#### Q48 English

Read the passage carefully and answer the questions that follow.

In a remote village in Rajasthan, water scarcity has shaped the lives of its residents for generations. Every drop of water is valued, and traditional rainwater harvesting systems, known as "johads", have been ingeniously used to store and channel water. Women and children walk miles daily to fetch water, turning it into a communal activity that strengthens social bonds. Over time, modern interventions like solar-powered pumps have complemented these age-old practices, improving efficiency without disrupting traditional methods. The village's resilience lies not only in technology but in the people's collective awareness and adaptability. By preserving indigenous knowledge and embracing sustainable solutions, the community ensures survival amid harsh climatic conditions. This delicate balance between tradition and innovation highlights the role of human ingenuity in confronting environmental challenges. The story reflects how resource scarcity can foster cooperation, innovation, and respect for natural systems.

What is a "johad" used for in the village?
