Q55 English

Read the following passage carefully and answer the questions that follow.

Childhood obesity is rising rapidly in India. In 2025, around 41 million children aged 5 to 19 were overweight or obese. This reflects a global trend, with more than one in five children affected worldwide. One major reason is the sharp increase in screen time from smartphones, tablets, and televisions. Although digital devices support learning, excessive use leads to less physical activity, unhealthy eating habits, poor sleep, and weight gain. Many school students spend over two hours daily on screens for non-academic purposes, and some spend even more time on games, videos, and social media. This trend increased after the COVID period and continues today in both urban and rural areas. Too much screen use reduces exercise, encourages mindless snacking, and disrupts sleep cycles. These factors together lead to weight gain. To prevent obesity, children need balanced screen use, regular physical activity, nutritious food, and adequate sleep. Parental guidance and school awareness programs can help children build healthier habits.

How is the passage mainly structured?

- A. Storytelling with characters and events
- B. Comparison between two different countries
- C. Problem followed by causes and solutions
- D. Description of a single personal experience

Q56 English

Which fact is mentioned in the passage?
