Q51 English

Read the given passage carefully and answer the following questions.

Gaming addiction has emerged as a growing concern, particularly among teenagers and young adults. What begins as a harmless recreational activity can gradually develop into a compulsive behaviour that interferes with daily life. Excessive gaming often leads to poor academic performance, disrupted sleep patterns, and reduced social interaction. Psychologists argue that many games are designed to keep users engaged through reward systems and constant challenges, making it difficult for players to disengage. While some defend gaming as a source of relaxation and skill development, the lack of self-regulation can turn it into a harmful habit. Parents and educators face the challenge of distinguishing between healthy engagement and addiction. Furthermore, the rise of online multiplayer platforms has intensified peer pressure and competitiveness. Addressing gaming addiction requires awareness, time management, and supportive intervention rather than strict prohibition. Ultimately, the responsibility lies in striking a balance between entertainment and personal well-being.

What is one effect of excessive gaming mentioned in the passage?

- A. Improved social interaction
- B. Better academic performance
- C. Disrupted sleep patterns
- D. Increased outdoor activities

Q52 English

Q53 English

What can be inferred about strict prohibition of gaming?

- A. It is the best long-term solution available.
- B. It is completely ineffective in practice in many cases.
- C. It may not be as effective as balanced intervention.
- D. It should be applied to all players equally and fairly.

Q54 English
