Q50 English

Read the following passage carefully and answer the questions that follow.

The story is set in a future world where society is fully controlled to keep people stable and orderly. The year is A.F. 632, and people are created in laboratories instead of being born naturally. Society is divided into five groups called castes, from Alphas at the top to Epsilons at the bottom. Each group has fixed roles and cannot change its position. Children are trained from a very young age to think and behave in certain ways. This training helps maintain peace but limits freedom and personal choice. People are taught to avoid strong emotions and follow rules without question. Bernard Marx is an Alpha who feels different and does not fully fit into society. He meets John, who was raised outside this controlled world. John begins to question the system and believes people should have freedom and real feelings. The story shows how too much control can reduce individuality and stop people from living meaningful and independent lives.

What is the meaning of "stable" in the passage?

A. Fixed and not likely to change

B. Fast and always moving quickly

C. Weak and easy to break down

D. New and recently developed

Q51 English
