Q50 English

Read the passage and answer the questions that follow.

The first law of human nature is simple but powerful: we are driven by our emotions more than we realize. We like to think we are logical, but often, our decisions are clouded by feelings like anger, envy, or sudden excitement. This is why we sometimes fall into self-destructive patterns that we seem unable to control. To gain real power and control over our lives, we must first master this emotional self. The goal is not to eliminate feelings, but to create a moment of mental space before reacting. We must learn to step back and observe our emotions without letting them take over our thinking. When you feel a strong impulse, learn to pause. This practice of observation—looking within to see the source of your troubling emotions—is how you begin to break those negative patterns. By accepting that irrationality is part of human nature, you choose reason over impulse.

Identify the suitable title for the passage.

- A. D. The Economics of Trade
- B. C. Mastering the Emotional Self
- C. A. The Science of Emotions
- D. B. The Art of Being Emotional
