Q45 English

Read the given passage and answer the questions that follow.

For most of human history, people lived by hunting animals and gathering wild plants. Philosophers often described this life as hard, dangerous and short because no food was grown or stored, so every day was a struggle to find something to eat. This began to change about 10,000 years ago, when people in different parts of the world started domesticating plants and animals. The agricultural revolution spread widely, and now only a few hunter-gatherer groups remain. From the progressivist point of view, it seems obvious why hunter-gatherers shifted to farming — agriculture produces more food with less effort. Crops provide far more yield per area than wild plants, and domestic animals offer a steady food source. Imagine a tired group of hunter-gatherers coming across an orchard full of fruit or a field of sheep; they would instantly see the benefits. Farming promised a more reliable and productive way to get food compared to constant foraging and hunting.

For most of history, how did humans get their food?

- A. By trading goods
- B. By hunting and gathering
- C. By farming crops
- D. By raising animals only

Q46 English
