Q48 English

Read the passage and answer the questions that follow.

Trees are vital to life on Earth. They produce oxygen, absorb carbon dioxide, and prevent soil erosion. Forests provide habitats for countless species of animals and plants, maintaining ecological balance. Trees also offer fruits, timber, and shade. In cities, they reduce pollution, lower temperatures, and improve mental health. However, deforestation has become a major problem due to urbanization, logging, and agriculture. Large-scale tree cutting causes loss of biodiversity, climate changes, and natural disasters like floods. Protecting existing forests and planting new trees are essential to ensure a sustainable environment. Every individual's effort to plant and care for trees contributes to a healthier planet for future generations.
