D.** By depending on other plants for survival

Read the given passage and answer the questions that follow.

The Bermuda Triangle is a region in the western part of the North Atlantic Ocean, roughly bounded by Florida, Bermuda, and Puerto Rico. It has long been associated with mysterious disappearances of ships and aircraft. Several incidents reported in the twentieth century, including the sudden vanishing of vessels without clear explanation, have contributed to its reputation as a dangerous area.

Many theories have been proposed to explain these events. Some people believe in supernatural causes, such as alien activity or unknown forces. However, scientists suggest more logical explanations, including sudden weather changes, powerful ocean currents, and human error. The region is also known for its unpredictable storms, which can make navigation difficult.

Despite its mysterious image, there is no scientific evidence proving that the Bermuda Triangle is more dangerous than other parts of the ocean. Most experts agree that natural causes are sufficient to explain the incidents reported over time.

Read the passage carefully and answer the questions that follow.

Walk into any supermarket in an Indian city today, and you'll likely spot a few baskets of avocados of different shapes and sizes. Avocado, botanically known as Persea americana, is native to Central America. Long before it became the Instagram sensation it is today, avocado was already a thing — about 10,000 years ago, in Coaxcatlan, Puebla (Mexico). In ancient Mesoamerica and northern South America, the fruit wasn't just food; it held cultural and agricultural significance. The Spanish, upon their arrival, were smitten too, that they wrote about it with the same enthusiasm we now reserve for guacamole recipes. However, the real shift came around 1900, when horticulturists realised that grafting could produce the best seedlings and turn avocado into a serious business. Since then, avocado cultivation has expanded to many regions with suitable climates, including India. Today, avocado is the fourth most important tropical fruit in the world.

Choose the most appropriate title for the passage.

Read the passage carefully and answer the questions that follow.

The city's roadsides in summers are often seen with colourful bottles of sharbat syrups lined up, while vendors are offering glasses of sharbat to thirsty customers. Several years ago, people in the Middle East introduced the sharbat drink to keep themselves cool and hydrated in the hot and humid weather. This tasty drink was originally made with rose petals and a mix of fruits like oranges and mangoes, etc, along with chia seeds as a main ingredient. The drink has travelled across regions and with the movement of trade, sharbat slowly finds a place in India. Earlier, people made sharbat syrup by themselves by soaking roots of the nannari plant for hours, and it was strained, then the mix was boiled along with a lemon slice and palm sugar or jaggery. After extracting the syrup, they made the drink, which was then stored in mud pots to keep it cool.

**Q14** English

Read the passage carefully and answer the questions that follow.

Cushing's syndrome happens when there is too much cortisol in the body over a long period. Cortisol is produced by the adrenal glands and helps control blood pressure, metabolism, immunity, and the body's response to stress. When cortisol remains high, it affects many organs. The most common cause is long-term use of steroid medicines prescribed for asthma, autoimmune diseases, arthritis, or after organ transplants. This is called exogenous Cushing's syndrome.

In endogenous Cushing's syndrome on the other hand, the body produces excess cortisol on its own. This is usually due to a non-cancerous tumour in the pituitary gland (called Cushing's disease). The pituitary gland is a small gland located at the base of the brain. Less commonly, it may be caused by tumours in the adrenal glands or by tumours elsewhere in the body that produce ACTH, a hormone normally released by the pituitary gland.

Choose the most appropriate title for the passage.

Read the given passage carefully and answer the questions that follow.

Every person has the same twenty-four hours in a day, but how we use them makes all the difference. Time is one of the most valuable resources in life, and how we use it determines our success and happiness. Time management is the practice of organizing and planning how to divide time between tasks effectively. Good time management increases productivity, reduces stress, and ensures that important activities are completed on time. Students, professionals, and everyone can benefit from prioritizing tasks, setting goals, and avoiding procrastination. Poor time management can lead to missed deadlines, poor performance, and increased pressure. Using tools like planners, schedules, and digital reminders can help manage time efficiently. By valuing time and organizing activities wisely, individuals can achieve their goals, balance work and leisure, and lead a more disciplined and fulfilling life. Therefore, learning and practicing time management daily can lead to greater success, peace of mind, and a well-balanced future.

According to the passage, what are some tools that can help people manage their time efficiently?

**Read the given passage and answer the questions that follow.**

Long ago, in the desert hills of Rajasthan, stood the majestic Bhangarh Fort — a stronghold of beauty and mystery. Princess Ratnavati, famed for her grace, was loved by her people but envied by a sorcerer who practiced dark magic. Obsessed with her, he brewed a love potion, hoping to win her heart. But the clever princess saw through his trickery and flung the potion onto a nearby boulder. The rock rolled toward the sorcerer, crushing him beneath its weight. With his dying breath, he cursed Bhangarh — vowing that no life would ever flourish there again. Shortly after, the fort fell to ruin, and its palaces turned to dust. Today, visitors claim to hear laughter echo through empty halls and see shadows flicker under the moonlight. The government forbids anyone from entering after sunset — a rule born of fear and the fort's unending whisper: the curse still lingers.

What did the sorcerer use in his attempt to enchant the princess?

**A.** C. A jeweled crown

**B.** A. A magic mirror

**C.** B. A love potion ✓

**D.** D. A cursed scroll

**Q14** English

Read the passage carefully and answer the questions that follow.

One aspect of the history of catastrophe markets is very old. Weather gambling was described by one newspaper in 1931 as 'one of the oldest, most fascinating and uncertain gambles in the world'. In 1886, betting on how long it would rain was in fashion, and, by the 1930s, office weather pools were commonplace. Weather gambling has now taken organised forms from the 19th to the 21st centuries, from informal bets to gambling rings and lotteries. Rain betting, the oldest and most common form of weather gambling, was often tied to local community traditions. It flourished in Calcutta and Bombay in the 1880s and '90s. Crowds gathered to gamble on whether a rain gauge would overflow, confident that cheating was impossible because there was no ambiguity in a downpour. As one newspaper remarked: 'When it rains in India it rains; there is no half-way business about it.'

**Q7** English

Read the passage and choose the correct answer to the questions based on it.

John Bunyan (1628-1688) was an English Christian writer and preacher, whose enduring literary fame rests almost entirely on his allegorical masterpiece, The Pilgrim's Progress. Born into a humble background as a tinker, Bunyan's life was marked by deep spiritual conviction and subsequent persecution for his non-conformist religious beliefs, leading to multiple imprisonments. It was during one of these incarcerations that he composed his seminal work.

The Pilgrim's Progress is structured as a dream vision, chronicling the journey of the protagonist, Christian, from the City of Destruction to the Celestial City. The narrative is a profound allegory for the Christian life, filled with vivid personifications like Obstinate, Pliable, and the daunting Slough of Despond. Despite its religious theme, Bunyan's simple, muscular prose and compelling narrative make the book a significant piece of English literature. His work provides a fascinating study of faith, perseverance, and the struggle for salvation.

Which of the following would be the most precise title for the passage?

**A.** C. The Life of a Puritan Preacher

**B.** A. John Bunyan: The Master of Allegory ✓

**C.** B. The History of English Non-Conformism

**D.** D. The Influence of Christianity on English

**Q10** English

Read the given passage carefully and answer the following questions.

Swami Vivekananda's inspiring personality was well known both in India and in America during the last decade of the twentieth century. The unknown monk of India suddenly leapt into the Parliament of Religions in Chicago in 1893, at which he represented Hinduism. His vast knowledge of Eastern and Western cultures, as well as his deep spiritual insight, fervid eloquence, brilliant conversation, broad human sympathy, colorful personality, and handsome figure made an irresistible appeal to the many types of Americans who came in contact with him. People who saw or heard Vivekananda even once still cherish his memory after a lapse of more than half a century. In America, Vivekananda's mission was the interpretation of India's spiritual culture, especially in its Vedantic setting. He also tried to enrich the religious consciousness of the Americans through the rational and humanistic teachings of the Vedanta philosophy.

**Q7** English

Read the given passage and answer questions that follow.

Perched on a hill in the quiet town of Junee, New South Wales, the Monte Cristo Homestead is often called Australia's most haunted house. Built in 1885 by Christopher William Crawley, the grand Victorian mansion once symbolised wealth and prosperity. Over the decades, however, it became shrouded in eerie legends. Visitors have reported strange lights, sudden chills, ghostly footsteps, and the presence of unseen figures. One tale speaks of Elizabeth Crawley, the matron of the house, whose spirit is said to wander the corridors and attic chapel she once cherished. After years of neglect following the family's departure in 1948, the homestead was restored by the Ryan family in the 1960s and opened for ghost tours. Though recently closed to the public, the Monte Cristo Homestead continues to fascinate as a place where history, tragedy, and mystery intertwine, leaving an unforgettable mark on Australian folklore.

Which detail best supports the house's reputation as haunted?

**Q11** English

Read the passage and answer the questions that follow:
Trees play an essential role in maintaining ecological balance and supporting life on Earth. They absorb carbon dioxide and release oxygen, making the air breathable for living organisms. In addition to improving air quality, trees help regulate temperature by providing shade and reducing the impact of heat. Their roots bind the soil together, preventing erosion and maintaining soil fertility. Furthermore, trees serve as habitats for numerous species of birds, insects, and animals, thereby supporting biodiversity. They also contribute to the water cycle by facilitating rainfall and maintaining groundwater levels. Despite their importance, deforestation continues to threaten ecosystems across the globe. Human activities such as urban expansion and industrial development often lead to the large-scale removal of trees. Protecting and planting trees is therefore crucial for sustaining environmental health. Awareness and collective action can ensure that future generations inherit a greener and more balanced planet.

Identify a suitable title for the passage:

**Q4** English

Read the given passage carefully and answer the following questions.

The greatest advantage of waking up early is the sense of discipline and calm it brings to one's life. The stillness of dawn creates the perfect setting for clear thinking, thoughtful planning, and productive work without any disturbance. During these quiet hours, the mind remains fresh and focused, helping a person finish tasks more efficiently. Rising early also gives time for gentle exercise or reading, which keeps both the body and mind active throughout the day. As a result, the entire day progresses smoothly, without any feeling of hurry or pressure. Evenings then remain peaceful and unhurried, leaving moments for relaxation, pleasant conversation, or a quiet walk under the soft evening sky. Such restful hours lead to deep and refreshing sleep, allowing one to wake up with renewed energy and enthusiasm. This steady habit builds health, happiness, and inner balance, filling every new day with motivation and confidence.

Which of the following is the most suitable title for the passage?

- **A.** D. The Quiet Charm of Evening Walks
- **B.** A. The Importance of Deep and Refreshing Sleep
- **C.** C. The Profound Benefits of Waking Up Early ✓
- **D.** B. Benefits of Leisure Activities

**Q10** English

Read the passage and answer the questions that follow.

Social media has become an integral part of teenagers' lives, influencing how they communicate, learn, and perceive the world. Platforms such as messaging apps and online networks allow teenagers to stay connected with friends and access information instantly. This connectivity can enhance learning opportunities and foster creativity through the sharing of ideas and content. However, excessive use of social media may also lead to negative consequences. Teenagers often experience reduced attention spans, sleep disturbances, and increased exposure to unrealistic standards. The constant need for validation through likes and comments can affect self-esteem and mental well-being. Additionally, the spread of misinformation poses challenges to critical thinking and informed decision-making. Peer comparison on social media can also create feelings of inadequacy among teenagers. Therefore, while social media offers significant benefits, it must be used responsibly. Encouraging balanced usage and promoting digital awareness can help teenagers maximise its advantages while minimising its risks.

Identify a suitable title for the passage.

**A.** The Role of Digital Platforms in Modern Communication Systems

**Q11** English

Read the following passage carefully and answer the questions that follow.
In India, energy comes from both renewable and non-renewable sources. Non-renewable sources such as coal, oil, and natural gas are widely used but cause pollution and may run out in the future. Renewable sources like solar, wind, hydro, and biomass are cleaner and can be used for a long time without being exhausted. India is working to increase the use of renewable energy to reduce pollution and protect the environment. Solar and wind energy are growing rapidly due to government support and improved technology. Energy efficiency is also important, as it helps reduce waste and save resources. The country is focusing on cleaner energy solutions such as electric vehicles and better power systems. These steps can reduce carbon emissions and improve air quality. By using more renewable energy and improving efficiency, India aims to build a sustainable future. Responsible use of energy by individuals and industries is also necessary to ensure long-term energy security and environmental protection.

Which option gives the most complete summary?

**Q9** English

Read the given passage carefully and answer the questions that follow.

The Gupta Empire, often regarded as a golden age of ancient India, witnessed remarkable cultural development. During this period, art, literature, science, and philosophy flourished. Sanskrit became the dominant language of literature, and great works such as those by Kalidasa were composed. These writings reflected both artistic excellence and deep understanding of human emotions.

In the field of science, scholars made important contributions to mathematics and astronomy. The concept of zero and advances in the decimal system are often linked to this period. Temples and sculptures created during the Gupta era displayed fine craftsmanship and aesthetic balance, influencing later artistic traditions.

Education also progressed, with institutions like Nalanda becoming centres of learning. These universities attracted scholars from different regions, promoting intellectual exchange. The achievements of the Gupta Empire not only enriched Indian culture but also left a lasting impact on the development of knowledge and art in the wider world.

Why is the Gupta period called a "golden age"?

**A.** B. It expanded trade across regions.

**B.** C. It increased agricultural production.

**C.** A. It saw major cultural developments. ✓

**D.** D. It developed urban infrastructure.

**Q10** English

Read the passage and answer the questions that follow.

Artificial Intelligence (AI) has rapidly transformed various aspects of modern life, from healthcare and education to transportation and communication. While AI offers efficiency, accuracy, and convenience, it also raises significant ethical concerns. One major issue is the potential loss of jobs as machines increasingly replace human labour. This shift creates uncertainty about economic stability and the future workforce. Another concern involves decision-making by AI systems. Algorithms may unintentionally reflect biases present in the data they are trained on, leading to unfair or discriminatory outcomes. Questions also arise regarding accountability—when an AI system makes an error, it becomes difficult to determine who is responsible. Furthermore, the use of AI in surveillance and data collection has sparked debates about privacy and individual freedom. Despite these challenges, AI continues to advance, offering immense possibilities. Therefore, it is essential to establish ethical guidelines and regulations to ensure that AI development remains beneficial, fair, and aligned with human values.

**Q10** English

Read the passage and answer the questions that follow.

The first law of human nature is simple but powerful: we are driven by our emotions more than we realize. We like to think we are logical, but often, our decisions are clouded by feelings like anger, envy, or sudden excitement. This is why we sometimes fall into self-destructive patterns that we seem unable to control. To gain real power and control over our lives, we must first master this emotional self. The goal is not to eliminate feelings, but to create a moment of mental space before reacting. We must learn to step back and observe our emotions without letting them take over our thinking. When you feel a strong impulse, learn to pause. This practice of observation—looking within to see the source of your troubling emotions—is how you begin to break those negative patterns. By accepting that irrationality is part of human nature, you choose reason over impulse.

**Q12** English

Read the following passage carefully and answer the questions that follow.
The global proliferation of plastic debris has escalated into a systemic crisis, with an astronomical volume of waste—comparable to the diurnal discharge of 2,000 refuse vehicles—inundating our primary aquatic arteries. Annually, an estimated 19 to 23 million tonnes of polymer pollutants infiltrate marine and freshwater ecosystems, instigating a profound ecological destabilization. This contamination transcends mere aesthetic degradation; it fundamentally reconfigures natural habitats and impedes the regenerative resilience of ecosystems struggling against climatic shifts. Consequently, this disruption precipitates a deleterious ripple effect on human civilization, undermining food security, jeopardizing livelihoods, and eroding collective social well-being. As evidenced by UNEP research, plastic pollution is not an isolated phenomenon but an interconnected threat. It necessitates a holistic analytical framework that evaluates plastic-related risks in tandem with collateral environmental stressors, such as biodiversity loss and resource depletion. Addressing this exigency requires acknowledging the intricate nexus between synthetic waste and the broader anthropogenic pressures currently reshaping our planet's biosphere.

Identify the predominant tone of the given passage.

**A.** Analytical and Urgent ✓

**B.** Alarmist and Hyperbolic

**C.** Apathetic and Detached

That nippy December morning, I woke up amidst the pine forest to my alarm blaring into my ears. Groggily getting out of my bed, I looked outside my window. The dawn lit mountains basked in the first rays of the Sun, the birds warbled in the trees, and mist evaporated over the tin roofs as though dancing in the golden beam, rejoicing the start of yet another brand new day. I looked at our two mutts who seemed rather too sleepy, for they were snuggled cosy in the blanket, with Tee completely unaware of the fact that I was tying my shoelaces, which usually is a sign of 'It's time for our walk, doggos'. It's usually the two of them waking us up before the alarm, but I let them sleep and decide to go alone, until I happened to stare at my phone screen flashing the current time as 8:30 AM.

Read the passage carefully and answer the questions that follow.

In the dense forests of Western Ghats, the Malabar hornbill is a symbol of resilience and ecological balance. This large bird, with its striking yellow beak and black plumage, plays a vital role in seed dispersal, helping maintain the forest's biodiversity. Local communities regard it with reverence, associating its presence with the health of the forest. Despite its importance, the hornbill faces threats from deforestation and habitat fragmentation. Conservationists have initiated awareness programs, teaching villagers the significance of protecting these birds and their habitats. Efforts include establishing nesting boxes, prohibiting hunting, and restoring native trees. These combined actions aim to ensure that future generations witness the hornbill soaring through the forests, a living reminder of nature's delicate balance. The survival of this species is intertwined with human responsibility, illustrating that coexistence and environmental stewardship are essential for sustaining life.

**ନିମ୍ନଲିଖିତ ଅନୁଚ୍ଛେଦର ବିଷୟବସ୍ତୁକୁ ଭଲଭାବରେ ପଢ । ତା ତଳେ ପ୍ରଦତ୍ତ ପ୍ରତ୍ୟେକ ପ୍ରଶ୍ନର ଚାରିଟି ସମ୍ଭାବିତ ଉତ୍ତର ମଧ୍ୟରୁ ସଠିକ ଉତ୍ତରକୁ ଚୟନ କରନ୍ତୁ ।**

“ସିନ୍ଧୁ ଉପତ୍ୟକା ସଭ୍ୟତା" ଶବ୍ଦଟି ସିନ୍ଧୁ ନଦୀର ନାମରୁ ଆସିଛି, ଏହା ଦକ୍ଷିଣ ଏସିଆର ପ୍ରମୁଖ ନଦୀଗୁଡ଼ିକ ମଧ୍ୟରୁ ଗୋଟିଏ ଯାହା ବର୍ତ୍ତମାନର ପାକିସ୍ତାନ ଏବଂ ଉତ୍ତର-ପଶ୍ଚିମ ଭାରତ ଦେଇ ପ୍ରବାହିତ ହୁଏ। ଏହି ନାମ ଏହାର ଭୌଗୋଳିକ ସ୍ଥଳବିଶେଷ ଏବଂ ସିନ୍ଧୁ ନଦୀ ଅବବାହିକାରେ ହୋଇଥିବା ପ୍ରତ୍ନତାତ୍ତ୍ୱିକ ଆବିଷ୍କାର ଉଭୟକୁ ପ୍ରତିଫଳିତ କରେ।

"ସିନ୍ଧୁ" ଶବ୍ଦର ଏକ ପ୍ରାଚୀନ ଭାଷାଗତ ଇତିହାସ ଅଛି। ଏହା ପୁରୁଣା ପାରସ୍ୟ ଶବ୍ଦ "Hinduš" କୁ ଫେରିଯାଏ, ଯାହା ସିନ୍ଧୁ ନଦୀ ଚାରିପାଖର ଭୂମିକୁ ବୁଝାଏ। ପାରସ୍ୟ ଲୋକମାନେ ଏହି ଶବ୍ଦକୁ ସଂସ୍କୃତ ଶବ୍ଦ "ସିନ୍ଧୁ " ରୁ ଗ୍ରହଣ କରିଥିଲେ, ଯାହାର ଅର୍ଥ "ନଦୀ" କିମ୍ବା ବିଶେଷ ଭାବରେ "ସିନ୍ଧୁ ନଦୀ"। ଭାରତୀୟ ଉପମହାଦେଶର ସବୁଠାରୁ ପୁରୁଣା ଗ୍ରନ୍ଥ ମଧ୍ୟରୁ ଗୋଟିଏ, ରଗ ବେଦରେ, ସିନ୍ଧୁ କେବଳ ନଦୀ ନୁହେଁ ବରଂ ଏହାର ଚାରିପାଖର ଅଞ୍ଚଳକୁ ମଧ୍ୟ ବର୍ଣ୍ଣନା କରିବାକୁ ବାରମ୍ବାର ଦେଖାଯାଏ । ଯେତେବେଳେ ପାରସ୍ୟମାନେ ସିନ୍ଧୁ ନଦୀର ସମ୍ମୁଖୀନ ହେଲେ, ସିନ୍ଧୁରେ ପ୍ରାରମ୍ଭିକ "s" ଶବ୍ଦକୁ "h" ଭାବରେ ଉଚ୍ଚାରଣ କରାଯାଇଥିଲା ।

“ସିନ୍ଧୁ" ନାମଟି ଲାଟିନ ଭାଷା ମାଧ୍ୟମରେ ଇଂରାଜୀରେ ଆସିଛି | ଏଥିରୁ ଇଂରାଜୀ ଶବ୍ଦ "ଇଣ୍ଡିଆ" ବିକଶିତ ହୋଇଥିଲା, ଯାହା ମୂଳତଃ ସିନ୍ଧୁ ନଦୀ ସେପାରିରେ ଥିବା ଭୂମିକୁ ବୁଝାଉଥିଲା। ତେଣୁ, ସଭ୍ୟତାର ନାମ - ସିନ୍ଧୁ ଉପତ୍ୟକା ସଭ୍ୟତା - ଆଧୁନିକ ଇଂରାଜୀରେ ପ୍ରବେଶ କରିବା ପୂର୍ବରୁ ସଂସ୍କୃତ, ପାରସ୍ୟ, ଗ୍ରୀକ୍ ଏବଂ ଲାଟିନ୍ ଦେଇ ଗତି କରିଥିବା ଏକ ଭାଷାଗତ ଶୃଙ୍ଖଳକୁ ପ୍ରତିଫଳିତ କରେ।

ଏହି ସଭ୍ୟତା ଅନ୍ୟ ଏକ ଶବ୍ଦ ହରପ୍ପା ସଭ୍ୟତା ଦ୍ୱାରା ମଧ୍ୟ ବେଶ ପରିଚିତ , ଯାହା ହରପ୍ପାଙ୍କ ନାମ ଅନୁସାରେ ନାମିତ ହୋଇଛି। "ହରପ୍ପା" ନିଜେ ସ୍ଥାନୀୟ ଗ୍ରାମର ଆଧୁନିକ ନାମରୁ ଆସିଛି, ପ୍ରାଚୀନ ଏବଂ ଆଧୁନିକ ଭୂଗୋଳ ମଧ୍ୟରେ ଏକ ନିରନ୍ତରତା ରଖିଛି ।

ତେଣୁ, "ସିନ୍ଧୁ ଉପତ୍ୟକା ସଭ୍ୟତା" ଶବ୍ଦର ବ୍ୟୁତ୍ପତ୍ତି ସିନ୍ଧୁ କ୍ଷେତ୍ର ସହିତ ଜଡିତ ନାମଗୁଡ଼ିକର ଦୀର୍ଘ ଐତିହାସିକ ଏବଂ ଭାଷାଗତ ବିବର୍ତ୍ତନକୁ ପ୍ରକାଶ କରିଥାଏ । ଏହା ଆଲୋକିତ କରେ ଯେ ସାଂସ୍କୃତିକ ସମ୍ପର୍କ ଏବଂ ବିଜୟ ଆଜି ଆମେ ବ୍ୟବହାର କରୁଥିବା ଶବ୍ଦକୁ କିପରି ଆକାର ଦେଇଥିଲା। ସିନ୍ଧୁରୁ ସିନ୍ଧୁ ପର୍ଯ୍ୟନ୍ତ, ଏହି ନାମଟି ମାନବଜାତିର ପ୍ରାରମ୍ଭିକ ସଭ୍ୟତା ମଧ୍ୟରୁ ଗୋଟିଏକୁ ବଞ୍ଚାୟ ରଖିଥିବା ଭୌତିକ ନଦୀ ଏବଂ ପ୍ରାଚୀନ ଭାରତକୁ ବ୍ୟାପକ ବିଶ୍ୱରେ ପରିଚିତ କରାଇବାର ଭାଷାଗତ ଯାତ୍ରା ଉଭୟକୁ ମୂର୍ତ୍ତିମନ୍ତ କରେ।

## Reasoning

**Q1** Reasoning

A, B, C, D, E, F and G are sitting around a circular table, facing the center. E sits third to the right of F. D sits fourth to the right of C. A sits second to the right of E. B is the immediate neighbour of D. How many people sit between D and A when counted from the right of D?

- **A.** One
- **B.** Two
- **C.** Three ✓
- **D.** Four

**Q2** Reasoning

Each of S, T, U, V, M, N and O has an exam on a different day of a week starting from Monday and ending on Sunday of the same week. Only two people have an exam before T. Only one person has an exam after U. Only three people have an exam between T and M. Only one person has an exam between N and S. V has an exam just before N.
How many people have an exam between O and N?

- **A.** One
- **B.** Two ✓
- **C.** Three
- **D.** Four

**Q3** Reasoning

Select the triad which follows the same pattern as that followed by the two triads given below. Both triads follow the same pattern.
ME-OH-RT
KC-MF-PR

- **A.** IA-KD-NP ✓
- **B.** IA-KD-NO
- **C.** JA-KD-NO
- **D.** JA-KE-NO

**Q4** Reasoning

If 'A' stands for '÷', 'B' stands for '×', 'C' stands for '+' and 'D' stands for '-', what will come in place of the question mark '?' in the following equation?
44 A 4 C 13 B 3 D (10 A 2) = ?

- **A.** 45 ✓
- **B.** 56
- **C.** 32
- **D.** 60

**Q5** Reasoning

Which of the following options will replace the question mark (?) in the given series to make it logically complete?

BAED HGKJ ? TSWV ZYCB

- **A.** NMQP ✓
- **B.** ZZBA
- **C.** ZXBA
- **D.** ZACB

**Q6** Reasoning

In a certain code language,
A @ B means 'A is the father of B'
A & B means 'A is the wife of B'
A # B means 'A is the husband of B'
A % B means 'A is the mother of B'

Based on the above, how is P related to T if 'P # Q % R & S @ T'?

- **A.** Father's father
- **B.** Wife's father
- **C.** Mother's brother
- **D.** Mother's father ✓

**Q7** Reasoning

In a certain code language, 'lemon sand quip' is coded as 'nd he zf' and 'quip desk salad' is coded as 'he ww mr'. How is 'quip' coded in the given language?

- **A.** he ✓
- **B.** nd
- **C.** zf
- **D.** ww

**Q8** Reasoning

Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements: All Hydrogens are Oxygens. Some Oxygens are Nitrogens.
Conclusion I: Some Hydrogens are Nitrogens.
Conclusion II: No Nitrogens are Hydrogens.

**A.** Only conclusion (I) follows

**B.** Only conclusion (II) follows

**C.** Neither conclusion (I) nor (II) follows ✓

**D.** Both conclusions (I) and (II) follow

**Q9** Reasoning

Based on the alphabetical order, three of the following four are alike in a certain way and thus form a group. Which is the one that does not belong to that group?
(Note: The odd one out is not based on the number of consonants/vowels or their position in the letter cluster.)

**A.** TVS ✓

**B.** JKI

**C.** ABZ

**D.** PQO

**Q10** Reasoning

Each vowel in the word AIRPORT is changed to the letter immediately following it in the English alphabetical order and each consonant is changed to the letter immediately preceding it in the English alphabetical order. Which of the following letters will be third from the left in the new group of letters thus formed?

**A.** Q ✓

**B.** R

**C.** O

**D.** B

## Reasoning

**Q1** Reasoning

Five friends Akash, Bina, Charan, Debolina and Ekta are standing in a straight line, facing the south. Only three friends are standing between Debolina and Ekta. Akash is standing to the immediate left of Debolina. Charan is standing to the immediate right of Ekta. Who is standing at the third position from the left end of the line?

A. Akash
B. Charan
C. Bina ✓
D. Debolina

**Q2** Reasoning

T is the daughter of Y. X is the husband of W. W is the daughter of T. U is the brother of T. U is the son of Z. Z is the wife of Y. How is U related to W?

A. Father
B. Husband's brother
C. Mother's brother ✓
D. Father's father

**Q3** Reasoning

Each of S, T, U, V, M, N and O has an exam on a different day of a week, starting from Monday and ending on Sunday of the same week. Only three people have exam between U and V. V has exam on the last day of the week. Only one person has exam between S and T. O has exam immediately the day before M. N doesn't have exam on Friday. How many people have exam between N and O?

A. One
B. Two
C. Three ✓
D. Four

**Q4** Reasoning

RACE is related to FOQS in a certain way based on the English alphabetical order. In the same way, VEGI is related to JSUW. To which of the following options is LUWY related, following the same logic?

A. ZIKM ✓
B. ZMKI
C. ZSWE
D. ZMKO

**Q5** Reasoning

What will come in the place of '?' in the following equation, if '+' and '-' are interchanged and 'x' and '÷' are interchanged?
19 ÷ 6 + 65 x 13 - 5 = ?

A. 114 ✓
B. 126
C. 137
D. 144

**Q6** Reasoning

Which of the following options will replace the question mark (?) in the given series to make it logically complete?

TWUT WZXW ? CFDC FIGF

A. FGIH
B. ZCAZ ✓
C. FJFE
D. FHFE

**Q7** Reasoning

In a certain code language, 'pizza tip dream' is coded as 'wd ec st' and 'wave pizza gum' is coded as 'ec vk bf'. How is 'pizza' coded in the given language?

A. ec ✓
B. wd
C. st
D. vk

**Q8** Reasoning

Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statement: No Books are Magazines. All Magazines are Newspapers.
Conclusion I: Some Newspapers are Magazines.
Conclusion II: Some Books are Newspapers.

A. Only conclusion (I) follows ✓
B. Only conclusion (II) follows
C. Neither conclusion (I) nor (II) follows
D. Both conclusions (I) and (II) follow

## Reasoning

**Q1** Reasoning

In a straight seating arrangement, 4 friends (Ram, Arjun, Mohan and Sham) are sitting in a row facing north. Ram is sitting to the immediate right of Arjun, and Mohan is sitting to the immediate left of Sham. Arjun is not an immediate neighbour of Sham. Which of the following is the position of Sham?

- **A.** B. Sits at the extreme left end
- **B.** A. Sits at the extreme right end ✓
- **C.** C. Sits second to the right of Arjun
- **D.** D. Sits between Arjun and Mohan

**Q2** Reasoning

NERD is related to LCVH in a certain way based on the English alphabetical order. In the same way, JAZL is related to HYDP. To which of the following is FWHT related, following the same logic?

- **A.** A. CUKY
- **B.** B. EVLW
- **C.** D. DULX ✓
- **D.** C. ETMX

**Q3** Reasoning

Seven boxes Q, R, W, T, E, U, and Y are kept one over the other but not necessarily in the same order.
T is kept immediately above Y. U is kept immediately above R. Only Q is kept above W. Only two boxes are kept above T. U is not kept at the third position from the bottom.
How many boxes are kept above U?

- **A.** B. 2
- **B.** D. 3
- **C.** C. 4
- **D.** A. 5 ✓

**Q4** Reasoning

If 'A' stands for '÷', 'B' stands for '×', 'C' stands for '+' and 'D' stands for '–', then what will come in place of the question mark '?' in the following equation?

(56 A 8) B 2 C (14 A 7) B 5 D 10 = ?

- **A.** D. 24
- **B.** A. 14 ✓
- **C.** B. 18
- **D.** C. 32

**Q5** Reasoning

Which of the following options will replace the question mark (?) in the given series to make it logically complete?

GEAC CAWY ? USOQ QOKM

- **A.** A. YWSU ✓
- **B.** B. QPJL
- **C.** C. QNJL
- **D.** D. QRTV

**Q6** Reasoning

In a certain code language,
A @ B means 'A is the father of B'
A & B means 'A is the daughter of B'
A # B means 'A is the son of B'
A % B means 'A is the brother of B'

Based on the above, how is P related to T if 'P # Q % R & S @ T'?

- **A.** D. Mother's father
- **B.** B. Brother's son ✓
- **C.** C. Father
- **D.** A. Father's brother

**Q7** Reasoning

In a certain code language, 'RETL' is coded as '40' and 'KAVQ' is coded as '44'.
What is the code for 'YNSI' in the given code language?

- **A.** A. 31
- **B.** B. 28 ✓
- **C.** D. 40
- **D.** C. 34

**Q8** Reasoning

## Reasoning

**Q1** Reasoning

S, I, L, E, C, O, and N are sitting around a circular table, facing the centre. C sits to the immediate left of N and O sits to the immediate right of N. Only one person sits between O and I. S and L are immediate neighbours of I. Who is sitting to the immediate left of C?

- **A.** B. E ✓
- **B.** A. S
- **C.** D. N
- **D.** C. L

**Q2** Reasoning

Q is the brother of L. M is the sister of Q. N is the mother of Q, who is the father of P. Q has only one son, P. How is P related to N?

- **A.** D. Brother's daughter
- **B.** C. Son's son ✓
- **C.** B. Son
- **D.** A. Daughter

**Q3** Reasoning

In a certain code language, 'FOUR' is coded as '7542' and 'RENT' is coded as '1436'.
What is the code for 'R' in the given code language?

- **A.** B. 1
- **B.** A. 2
- **C.** C. 3
- **D.** D. 4 ✓

**Q4** Reasoning

Each of P, B, K, L, T, G and V has an exam on a different day of a week starting from Monday and ending on Sunday of the same week. Only one person has the exam after P. Only one person has the exam between T and P. L has the exam before V but after K. B has the exam after T but before G. How many people have exams between L and P?

- **A.** D. Three ✓
- **B.** B. Four
- **C.** A. Two
- **D.** C. One

**Q5** Reasoning

What should come in place of ? in the given series based on the English alphabetical order?

CUM YQI UME QIA ?

- **A.** C. MEW ✓
- **B.** D. MWE
- **C.** B. MER
- **D.** A. MRE

**Q6** Reasoning

Select the pair which follows the same pattern as that followed by the two sets of pairs given below. Both pairs follow the same pattern.

SEN : VHR
YKV : BNZ

- **A.** A. EQD : HTH ✓
- **B.** C. NZP : QDT
- **C.** D. INE : KPI
- **D.** B. RMP : TQT

**Q7** Reasoning

What will come in the place of the question mark (?) in the following equation, if '+' and '-' are interchanged and '×' and '÷' are interchanged?

31 ÷ 5 + 36 × 6 - 1 = ?

- **A.** D. 150 ✓
- **B.** A. 160
- **C.** B. 170
- **D.** C. 180

**Q8** Reasoning

**Q1** Reasoning

In a certain code language,
'A + B' means 'A is the wife of B',
'A – B' means 'A is the brother of B',
'A x B' means 'A is the mother of B',
'A = B' means 'A is the father of B'.

How is P related to Q if 'P = R + Y – S x Q'?

- **A.** Mother's mother
- **B.** Wife's mother's father
- **C.** Mother's brother's wife's father ✓
- **D.** Sister's daughter

**Q2** Reasoning

P, Q, R, S, T, and U sitting in a circle at equidistance (but not necessarily in the same order), and facing the centre. U sits to the immediate right of Q. P sits to the immediate left of T. S sits third to the right of R. R doesn't sit next to P.
Who is sitting to the immediate right of U?

- **A.** P
- **B.** R
- **C.** S ✓
- **D.** T

**Q3** Reasoning

What should come in place of ? in the given series based on the English alphabetical order?

MAN HVI CQD XLY ?

- **A.** SGT ✓
- **B.** STG
- **C.** SGY
- **D.** SYG

**Q4** Reasoning

TWIG is related to RUMK in a certain way based on the English alphabetical order. In the same way, PSQO is related to NQUS. To which of the following is LOYW related, following the same logic?

- **A.** JMCA ✓
- **B.** KLDB
- **C.** INBZ
- **D.** ILCB

**Q5** Reasoning

In a certain code language, 'SIDE' is coded as '3157' and 'DORM' is coded as '2416'.
What is the code for 'D' in the given code language?

- **A.** 1 ✓
- **B.** 2
- **C.** 5
- **D.** 6

**Q6** Reasoning

Each of the digits in the number 8563174 is arranged in ascending order from left to right. What will be the sum of the digits which are second from the left and second from the right in the new number thus formed?

- **A.** 14
- **B.** 12
- **C.** 10 ✓
- **D.** 8

**Q7** Reasoning

Six boxes K, L, Q, R, S and T are kept one over the other but not necessarily in the same order. T is kept second from the bottom. Only three boxes are kept between T and L. K is kept at one of the positions below T. Only R is kept between L and Q. How many boxes are kept between S and L?

- **A.** One
- **B.** Two ✓
- **C.** Three
- **D.** Four

**Q8** Reasoning

Read the given statement(s) and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts,
decide which of the given conclusions logically follow(s) from the statement(s).
Statements: Some bangles are rings. All rings are anklets.

'P – Q' means 'P is the sister of Q',
'P + Q' means 'P is the mother of Q',
'P ÷ Q' means 'P is the brother of Q'.
How is L related to V if 'V + M × L ÷ U'?

- **A.** C. Sister
- **B.** D. Father
- **C.** B. Brother
- **D.** A. Son's son ✓

**Q2** Reasoning

Seven people S, M, J, K, O, P and T are sitting in a straight line, facing the north. M is sitting second to the left of S. T is sitting third to the left of J. Only one person is sitting to the left of M. P is sitting second to the right of K. Three of the following four are alike in some manner based on the given arrangement and hence form a group. Which option does not belong to that group?

- **A.** C. OT
- **B.** A. SK ✓
- **C.** B. MS
- **D.** D. KP

**Q3** Reasoning

COLD is related to KWTL in a certain way based on the English alphabetical order. In the same way, IURJ is related to QCZR. To which of the following options is GSPH related, following the same logic?

- **A.** D. OAXP ✓
- **B.** B. OSWE
- **C.** C. OCDX
- **D.** A. ONJU

**Q4** Reasoning

**Q1** Reasoning

A, B, C, D, E, F and G are sitting around a circular table, facing the centre. A is sitting to the immediate right of B. D is sitting to the immediate left of C. D is sitting to the immediate right of E. F is sitting second to the right of B. G is sitting second to the left of A.

How many people in total are sitting between G and E when counted from the right of G?

- **A.** 1
- **B.** 2
- **C.** 3 ✓
- **D.** 4

**Q2** Reasoning

Munna starts from Point A and drives 43 km towards North. He then takes a right turn, drives 51 km, turns right and drives 52 km. He then takes a right turn and drives 56 km. He takes a final right turn, drives 9 km and stops at Point P. How far (shortest distance) and towards which direction should he drive in order to reach Point A again? (All turns are 90-degree turns only unless specified.)

- **A.** 3 km to the east
- **B.** 4 km to the west
- **C.** 5 km to the east ✓
- **D.** 6 km to the west

**Q3** Reasoning

What will come in the place of '?' in the following equation, if '+' and '–' are interchanged and '×' and '÷' are interchanged?
88 + (56 × 8) ÷ 4 - 19 = ?

- **A.** 68
- **B.** 79 ✓
- **C.** 84
- **D.** 92

**Q4** Reasoning

Select the pair which follows the same pattern as that followed by the two set of pairs given below. Both pairs follow the same pattern.
HQV : JUU
LPX : NTW

- **A.** PUR : RYQ ✓
- **B.** FTH : HXF
- **C.** MVO : OYN

KAC 14 IBE 1 GCG -12 EDI -25 ?

- **A.** CEK -38 ✓
- **B.** NJK -32
- **C.** GHT -67
- **D.** VFG -43

**Q6** Reasoning

Each of B, C, D, E, G, H and I has flight on a different day of a week starting from Monday and ending on Sunday of the same week. Only B has flight before D. Only three people have flight between E and H. G has flight on some day before H and on some day after I. Only three people have flight between C and D. How many people have flight after E?

- **A.** Four ✓
- **B.** Three
- **C.** Two
- **D.** One

**Q7** Reasoning

In a certain code language,
A @ B means 'A is the father of B'
A & B means 'A is the wife of B'
A # B means 'A is the son of B'
A % B means 'A is the mother of B'

Based on the above, how is P related to T if 'P # Q % R & S @ T'?

- **A.** Father's father
- **B.** Wife's father
- **C.** Mother's brother ✓
- **D.** Mother's father

Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements: Some grapes are oranges. All oranges are apples.
Conclusion (I) : Some grapes are apples.
Conclusion (II) : All apples are oranges.

**A.** Only conclusion (I) follows ✓

**B.** Only conclusion (II) follows

**C.** Neither conclusion (I) nor (II) follows

**D.** Both conclusions (I) and (II) follow

**Q9** Reasoning

Based on the English alphabetical order, three of the following four letter cluster pairs are alike in a certain way and thus form a group. Which is the one that does not belong to that group? (Note: The odd man out is not based on the number of consonants/vowels or their position in the letter cluster)

**A.** RT-UX ✓

**B.** PR-SU

**C.** HJ-KM

**D.** CE-FH

**Q10** Reasoning

## Reasoning

**Q1** Reasoning

In a certain code language,
A + B means 'A is the wife of B',
A – B means 'A is the brother of B',
A × B means 'A is the mother of B',
and A = B means 'A is the father of B'.

How is P related to Q if 'P – R + Y = S × Q'?

- **A.** Mother's sister's brother
- **B.** Father
- **C.** Mother's mother's brother ✓
- **D.** Wife's mother's father

**Q2** Reasoning

Which of the following letter-number clusters will replace the question mark (?) in the given series to make it logically complete?
NID61 , HCX66 , BWR71 , VQL76 , ?

- **A.** PKF81 ✓
- **B.** PHF81
- **C.** PKB81
- **D.** PKE81

**Q3** Reasoning

Select the triad which follows the same pattern as that followed by the two triads given below. Both triads follow the same pattern.

OG-QJ-TV
RJ-TM-WY

- **A.** KC-MF-PR ✓
- **B.** KC-MF-PS
- **C.** LC-MF-PS
- **D.** LC-ME-PS

**Q4** Reasoning

What will come in the place of '?' in the following equation, if '+' and '-' are interchanged and 'x' and '÷' are interchanged?
28 ÷ 4 + 64 x 8 - 15 = ?

- **A.** 103
- **B.** 112
- **C.** 115
- **D.** 119 ✓

**Q5** Reasoning

Each of B, C, D, E, G, H and I has a flight on a different day of the week starting from Monday and ending on Sunday of the same week. Only one person has flight between C and E. B doesn't have flight on Friday. Only three people have a flight between H and D. D has a flight on the last day of the week. G has a flight immediately the day before I. How many people have a flight after B?

- **A.** Five
- **B.** Six ✓
- **C.** Four
- **D.** Three

**Q6** Reasoning

Seven people, X, Y, Z, C, D, E and F, are sitting around a circular table facing the centre of the table. Only one person sits between Z and E when counted from the left of E. F sits third to the right of D. Y sits third to the left of X. F sits to the immediate right of Y. C is not an immediate neighbour of Y. How many people sit between C and E when counted from the right of C?

- **A.** Four
- **B.** Three ✓
- **C.** Two
- **D.** One

**Q7** Reasoning

In a certain code language, 'MATHS' is coded as '64' and 'ENGLISH' is coded as '105'.
What is the code for 'SCIENCE' in the given code language?

- **A.** 121 ✓
- **B.** 131
- **C.** 118
- **D.** 126

**Q8** Reasoning

Based on the alphabetical order, three of the following four are alike in a certain way and thus form a group. Which is the one that does not belong to that group?
(Note: The odd one out is not based on the number of consonants/vowels or their position in the letter cluster.)

- **A.** DBE ✓
- **B.** AXB
- **C.** SPT
- **D.** HEI

**Q1** Reasoning

P, Q, R, S, T, U and V are sitting around a circular table facing the centre. U is sitting second to the left of Q. T is sitting to the immediate right of U. P is sitting fourth to the right of T. R is not an immediate neighbour of Q. S is sitting second to the left of R. Which two of the following are NOT immediate neighbours?

- **A.** UR
- **B.** TS ✓
- **C.** QV
- **D.** SV

**Q2** Reasoning

In the following triad, each group of letters is related to the subsequent one following a certain logic. Select from the given options, the one which follows the same logic.
BAYS - AYBS - SYAB
CLAP - LACP - PALC

- **A.** INTO - NTIO - OTNI ✓
- **B.** SEAT - SAET - TAES
- **C.** BUSY - UBSY - YUSB
- **D.** BURN - URBN - URNB

**Q3** Reasoning

G, H, I, J, K, and L live on six different floors of the same building. The lowermost floor in the building is numbered 1, the floor above it number 2, and so on till the topmost floor, which is numbered 6. The product of floors on which H and L live is 10. G lives immediately above J. The sum of floors on which I and H live is 11.
How many people live below L?

- **A.** 1 ✓
- **B.** 2
- **C.** 3
- **D.** 4

**Q4** Reasoning

If 2 is added to each even digit and 1 is subtracted from each odd digit in the number 6173254, what will be the sum of the second digit from left and the first digit from right in the new number thus formed?

- **A.** 10
- **B.** 8
- **C.** 12
- **D.** 6 ✓

**Q5** Reasoning

What should come in place of ? in the given series based on the English alphabetical order?
VXR TUQ RRP POO ?

- **A.** NLN ✓
- **B.** MKJ
- **C.** TRE
- **D.** TTY

**Q6** Reasoning

In a certain code language,
A @ B means 'A is the father of B'
A & B means 'A is the wife of B'
A # B means 'A is the daughter of B'
A % B means 'A is the son of B'

Based on the above, how is P related to T if 'P # Q % R & S @ T'?

- **A.** Sister
- **B.** Daughter
- **C.** Brother's daughter ✓
- **D.** Father's sister

**Q7** Reasoning

In a certain code language, 'sip field hip' is coded as ' tm zc is' and 'sir hip yak' is coded as 'xz uu zc'. How is 'hip' coded in the given language?

- **A.** xz
- **B.** zc ✓
- **C.** tm
- **D.** is

'A % B' means 'A is the brother of B',
'A $ B' means 'A is the father of B' and
'A @ B' means 'A is the mother of B'.

How is L related to P if 'L $ A % N @ S # P'?

- **A.** Wife's father
- **B.** Wife's father's father
- **C.** Wife's mother's sister
- **D.** Wife's mother's father ✓

**Q2** Reasoning

Eight people are sitting in a circle (A, B, C, D, E, F, G and H) facing the centre. D is sitting third to the right of A. B is sitting second to the left of A. How many people are sitting between D and B when counted from the right of D?

- **A.** Four
- **B.** Three
- **C.** Two ✓
- **D.** Five

**Q3** Reasoning

Seven boxes F, G, H, I, U, V and W are kept one over the other but not necessarily in the same order. No box is kept above I. Only three boxes are kept between I and U. Only one box is kept between H and F. F is kept just above U. Only four boxes are kept between H and W. V is kept at some place above G.
Which box is kept second below V?

- **A.** F
- **B.** H
- **C.** U ✓
- **D.** W

**Q4** Reasoning

Which of the following letter-number clusters will replace the question mark (?) in the given series to make it logically complete?

P, Q, R, S, T and U are sitting around a circular table, facing the centre. R is sitting third to the left of P. S is sitting to the immediate left of R. Q is sitting second to the right of S. U is an immediate neighbour of Q. Who is sitting to the immediate right of T?

- **A.** P
- **B.** Q
- **C.** R
- **D.** S ✓

**Q3** Reasoning

Amrit starts from Point Y and drives 12 km towards north. He then turns right and drives 22 km, takes a right and drives 58 km. He then takes a right turn and drives 35 km. He takes a right turn, drives 46 km, turns left and drives 14 km to stop at Point Z. How far (shortest distance) and towards which direction should he drive in order to reach Point Y again? (All turns are 90 degree turns only, unless specified)

- **A.** 26 km towards west
- **B.** 22 km towards east
- **C.** 31 km towards west
- **D.** 27 km towards east ✓

**Q4** Reasoning

What should come in place of ? in the given series based on the English alphabetical order?
PIN SLQ VOT YRW ?

- **A.** BUZ ✓
- **B.** BZU
- **C.** BIZ
- **D.** BZS

**Q5** Reasoning

In the following triad, each group of letters is related to the subsequent one following a certain logic. Select from the given options, the one which follows the same logic.
CORD - CDOR - DCRO
GEAR - GREA - RGAE

- **A.** FAST - FTAS - TFSA ✓
- **B.** BING - BNIG - GNIB
- **C.** DUCK - UDCK - KUCD
- **D.** MIND - MDIN - IMND

**Q6** Reasoning

If + means -, - means ×, × means ÷, and ÷ means +, then what will come in place of the question mark (?) in the following equation?

52 - 3 ÷ 7 + 88 × 4 = ?

- **A.** 133
- **B.** 139
- **C.** 141 ✓
- **D.** 149

## Reasoning

**Q1** Reasoning

In a certain code language,
'A @ B' means 'A is the sister of B',
'A # B' means 'A is the brother of B',
'A + B' means 'A is the wife of B',
'A % B' means 'A is the father of B'.

How is M related to T if 'M + N % P # S @ T'?

- **A.** Sister
- **B.** Brother's wife
- **C.** Father's brother's son's wife
- **D.** Mother ✓

**Q2** Reasoning

Seven friends - L, M, N, O, P, Q, and R - are sitting in a straight line, facing the north. Only one person sits to the left of N. Only O is sitting between N and R. M sits to the right of Q and P sits to the left of N. M is not sitting at either end of the row. Who is sitting to the immediate right of M?

- **A.** P
- **B.** L ✓
- **C.** Q
- **D.** R

**Q3** Reasoning

Amir starts from Point A and drives 35 km towards South. He then takes a left turn, drives 38 km, turns left and drives 42 km. He then takes a left turn and drives 40 km. He takes a final left turn, drives 7 km and stops at Point P. How far (shortest distance) and towards which direction should he drive in order to reach Point A again? (All turns are 90 degrees turns only unless specified)

- **A.** 1 km to the east
- **B.** 2 km to the east ✓
- **C.** 3 km to the west
- **D.** 4 km to the west

**Q4** Reasoning

Which of the following letter-number clusters will replace the question mark (?) in the given series to make it logically complete?

DEB18, YZW31, TUR44, OPM57, ?

- **A.** JKH70 ✓
- **B.** JLH70
- **C.** JKU70
- **D.** MKH70

**Q5** Reasoning

SCAR is related to QADU in a certain way based on the English alphabetical order. In the same way, OYGX is related to MWJA. To which of the following is KUMD related, following the same logic?

- **A.** JSQF
- **B.** HRPG
- **C.** JTOH
- **D.** ISPG ✓

**Q6** Reasoning

What will come in the place of '?' in the following equation, if '+' and '–' are interchanged and '×' and '÷' are interchanged?
40 + 16 × 4 – 12 ÷ 3 – 15 = ?

- **A.** 72
- **B.** 69
- **C.** 87 ✓
- **D.** 94

**Q7** Reasoning

Each of J, K, L, Q, R, S and T has match on a different day of a week, starting from Monday and ending on Sunday of the same week. Only three people have match after L. T has match two days before L. Only four people have match between R and T. J has match on one of the days after T. Q has match on the day immediately before K. How many people have match between K and J?

## Reasoning

**Q1** Reasoning

In a certain code language,
A & B means 'A is the husband of B',
A % B means 'A is the brother of B',
A $ B means 'A is the father of B' and
A @ B means 'A is the mother of B'.
Based on the above information, how is L related to S if 'L $ A % N @ S & P'?

- **A.** Mother's father ✓
- **B.** Husband's father's father
- **C.** Husband's mother's sister
- **D.** Father's father

**Q2** Reasoning

In a certain code language, 'USER' is coded as '9542' and 'WARN' is coded as '1369'.
What is the code for 'R' in the given code language?

- **A.** 9 ✓
- **B.** 1
- **C.** 2
- **D.** 3

**Q3** Reasoning

In the following triad, each group of letters is related to the subsequent one following a certain logic. Select from the given options, the one which follows the same logic.
DESK - EKSD - KSED
HELD - EDLH - DLEH

- **A.** DINE - IEND - ENID ✓
- **B.** GRAY - GARY - YARG
- **C.** DUST - UDST - TUSD
- **D.** DECK - EDCK - KECD

**Q4** Reasoning

Each of Q, R, W, T, E, U, and Y has an exam on a different day of the week, starting from Monday and ending on Sunday of the same week. W has an exam on Friday. Exactly three people have an exam between R and Q, neither of whom has an exam on Sunday.
T has an exam immediately after Y. U has an exam immediately before Q.
How many people have an exam after Y?

- **A.** 1
- **B.** 2
- **C.** 3 ✓
- **D.** 4

**Q5** Reasoning

What will come in the place of '?' in the following equation, if '+' and '−' are interchanged and '×' and '÷' are interchanged?
79 + 64 × 8 - 26 ÷ 2 = ?

- **A.** 104
- **B.** 123 ✓
- **C.** 137
- **D.** 156

**Q6** Reasoning

What should come in place of '?' in the given series based on the English alphabetical order?
OOL NMM MKN LIO ?

- **A.** PLI
- **B.** KGP ✓
- **C.** MJI
- **D.** BGY

**Q7** Reasoning

Six friends, Om, Kavita, Rishi, Poonam, Trisha and Usha, are sitting in a straight line, facing the north. Trisha sits third to the left of Poonam. Rishi sits to the immediate right of Om. Om sits at one of the extreme ends. Kavita is not an immediate neighbour of Trisha.
Who sits to the immediate left of Poonam?

- **A.** Om
- **B.** Rishi
- **C.** Usha
- **D.** Kavita ✓

## Reasoning

**Q1** Reasoning

P, Q, R, S, T and U are sitting around a circular table, facing the centre. R is sitting second to the left of P. S is sitting to the immediate left of R. Q is sitting fourth to the right of S. U is an immediate neighbour of S. Who is sitting to the immediate left of P?

A. Q
B. U
C. R
D. T ✓

**Q2** Reasoning

In a certain language,
P × Q means P is the brother of Q.
P – Q means P is the sister of Q.
P + Q means P is the father of Q.
P ÷ Q means P is the mother of Q.
Which of the following options represents C is the son of A's brother?

A. A – B ÷ C
B. A × B ÷ C
C. A ÷ B × C
D. A – B + C × D ✓

**Q3** Reasoning

Each of C, D, E, F, G, H and I has an exam on a different day of a week, starting from Monday and ending on Sunday of the same week. No one has exam before G. Only three people have exam between G and F. Only one person has exam between F and E. H has exam on Wednesday. D has exam on one of the days after I but on one of the days before C.
On which day of the week does F have exam?

A. Monday
B. Tuesday
C. Thursday
D. Friday ✓

**Q4** Reasoning

What should come in place of ? in the given series based on the English alphabetical order to make it logically complete?

END HRH KVL NZP ?

A. PDU
B. QDT ✓
C. RES
D. PCS

**Q5** Reasoning

What will come in the place of '?' in the following equation if '+' and '-' are interchanged and 'x' and '÷' are interchanged?
47 ÷ 2 + 99 x 11 - 5 = ?

A. 76
B. 82
C. 90 ✓
D. 99

**Q6** Reasoning

SQ 10 is related to OT -7 in a certain way. In the same way, KK 14 is related to GN -3. To which of the following is VT 21 related, following the same logic?

**B.** B. Only conclusion (II) follows ✓

**C.** D. Neither conclusion (I) nor (II) follows

**D.** C. Both conclusions (I) and (II) follow

**Q9** Reasoning

Based on the English alphabetical order, three of the following four letter-cluster pairs are alike in a certain way and thus form a group. Which is the one that does not belong to that group?
(Note: The odd one out is not based on the number of consonants/vowels or their position in the letter cluster.)

**A.** C. LO-NP ✓

**B.** D. AD-CF

**C.** B. GJ-IL

**D.** A. PS-RU

**Q10** Reasoning

Select the correct option that indicates the arrangement of the following words in a logical and meaningful order:
1. Publication
2. Manuscript
3. Editing
4. Research
5. Printing

**A.** C. 4,2,3,5,1 ✓

**B.** D. 2,4,5,3,1

**C.** A. 4,3,2,1,5

## Reasoning

**Q1** Reasoning

A, C, E, F, H, J, and L are sitting around a circular table, facing the centre. E sits fourth to the right of H. A sits second to the left of E. J sits third to the left of A. L sits third to the right of F.
How many people are sitting between C and H when counted from the right of C?

- **A.** One
- **B.** Two
- **C.** Three ✓
- **D.** Four

**Q2** Reasoning

In a certain code language,
Y + Z means 'Y is the mother of Z'
Y – Z means 'Y is the son of Z'
Y × Z means 'Y is husband of Z'
Y ÷ Z means 'Y is the daughter of Z'
Based on the above, how is C related to E if 'C × A + B × D + E'?

- **A.** Father
- **B.** Mother's father
- **C.** Father's father ✓
- **D.** Father's mother

**Q3** Reasoning

Anup starts from Point Y and drives 46 km towards north. He then takes a left turn, drives 51 km, turns left and drives 71 km. He then takes a left turn and drives 29 km. He takes a left turn, drives 25 km to stop at Point Z.
How far (shortest distance) and towards which direction should he drive in order to reach Point Y again? (All turns are 90-degree turns only, unless specified.)

- **A.** 24 km towards west
- **B.** 21 km towards west
- **C.** 23 km towards east
- **D.** 22 km towards east ✓

**Q4** Reasoning

BHEI is related to KQNR in a certain way based on the English alphabetical order. In the same way, EKHL is related to NTQU. To which of the following is HNKO related to, following the same logic?

- **A.** QWTX ✓
- **B.** QWTY
- **C.** RWTX
- **D.** RWTY

**Q5** Reasoning

If 'P' stands for '×' , 'Q' stands for '÷', 'R' stands for '-' and 'S' stands for '+' , what will come in place of the question mark '?' in the following equation?
42 S 5 P 8 R (18 Q 2) P 4 = ?

- **A.** 46 ✓
- **B.** 54
- **C.** 40
- **D.** 60

**Q6** Reasoning

Seven boxes, B, C, D, E, G, H and I, are kept one over the other but not necessarily in the same order. Only E is kept above I. Only two boxes are kept between H and G. Only four boxes are kept between I and D. C is kept immediately above B. G is not kept immediately above C. Which box is kept fourth from the top?

- **A.** B
- **B.** C ✓
- **C.** I
- **D.** D

**Q7** Reasoning

Which of the following letter number-clusters will replace the question mark (?) in the given series to make it logically complete?
MMM 11 JNO -2 GOQ -15 DPS -28 ?

- **A.** AQU -41 ✓
- **B.** NHJ -43
- **C.** TRD -33
- **D.** BGT -76

**Q8** Reasoning

Based on the English alphabetical order, three of the following four are alike in a certain way and thus form a group. Which is the one that does not belong to that group? (Note: The odd one out is not based on the number of consonants/vowels or their position in the letter-cluster.)

- **A.** EJO
- **B.** KPU
- **C.** BGQ ✓
- **D.** AFK

If 'A' stands for '÷', 'B' stands for '×', 'C' stands for '+' and 'D' stands for '-', what will come in place of the question mark '?' in the following equation?
(40 A 5) B 4 C 16 D 10 B 3 = ?

- **A.** C. 18 ✓
- **B.** A. 26
- **C.** B. 34
- **D.** D. 8

**Q6** Reasoning

IH 14 is related to KK 27 in a certain way. In the same way, EQ 17 is related to GT 30. To which of the following is BV 27 related to following the same logic?

- **A.** D. DY 40 ✓
- **B.** B. MJ 89
- **C.** A. VG 45
- **D.** C. VF 67

**Q7** Reasoning

What should come in place of (?) in the given series based on the English alphabetical order?
RFI QIK PLM OOO ?

- **A.** B. NRQ ✓
- **B.** D. MJI
- **C.** C. YTR
- **D.** A. YUH

P, Q, R, S, T, U and V are sitting around a circular table facing the centre. Q is the immediate neighbour of V and U. P is to the immediate left of U. T is not an immediate neighbour of P and S. Who is to the immediate right of R?

- **A.** T
- **B.** P
- **C.** V
- **D.** S ✓

**Q2** Reasoning

A's father is the brother and only sibling of B. B is the son of V. K is the wife of the brother of V. K's husband has only one sister and no brothers. How is B related to K?

- **A.** Mother
- **B.** Wife's mother's sister
- **C.** Husband's brother's son
- **D.** Husband's sister's son ✓

**Q3** Reasoning

BUNK is related to LEXU in a certain way based on the English alphabetical order. In the same way, PIBY is related to ZSLI. To which of the following options is TMFC related to, following the same logic?

- **A.** DWPM ✓
- **B.** DMPO
- **C.** DWER
- **D.** DMJU

**Q4** Reasoning

Which of the following letter-number clusters will replace the question mark (?) in the given series to make it logically complete?

GLQ 33, EQV 42, CVA 51, AAF 60, ?

- **A.** YFK 69 ✓
- **B.** ZEL 67
- **C.** XGJ 69
- **D.** ZGK 67

**Q5** Reasoning

If + means - , - means × , × means ÷ , ÷ means +, then what will come in place of the question mark (?) in the following equation?

41 - 2 ÷ 1 + 66 × 6 = ?

- **A.** 65
- **B.** 72 ✓
- **C.** 88
- **D.** 91

**Q6** Reasoning

S starts from Point A and drives 29 km towards the east. He then takes a right turn, drives 33 km, then turns right and drives 45 km. He then takes a right turn and drives 45 km. He takes a final right turn, drives 16 km and stops at Point P. How far (shortest distance) and towards which direction should he drive in order to reach Point A again? (All turns are 90-degree turns only, unless specified.)

- **A.** 12 km to the north
- **B.** 11 km to the east
- **C.** 12 km to the west
- **D.** 12 km to the south ✓

**Q7** Reasoning

Each of D, E, F, G, Q, R and S has an exam on a different day of a week, starting from Monday and ending on Sunday of the same week. Only three people have exams between E and Q. Q has an exam on the last day of the week. G has an exam on the second day after D. R has an exam immediately the day before S. F doesn't have an exam on Friday. How many people have exams between F and R?

### Reasoning

**Q1** Reasoning

In a certain code language,
'P + Q' means 'P is the mother of Q',
'P – Q' means 'P is the brother of Q',
'P × Q' means 'P is the wife of Q' and
'P ÷ Q' means 'P is the father of Q'.
How is L related to K if 'L × M ÷ N + O – K'?

- **A.** B. Mother's mother ✓
- **B.** C. Father's mother
- **C.** D. Sister's daughter
- **D.** A. Daughter's sister

**Q2** Reasoning

A, B, C, D, E, F, G and H are sitting around a circular table facing the centre. D is sitting third to the left of H. H is the immediate neighbour of both E and C. F is sitting to the immediate left of D. E is sitting third to the left of F. B and G are immediate neighbours, but B is not an immediate neighbour of E. How many people are sitting between D and B, when counted from the right of D?

- **A.** B. Four
- **B.** C. Three
- **C.** A. Two
- **D.** D. Five ✓

**Q3** Reasoning

Each of P, L, R, N, T, D and E has an exam on a different day of a week starting from Monday and ending on Sunday of the same week. Only four people have exams before E. R has the exam on Wednesday. T has the exam immediately before D. L has the exam before E. N has the exam after P but before R. How many people have exams between D and P?

- **A.** D. Three
- **B.** A. Four
- **C.** C. Two
- **D.** B. Five ✓

**Q4** Reasoning

BUNK is related to NGZW in a certain way based on the English alphabetical order. In the same way, XQJG is related to JCVS. To which of the following options is HATQ related to, following the same logic?

- **A.** C. TMFC ✓
- **B.** D. TFCM
- **C.** A. TMHU
- **D.** B. TCDE

**Q5** Reasoning

What should come in place of ? in the given series based on the English alphabetical order to make it logically complete?

GLA INE KPI MRM ?

- **A.** C. OTQ ✓
- **B.** B. NSP
- **C.** A. PUR
- **D.** D. NTR

**Q6** Reasoning

In a certain code language, 'GLAD' is coded as '7542' and 'LENS' is coded as '1356'. What is the code for 'L' in the given code language?

- **A.** B. 5 ✓
- **B.** A. 1
- **C.** D. 2
- **D.** C. 3

**Q7** Reasoning

If 1 is added to each odd digit and 2 is subtracted from each even digit in the number 7413856, how many digits will appear more than once in the new number thus formed?

- **A.** B. None
- **B.** C. One
