#### Q47 English

Read the given passage and answer the questions that follow.

Apples are juicy, sweet, and tasty, and they are also an important part of a healthy diet. Research shows that eating apples can reduce the risk of cancer, stroke, and heart disease. Studies at Cornell University and in Hawaii found nutrients in apples slow cancer cell growth and lower the risk of lung cancer. Research in Finland showed men who ate apples had a lower risk of stroke, and at the University of California-Davis, apples helped prevent harmful LDL cholesterol buildup, reducing heart attack risk.

Apples also aid digestion because they contain enzymes and fibre, particularly pectin, which lowers cholesterol. A medium apple has about 80 calories and 5 grams of fibre. Eating apples also cleans teeth and massages gums.

Apples are rich in phytochemicals, antioxidants, vitamins, and minerals like potassium and vitamin C. Phytochemicals reduce cell damage from free radicals. Combined with other fruits, like oranges, apples improve nutrient absorption. Eating at least one apple a day supports overall health.

Identify the central theme of the passage.

- A. Apples are nutritious and contribute to overall health. ✓
- B. Apples are only a tasty snack with no health benefits.
- C. Fruits and vegetables are unnecessary for a healthy diet.
- D. Apple juice is more beneficial than whole apples.

#### Q48 English
