Q54 English

Read the passage carefully and answer the questions that follow.

One aspect of the history of catastrophe markets is very old. Weather gambling was described by one newspaper in 1931 as 'one of the oldest, most fascinating and uncertain gambles in the world'. In 1886, betting on how long it would rain was in fashion, and, by the 1930s, office weather pools were commonplace. Weather gambling has now taken organised forms from the 19th to the 21st centuries, from informal bets to gambling rings and lotteries. Rain betting, the oldest and most common form of weather gambling, was often tied to local community traditions. It flourished in Calcutta and Bombay in the 1880s and '90s. Crowds gathered to gamble on whether a rain gauge would overflow, confident that cheating was impossible because there was no ambiguity in a downpour. As one newspaper remarked: 'When it rains in India it rains; there is no half-way business about it.'

Choose the most appropriate title for the passage.

A. The Role of Newspapers in Reporting Local Traditions

B. The Impact of Rainfall on Indian Agricultural Practices

Q56 English

Why did people believe cheating was impossible in rain betting?

A. The betting was strictly regulated by official authorities

B. Rainfall could be measured clearly without any confusion

C. Only trained experts were allowed to participate in betting

D. The results were announced publicly by newspapers daily

Q57 English
